**Unidentified Flying Object - Assistance to Armed Services
(Air Force) - Fort Resolution, N.W.T. - 16 JUL 68**

16 JUL 68

1. At approx. 11:00 Am Miss Alice HODGES, Public Health Nurse, advised this office that Gene Murie NORN had sighted a U.F.O. earlier in the morning. At the time I was busy and NORN was not interviewed until later. He described to me what he had seen and told me of other people who had seen it also. When questioning the persons concerned I followed the format laid out in Operational Manual CO-Air and took detailed notes rather than statements. This way I was able to obtain more detail on the sightings as the locals were inclined to talk in monophrases, leave out details, and supply sketchy descriptions. The first person interviewed was NORN.

Gene Murie NORN (B:13 FEB 33) T.I.

- (a) Midnight to 12:30 AM 16 JUL 68.
- (b) Cloudy southwest of settlement and cloudy north of the settlement. Area between clear.
- (c) -
- (d) On roadway opposite Angus BEAULIEU'S walking towards my home in a westerly direction.
- (e) Alone.
- (f) Like a fireball. Like when you shoot a flare - a fire ball goes ahead and sort of sparks following quite ways behind. Sparks were like an arc welder, green and red in colour. Smoke behind like a jet only twisted a different shape. About the size of a jelly bean in the sky. Only took a few seconds to pass, less than a minute. Came from southwest travelling straight northeast. Looks like its breathing, sort of flaring, and this is when the sparks would fly out and smoke would come out. No noise at anytime. No wings. Travelling very fast, faster than a jet does in the sky. Looked like it was coming down but it didn't and went into the clouds and disappeared. Never saw anything like it before. Not a falling star. Smoke looks the same as smoke from fireworks, kind of curly. No idea how high.
- (g) Took about a minute to cross the open space, maybe about fifty seconds.
- (h) I consider NORN to be a steady, truthful individual and quite reliable. He has been employed by Forestry on fire fighting and was given a course in aircraft spotting. He produced RCAF Manual on Aircraft Recognition for the Ground Observer (AF Manual 355-10 CAP 462) and advised that the photo of the B-61 or Matador pilotless aircraft, page 80, resembled what he had seen. He told me the only difference was that the bright light or fire was directly at the rear of the object, there were numerous sparks, no wings, and no noise. Also no tail fin.

..... 2

RCMP - GRC 4881

CONTINUATION - SUITE DE C237
REV. 1-4-66RE:
OBJET:

Unidentified Flying Object

PAGE
2

Margaret Rose MANDEVILLE (B:27 OCT 47)

- (a) 12:30 to 1:00 AM 16 JUL 68.
- (b) Clear. Clouds in the northeast.
- (c) -
- (d) Intersection of the road by McPHERSON'S and road to Chris' Cafe.
- (e) Alone.
- (f) Long and pointed towards the front end. Sparks around the side of it, just ordinary, no colours. No sound. Bright light, lot brighter than the stars. Not too high. Could see it really plain. Before it went into the clouds I heard what sounded like two shots. After it went into the clouds I heard a sort of explosion, something like a backfire from a car. Just above me when I first saw it. Stayed a steady colour. Smoke behind, just a streak like a jet. Big, about 4 - 5 feet long (this is not an estimate on the size of the object but how big it looked in the sky). Really fast, lot faster than jets. No wings. Flying straight across. The bottom area was lighting it up but the rest was a light silvery colour. It was an orangy light, brighter than the stars but not the same colour.
- (g) one half to a minute observation.
- (h) Miss MANDEVILLE is also considered a truthful person and is normally reliable. She was frightened by the object and thought it was some kind of bomb. She told me that it was the bright light from the object when it was overhead that made her look up as she had not noticed it until that time. She could offer no estimate on the height.

