This is a pretty good list of the other poker players in the tournament. They include Rick Doty under many names so the list is nearly as long as it appears. \_\_Ron

The problem with being "read in" is that it does not include any information, just a key to a place where information might be accessible and a warning that accessing that location could be associated with significant risk. Politicians are extremely risk averse, and accessing the location where the key might have value is extremely difficult. I keep a handful of keys in my pocket for just such occasion when a politician might demand access. "Here you are sir or madam; you now have a key; use it at great personal risk; or leave that to me."

The New York Times fake news apocalypse has reached perfection with a front page story claiming UFOs exist. No surprise to see CIA-parapsychology-Scientology frauds like Harold E Puthoff involved and the most basic journalistic questions unasked.

[archive.is/HFLRw#selectio ...](https://archive.is/HFLRw#selectio...)

Under Mr. Bigelow's direction, the company modified buildings in Las Vegas for the storage of metal alloys and other materials that Mr. Elizondo and program contractors said had been recovered from unidentified aerial phenomena. Researchers also studied people who said they had experienced physical effects from encounters with the objects and examined them for any physiological changes. In addition, researchers spoke to military service members who had reported sightings of strange aircraft.

"We're sort of in the position of what would happen if you gave Leonardo da Vinci a garage-door opener," said Harold E. Puthoff, an engineer who has conducted research on extrasensory perception for the C.I.A. and later worked as a contractor for the program. "First of all, he'd try to figure out what is this plastic stuff. He wouldn't know anything about the electromagnetic signals involved or its function."

How big of a voting bloc was the UFO vote? If anything, it opened them up to ridiculous comments. There was absolutely no reason to "pander" to UFO people.

About 30% of the U.S. population are willing to state that they believe UFOs have visited earth. It's a substantial bloc that is, more importantly, highly active in its lobbying efforts and the pandering is real.
