## Start of coverup

126. reorganization of Project Grudge Oct 27, 1951  
- returned by its head Edward S. Ruppelt the "Dark Ages"  
- introduced CIRVIS (Communication Instructions for Reporting Vital Intelligence Sightings)
127. Feb 17, 1954 A force officials met with representatives of major airlines were requested to radio sighting reports directly to Military Air Transport Service in Washington or to the nearest air force base. Despite a petition signed by 500 pilots the new regulations went into effect. (not to discuss publicly or in media)  
- military pilots were required to file their sightings under a Joint Army-Navy-Air Force Publication 146 which stated pilots had to keep their sighting secret under penalty contained in Communications Act of 1934 and the espionage law. Air Force Regulation (AFR) 200-2 limited distribution of UFO reports to the three military intelligence groups. (146 & 200-2) according to Keyhole <sup>UFO secrecy policy</sup> high placed group <sup>own</sup> "silence group".
- 127 in March 52 Grudge becomes "the Aerial Phenomena Group"  
- another key Ruppelt changes term "flying saucer" to UFO

(1952) numerous flying saucers are seen over Washington many of them tracked on Andrews Air Base and Washington Airport radar F-94s are scrambled to shoot down the intruders. The Air Force holds the biggest news conference since WWII (Maj Gen John W. Sanford)

### Contactees

- immediately labels the person a leoney tone
- Smith stated it was one of the most fruitful avenues of research.
- Why are these two views so divergent. Is there a middle road.

AFCOS Regulation 124-88 states

A major concern in leak cases is to avoid lending credence to the compromised material... In the absence of official confirmation, publicized material can be damaged but must still be classed as speculation. Sometimes, the very existence of an official investigation provides confirmation. The problem may be a determining factor in deciding whether an investigation should be undertaken.

## Miracles of Mind

7.85 After 25 years of scientific inquiry, we have learned that there is, in general, no one answer to anything - only successive approximations, and a handful of good-looking metaphors."