Ernest Michael FABIEN (B:16 MAY 48)

Lawrence Allan LAROCQUE (B:12 JUN 51)

- (a) About 1:00 AM - after 12 for sure.
- (b) A few clouds, higher than the U.F.O.
- (c) -
- (d) Down by August BEAULIEU'S house on the old roadway that runs in front of the Bay house to the dock. We were walking.
- (e) Thomas Mathew UNKA.
- (f) Big bright light with all kinds of sparks around it and behind it. Sparks were purple, red, white and green. Big long light behind it. Sort of round shape. Quite big, bigger than a jet. Never made a sound. Very bright, brighter than the stars. Didn't seem to be very high. Really fast, faster than a jet. No wings. Looked like a star when we first saw it then it got really big and bright. It was straight out over the dock when we first seen it. We could see lights or what might be windows when it was going over. Really low and quite distinct. When it was past away it looked purplish. Travelling in a straight line. Heard what sounded like two shots when it was farther away.

..... 3

RE:
OBJET:

PAGE 11

Unidentified Flying Object

3

(f) continued

There was smoke behind in a streak, bright and wide. It came in from a westerly direction to a north easterly direction. It was low enough that if it was a jet it could be heard quite loud.

(g) Couple of minutes duration, no more than that.

(h) There is nothing to indicate that FABIEN and LAROCQUE are fabricating their story. I would not rate them as being as reliable as MANDEVILLE and NORN.

Mathew Tommy UNKA (B:24 AUG 50) T.I.

(a) 12:30 AM 16 JUL 68.

(b) Clear

(c) -

(d) Ernest Michael FABIEN and Lawrence Allan LAROCQUE'S location applies.

(e) With the above two.

(f) It looked like a star when I first seen it, then all of a sudden it got bigger and there were lights around it. Blue, white, and red lights. There was vapour about a mile behind. I could see it was long and oval shaped. No wings. Way brighter than the stars, like sparks flying off it. About $\frac{1}{2}$ to a mile high. Travelling in a straight line. The sparks trailed about a $\frac{1}{4}$ of a mile behind, then the smoke. The fire was coming from the rear. The whole thing was not glowing, just at the back. The front end was dark oval shaped. The light was like from an acetylene torch in colour only all over the place. It had a tail like a falling star only was slower than that. It was real bright and I could see the glow before it came out of the clouds. No noise.

(g) About 50 seconds to a minute.

(h) FABIEN and LAROCQUE were interviewed earlier than UNKA but accompanied him to the office. As we were going into the office an aircraft flew over and all three stated that the UFO was lower than the aircraft and appeared larger. I consider UNKA to be a reliable sort of person.

2. I checked with the Dept. of Transport Aeradio and they advised that the aircraft that had just passed over was Pacific Western Airlines, flight 182, flying at 7000 feet. I believe this aircraft is known as a Convair. This was approx. 9:10 PM of 16 JUL 68 and the aircraft was quite easily observed from the ground as such although little detail could be seen.

3. The foregoing people were not under the influence of alcohol, drugs, or suffering from lack of sleep when the observations were made.

..... 4

RE.
OBJET.

PAGE

Unidentified Flying Object

4

4. No photographs were taken.
5. I asked the people involved why they had not reported the sighting and all advised that by the time they had made it to the office the object would have been gone.
6. The D.O.T. Aeradio here advise that the ceiling was 1200 ft. scattered with cumulus and 12,000 ft. alto stratus on the night in question.
7. Attached are drawings obtained from the observers. These are quite plain and I doubt if they will supply much information. Attached also is a map of the settlement indicating the location of the people concerned when the sighting was made.
8. A message as required by Opr. Manuel CO-Air was telephoned to the O.C. Fort Smith S/Div. on 17 JUL 68.

RE:

U.F.O. Sighting, Deepdale Road, Inv. Co., N.S.

