

RCMP

Livingston

McEachern.

Musgrave. Sept 21, 1976.

"I have spoken with a growing number of witnesses or RCMP constables who have either given reports or dispatched them - but they aren't at NRC. Now if you read some of the memoranda of Dr. Millman instructing the RCMP Ottawa Headquarters of RCMP on what is of interest to NRC it isn't surprising that some of these don't get to NRC. I don't think it is striking the meaning of his letters to say that he is only interested in studying VFCs 'scientifically' - i.e. as potential meteorites. Of a case doesn't fit this description - NRC isn't interested in it. I suspect that some cases get gobbled up because the RCMP or what have you knows that whatever it is it isn't of any interest to NRC - so does accordingly."