20 JUL 68

20 JUL 68

1. On the above date at approximately 11:30 PM a call was received at this Detachment. Lauchlin MACKINNON, of DEEPDALE, Inv. Co., N.S. stated that he, and members of his family, had been watching a bright light in the sky over his farm for the past twenty minutes. He stated that the object was still in sight and he wished a member to look into the matter.
2. I made an immediate patrol to the scene where I noticed three or four people standing in front of the MACKINNON farm. They seemed to be watching something to the North. As I approached on foot, I could see a bright object in the sky. It appeared to be several miles away and at a high altitude. The object seemed to be giving off colours of red, green and white. I viewed this object for approximately ten minutes, and no change in position was noted.
3. From investigation conducted, it was learned that the MACKINNON family had been out driving, and upon nearing their home, noticed a luminous object directly over their farm at an altitude of approximately 10,000 ft. It was first noticed by Margaret MACKINNON and brought to the attention of her father. As they entered the driveway the object left in a Northerly direction at a high rate of speed. It then stopped and remained stationary for approximately one hour. It was learned that the roof of the nearby barn had been lit up by the lights of the object. It was further learned that in fact two objects were sighted. A second object was noted at the same altitude, but to the East of the farm. The lights from this object lit up a corner of one of the fields on the MACKINNON farm. This object also left upon their arrival, but did not appear again. It was similar in appearance and made no noise when moving. The exact shape of the object could not be determined due to the intensity of the light. MACKINNON stated that it appeared to be round in shape giving off brilliant layers of the above mentioned colours. It should be noted at this time that this was the only report received on this sighting. Other farms in the area were visited in reference to the sighting. All enquiries met with negative results.

(CONT'D ON PAGE TWO)

RE:	PAGE
U.F.O. Sighting	(2)

21 JUL 68

4. As per OPERATIONAL MANUAL CO-Air, paragraph 6, the following message was forwarded to Sydney Sub/Division:

- (a) 20 JUL 68 (Between 11:15PM and 12:30AM)
- (b) Clear
- (c) Lauchlin MACKINNON (45) Deepdale, Inv. Co., N.S.
- (d) Deepdale Road, Inv. Co., N.S.
- (e) John MACKINNON (22), Rose MACKINNON (24), Margaret MACKINNON (20) and Cst. C.M. CAMPBELL, R.C.M.P. Detachment, Inverness, N.S.
- (f) Appeared round, colour red, green and white. Gave off brilliant layers of different colours. Altitude approx. 8 to 10 thousand feet. When first sighted it was stationary. Moved North and stopped. Disappeared at approximately 12:30AM, 21 JUL 68 at terrific rate of speed.
- (g) Observed for approximately 1 hr. and 15 minutes.
- (h) Two U.F.O.'s first noticed, one was on the horizon, and one directly above the MACKINNON farm. Stated that the roof of the barn was lit up from the lights of the U.F.O. MACKINNON stated that he had noticed similar saucer shaped object near his farm some time ago.

5. It is the opinion of this writer that the source of this sighting seems quite reliable. None of the MACKINNON family were drinking at the time and they appeared sincere in relating their observations.

CONCLUDED HERE:

RE:
OBJET:

Sighting of U.F.O.
Amos, Que. - 27 JUL 68.

1. On this date, Mr. Laval Goulet, 72 - 10th Ave. East, Amos, Que., contacted this office reporting the sighting of a U.F.O.
2. The following details of the sighting were obtained from Goulet.
 - a) The U.F.O. was sighted on 27 JUL 68 between 10:00 P.M. and 10:30 P.M. D.S.T.
 - b) The sky condition was very clear, stars could be seen very clearly.
 - c) The observer was beside his house, at 72 - 10th ave. East, Amos, Que. when he sighted the U.F.O.
 - d) The U.F.O. was sighted due south in a due north direction, in a continuous movement, very fast and in a straight line.
 - e) The luminosity of the U.F.O. was compared to the morning star (Venus), of the same brightness, white light with the intensity of a flash and of a round shape.
 - f) The colour was white, with no persistent train or tail after passage of the U.F.O.
 - g) The size was round, approximately the size of a grapefruit.
 - h) The sighting lasted from 3 to 5 minutes.
 - i) There was no sound made by the U.F.O.
 - j) The U.F.O. travelled from due south to due north.
 - k) No other unusual observations were made by the observer.

3. The observer holds the position of Protonotary, Amos County Court, Amos, Que., and would appear to be a reliable person. This person in making comparison in luminosity with stars, appeared to have a good knowledge of astronomy.

4. Submitted for your information and unless otherwise instructed this file will be considered as shown hereunder.

CONCLUDED HERE.

UFO puts on brief show for third straight night

No explanation has been given for the unidentified flying object that appeared Monday for the third straight night near Mount Hays.

DOT worker Hans Wessel, who works night shift at the airport, said today he was on his way to work about midnight and was out in the harbor

when the object, which he said was extremely bright, came over the mountain, remained for 20 to 30 seconds, then slowly dropped and disappeared.

Wessel, who is also a photographer, said he couldn't attempt to photograph the object because he needed a powerful telephoto lens and lighting conditions were poor. He did, however, observe it through binoculars.

"It was so bright that being used to the dark it was very hard on my eyes," he said.

Wessel also added a new twist to the weather balloon theory.

"We take wind readings every hour, and Saturday night at the time of the sighting, the wind was northwest at eight miles an hour. Sunday they were northwest at five, so reports of seeing the object moving south would have to prove that it couldn't be a weather balloon, unless they are making them to travel against the wind those days."

Patti Greene said she was with seven or eight girls who sighted the object Saturday. She said it made no noise and was a bright orange with a red spot in the middle.

"It's amazing how many people believe that there could be such a thing as a UFO now that some people in Rupert have seen one," Wessel said.

L. A. Harrington, News Editor

TUESDAY, JULY 30, 1968

Unidentified flying object spotted near Mount Hays

What was the object floating about the sky near Mount Hays shortly after midnight Saturday and again Sunday night?

We'll probably never know, but it gave dozens of Rupertites a thrill when they reported seeing a bright light approaching from the southeast, hover over parts of the city for about 30 minutes, then shoot straight up in the air and disappear.

Something appeared again Sunday, but this time it was believed to be a weather balloon with a flare hanging below.

Well known athlete John Olsen saw it Saturday.

"We were on the Fulton street hill when the object was first sighted. It was approaching from the southeast very slowly," Olsen said.

"As the light moved closer we moved across the street to watch. It was near Mount Hays, but not as high as the mountain.

"It looked as bright as about seven or eight street lights. The first thing I thought of was a front landing light on a plane, but it was going too slow and not making any noise.

"At one point I saw a dome over top of the light, but this could have been a reflection on the clouds. It looked similar to the canopy on a parachute.

"I thought it was going to land behind Algoma Park, but it never did. When it got past the line of the dance hall it went straight up out of sight."

Mr. and Mrs. Art Hella, Mr. and Mrs. George Howe, Arnold Moen and several others were with Olsen and his wife, and all verified the sighting, and were equally mystified.

Howe told Olsen that he and his father, while on the fishing grounds, had had a similar experience several years ago, but kept it to themselves for fear of being laughed at.

After witnessing the object Saturday, Howe admitted the previous sighting.

Miss Sax Dudoward also told of seeing the object.

"I was near the hospital in a car and saw the light. I told my friend to look, but he couldn't see it so we got out and he saw it. We watched it for a little while and it started heading north, then went out of sight.

"It seemed to be a bright orange color and was just sort of floating in the air. I have seen them twice before, once last year and once this spring in the prairies. Last summer my sister saw a UFO (Unidentified Flying Object) in Port Simpson and it had 13 little UFOs come out of it and play around the larger object."

The Sunday night sighting was discounted by several off-duty policemen and other observers as a balloon with flare.

"You could see sparks coming off the flare as it was so low," said an anonymous sighter.

Was it teenagers playing pranks with helium filled balloons

and flares, or are the eyes of another world peering into our city?

Ask John Olsen or others that saw the object Saturday night. They are believers. Are you?

RE: OBJET:	UNIDENTIFIED FLYING OBJECT (3 sightings) Prince Rupert, B. C. 28 JULY 68 (ORG)
---------------	---

28 JULY 68

1. The first reported sighting was reported as occurring on the noted date and time. This following information received from an observer of this first sighting in compliance with operational Manual CO - AIR.

- A. Date and time of observation: 28 JUL 68, 12:10 AM
- B. Condition of sky: Low cloud.
- C. Observer: John OLSEN.
- D. Location of observation: Fulton St. and 5th Ave. W.
- E. Other observers at the time: Wilma OLSEN, Art and Carol HELIN, Jill and Annette LUSSIER, George and Betty HOWE, and Arnold MOEN. All of Prince Rupert.
- F. Round in shape, emitting bright light but not casting any extent of this light, altitude about 1,800 ft., travelling in north easterly direction. Only one object seen.
- G. Observed for about six minutes.
- H. There was no sound coming from the object that could be heard. Object appeared to disappear quickly.

2. The second sighting was seen by members of this office the same date as the first sighting with the following information being observed:

- A. Date and time of observation: 28 JUL 68, 11:20 PM.
- B. Condition of sky: Cloudy.
- C. Observer: Cst. K.E. ALLEN.
- D. Location of observation: Parkside Motel.
- E. Other observers at the time: Csts. D.W. BROWN, D.D. FERREL, and Aux. Csts. M. McLEOD, and A. STEEL.
- F. Round in shape, orange in colour, moved slowly in a westerly direction, one object seen, altitude about 4,300 ft.
- G. Observed for about 2 1/2 minutes.
- H. No sound could be heard from object. Object again appeared to disappear quickly.

6 AUG 68

N68/087

3. The third sighting was again seen by members of this office with the following information being observed:

- A. Date and time of observation: 6 AUG 68, 12:15 AM.
- B. Condition of sky: Partial cloud cover.
- C. Observer: Cst. D. M. DALZIEL.
- D. Location of observer: 6th Ave. East and Eberts St.
- E. Other observers at the time: Cst. H. GERRITS.
- F. Star-like in appearance but larger, orange in colour, altitude about 3,000 ft., two objects seen, one higher than other, hovered in one area.
- G. Observed for about 15 minutes.
- H. No sound could be heard from object. One object appeared to disappear quickly upward while the other moved southward slowly until out of sight.

4. The first observer, John OLSEN (BD: 17 JUL 43), is a school teacher in the Prince Rupert area; he appears to be of very good character, and quite reliable. The other observers are also quite responsible and reliable.

5. To date no further sightings reported.

CONCLUDED HERE:

(W.V. WILLIAMS) Sgt.
i/c Detachment.
C. O. 'E' VICTORIA

K.E. Allen 2/Cst.
(K.E. ALLEN), 25871
Prince Rupert City Det.

FORWARDED: 14 AUG. 68 in triplicate for your information.
Telexes PR1867 and PR1951 refer.

2. Attached also are three copies of newspaper clippings publicizing these sightings. Investigation conducted at Prince Rupert failed to reveal the origin of the flying objects.

CONCLUDED HERE:

Miss Anne Robillard
C.P.-122
St. Jovite, Quebec

Dear Miss

Your interesting letter has been forwarded to me from the Department of Defence.

I think the object you saw was undoubtedly a satellite. Currently there are ~~few~~ many satellites in the sky ~~that~~ ^{and} some may move much faster than others, and ~~some~~ seem to have a very irregular motion which is partly an optical effect. When I was observing the other night, I saw five different satellites in forty minutes, and these showed a great variety of speeds and types of motion.

Thank you for your interest in reporting your observations to us.

Sincerely yours,

Peter M. Millman
Head of Upper Atmosphere Research

Chere Mlle Robillard:

Votre interessante lettre m'est parvenue
par l'entremise du ministere de la defense.

Je crois que l'objet que vous avez vu est,
sans aucun doute, un satellite. Presentement, il y a plusieurs
satellites dans le ciel dont certains sont plus rapides les uns
que les autres, et ils semblent avoir un mouvement irregulier
qui n'est rien d'autre qu'une illusion optique. L'autre
soir, alors que je regardais le ciel, j'ai vu cinq differents
satellites en quarante minutes, et ces derniers demontraient
une grande variete de vitesse et de mouvement.

Merci de votre interet et du rapport de
votre observation.

Bien a vous,

Peter M. Millman
Head of Upper Atmosphere Research

Cher Monsieur,

1470-7 N 68 / 085

C. P. - 122,
St-Jovite, P. Q.
Mardi - 6 juillet 1968

Ce matin entre 1 h et 2 h, nous avons
observé un objet mystérieux dans le ciel de St-
Jovite.

Mon amie et moi étions assises
sur une balançoire au 3^e étage (sur une balan-
ce) en regardant le ciel. Il y avait beaucoup d'é-
toiles et quelques petits nuages très minces au
loin. Soudain, nous regardâmes, fut prise par
tout et j'ai vu un éclair point lumineux
qui brillait beaucoup. Il allait d'une vitesse
moyenne, trop lent pour une étoile filante,
trop vite pour un satellite et il avançait, après
1 minute, il donnait 3 coups, repartait et redon-
nait des coups. J'ai aperçu une et elle s'a-
vançait. Après un moment, elle (l'une) s'élança vers
la porte et dit, en criant, à mon amie Page: «
viens voir et elle aussi s'avance. À ce moment,
l'objet était à moitié chemin. Après 2 min.,
mon amie Page alla chercher sa robe de chambre.
Pendant ce temps, l'objet s'arrêta pendant
quelques secondes et sembla s'éteindre et disparu com-
plètement. Quand mon amie Page est revenue, l'ob-
jet n'était plus là. On est restée un mo-
ment pour voir si elle ou il revenait. Finalement
on est rentrée. Plus tard, dans la nuit, on
est sorties mais il ou elle n'était pas revenu.

P. S. Samedi, 6 juillet 68.

Mon amie et moi on était dans l'auto de mon amie Page
et on a entendu à la radio qu'un U.F.O. a
atterri à Joliette, mardi 5^e - et son pilote
a vu des petits êtres nus dans un fossé.

Lycette Boucher

Att: L'Officier Commandant. St-Jovite, P.2 - C.P. 122
Nade 30 juillet 1968

Cher Monsieur:

Le matin entre deux heures et 1 heure 1/2 nous avons vu un objet mystérieux dans le ciel de St-Jovite.

Nous avons eu nos moments intéressants le cas du U.F.O. ...

Surtout, ce matin, le hasard nous donna la chance d'en apercevoir un... après un léger repas, pris au cours d'un long bavardage de jeunes filles, nous avons voulu nous coucher... il faisait très chaud.

Nous sommes donc allés nous balancer sur la galerie au troisième étage. De là nous avons admiré la merveilleuse voûte étoilée.

Le qu'on pourrait appeler des nuages était presque rien... peut-être une petite fumée dissipée autour des étoiles.

Soudain Lyette s'exclama: "Et regarde là...!"

Un objet qui ressemblait plus ou moins à une grosse étoile et plus brillante, circulait sans se presser au milieu des étoiles, d'une façon curieuse.

Elle prenait un chemin en ligne droite pendant une minute, puis s'arrêtait (2.7.68) 2 secondes ou 3 au moins, et modifiant d'à peine plus d'un degré sa route et continuait le même manège.

Ce n'était pas une étoile plane car à ce qu'on sait, ces étoiles ne font pas de copu-brake toute les minutes... et ni un satellite, à moins qu'il n'ait le choc.

Si j'étais allée à l'extérieur et en alarmant la maison, ma tante a dû sortir pour m'empêcher de crier. Elle est sortie, a aperçu l'U.F.O, puis elle est rentrée pour chercher sa robe de chambre car elle y était.

L'objet a donc choisi ce temps pour retourner chez lui, c-à-d, qu'il s'est arrêté et puis parti verticalement, en donnant l'impression qu'elle (m.f.) disparaissait.

Une chose que j'ai remarquée c'est cet objet sembla nous voir, à croire qu'il disparaît pour l'échapper à notre attention.

Nous sommes restés pour voir si il reviendrait, mais en vain... nous sommes ressorties au cas... plus rien du tout.

Yvonne Lefebvre

Act. Commanding Officer

Dear Sir

The morning between 1.30 and 2.00 A.M., we saw a mysterious object in the sky of St. Fort.

My girlfriend and I were sitting on a swing at the 3rd story (on a balcony) watching the sky. There were many stars and few the clouds in the distance. Suddenly, my eyes were caught by a big bright, luminous point. It was going at average speed, too slow for a falling star, too fast for a satellite. It was advancing, after a minute, was giving two shots, start again, and give more shot. I told Anne and she saw it. After a while, she started to the door and told Mrs. Papi to come to see it.

and she did. At that time, the object was
half way. After two minutes, Mrs. Page went
to get her housecoat. During that time, the
object stopped for a second, seemed to go out,
then disappeared completely. When Mrs. Page came
back, the object was not there any more. We
waited for a while to see if it would come
back. Finally we went in. Later, Anne and I
went out, but it had not come back.

P.S. Saturday July 6, 1968.

Anne and I were in Mr. Page's car when we
heard on the radio that a U.F.O. had landed in
Joliette, Tuesday July 2, and that a policeman had
found a little man, naked, in a ditch.

Lyette Bastien.

C.H. Commanding Officer

San Lu.

The morning between 1:30 & 2:00 A.M., we saw a mysterious object in the sky of St. Jovite.

My friend and I are quite interested in U.F.O. Luckily, this morning fate gave us a chance to see one. After a light meal, taking a long walk, we wanted to go to bed, but it was very hot.

So we went outside sitting on the veranda of the third floor. From there, we admired the sky.

What could have been called cloud was almost nil, only a bit of haze around the stars.

Suddenly, Lyette shouted: "Look" an object that looked like a big star, but brighter.

was moving without haste though the star
in a strange fashion it was going straight
for a minute, then stopped for 2 or 3 sec., modified
its course by about a degree and started again.

It could not be a falling star because, as
we know, these stars don't take a coffee-break
every minute nor a satellite unless it had
the "hiccup".

I went inside to warn the household, my
aunt came to stop me from screaming. She
came out, saw the UFO and went back inside to
get her housecoat because she was cold.

The object picked that time to go back
home that is, it stopped and went up vertically,
giving us the impression that it was

disappearing.

Something I did notice was that the object seemed to see us, so that it may have disappeared to escape our attention.

We waited to see if it would come back, but in vain, it never came back.

Mr. Harrit
45 Fourth Avenue
Roxboro, Montreal, P.Q.

Dear Mr. Harrit:

At this time of year several of the many artificial satellites now circling the earth may be seen at night. They are sufficiently high above the earth that they are in the sunlight, for we can see them only by reflected sunlight just as in the case of our own moon. Many of them are as bright as the brightest stars and they take from 5 to 15 minutes to travel across the sky.

One of my colleagues mentioned that while at his summer cottage recently, he counted 5 satellites in 40 minutes.

It is also possible that some of the lights crossing the sky are high-flying jet aircraft. Many of them can fly at heights of 6 miles above the earth - so high that their sound is almost impossible to hear and also so high that they appear to be moving very slowly.

We have put your reports on our files, and I hope that this further information will be of use to you.

Yours sincerely,

RE:
OBJET

William PROCHNER - Report of Unidentified Flying Object
Qu'appelle, Dist., Sask. 4 AUG 68.

9 AUG 68

1. PROCHNER contacted this office in person and advised that he wished to report a sighting of a "flying saucer". According to PROCHNER, he had observed a U.F.O. at approx. 4:00 am on the 4 AUG 68, however, due to the nature of this complaint, he failed to report it immediately. Prior to reporting this incident he had noticed some unusual marks in his pasture near the barn. He had not noticed these marks before and he felt that they were connected with the sighting of the U.F.O. Cpl. R.D. Anderson and I, along with Cst. Casady of the Regina Identification Section, patrolled to the scene to examine the marks.

2. On examining these marks, they were found to be circular in shape. The diameter of these circles varied from 4 1/2 feet to 5 feet. These circles were noted to be clear of grass except for the center 2 feet. Six of these marks were found, three of them well pronounced. Four of the marks appeared to be in a square pattern, however, on measuring them, it was found that no real pattern existed. PROCHNER stated that the U.F.O. had been observed above that point. Because of several rain storms, the marks were found to be obliterated to a point. PROCHNER was questioned regarding these marks but he was unable to supply an authentic explanation.

3. The U.F.O. was sighted by Kenneth PROCHNER, William PROCHNER, and Julius PROCHNER, all of Qu'appelle, Sask. Further to telex #R1448, statements have been obtained from the aforementioned persons and are being embodied here.

4. STATEMENT OF Kenneth PROCHNER (Re: U.F.O.)
of Qu'appelle Dist., Sask. 3:30 pm 10 AUG 68.

BEGINS: At approx. 4:15 a.m. of the 4 AUG 68 I had just drove into the drive-way of my home. As I drove up near the house I noticed an illuminated object hovering above the house. The object was of circular shape and moved in an oval shape about 100 feet above the house. I got out of my car and ran to the house but the door was locked so I went back to my car and watched the object. I backed the car up about 40 feet and sat there for about 10 minutes. I ran back to the house and kicked the door open. I then ran upstairs and woke my father up. He did not believe me but got up to look. I stayed upstairs for a couple minutes then joined my father outside. By this time when I saw/again it was above the barn but it was quite a bit lower. The object seemed to move away then come back. The object did not send out any light rays. There was no noise coming from the object. I watched the object for a few minutes while it was over the barn and then went into the house to bed.

(CONT'D ON PAGE TWO:)

RE
OBJET

William PROCHNER

68P 700-
68RS 700-
68IH 700-2

PAGE

TWO

(CONT'D FROM PAGE ONE)

It was still quite dark when I saw this object. It was a cloudy evening with a new moon. When the object was above the barn I saw it move about 100 feet to the right and stop for 15 seconds, then return to the barn. The object moved very quickly.

ENDS: Wit: H. Curry

Sgd: Ken PROCHNER.

5. This is the statement of William PROCHNER of Qu'Appelle, Sask.
DB: 21 AUG 22. Taken 6:50 pm 9 AUG 68.

BEGINS: Approx. 4:00 a.m. on the 4 AUG 68 my son, Kenneth, came upstairs and told me that there was a funny light outside - going around and around and that he wasn't going outside again. I got up and walked outside. As soon as I stepped outside, I saw a round-shaped object hovering over the barn. It continued spinning there and my son and I watched it for approx. one minute. It then moved to the southeast for approx. 100 feet and began to hover again. I watched it for another minute and then left. It appeared as if it was moving away and since I couldn't do anything about it, I went back inside the house.

My house is situated on NW9-14-19 W2nd and is approx. 1½ miles south of Qu'Appelle, Sask. In the farmyard, the barn is situated approx. 150 yards northeast of my house.

The object appeared to be quite large but I could not see the whole object. It was still dark at the time and all I could see is lights that appeared to be revolving around. I could not see the origin of the light but it was evolving from the bottom of the object. From the angle at which I was watching it, it appeared as if the whole bottom was illuminating light. I can't recall what colour the light was but it did not appear very strong. When the object was hovering over the barn, it was approx. 30 feet above the barn. I could not see any light on the barn or on the ground. All I could tell was that it was spinning quite rapidly. When the object moved away from the barn, it moved very quickly--a lot faster than it was spinning. It was just a split second in moving from one position to the next. The object seemed to come out of its spin, fly to the next position and then begin to spin again. I don't think that the object was spinning at all when it moved to the southeast of the barn.

ENDS: Wit: Cst. F.W. Pushka

Sgd: Wm. PROCHNER.

6. This is the Statement of Julius PROCHNER of Qu'Appelle, Sask.
DB: 23 AUG 89. Taken 7:30 pm 9 AUG 68.

BEGINS: Approx. 4:00 am on the 4 AUG 68 I heard my son William and his son Kenneth walking downstairs. I got up and found them at the door of the house. As soon as I walked out, I saw an object hovering over the barn. It seemed quite large -- maybe 25-30 feet across. The bottom of this object was all lit up and I could see that it was revolving quite quickly. The object was hovering at approx. twice the height of the barn. The light coming from the object was quite dull and I did not see

(CONT'D ON PAGE THREE:)

RE
OBJET.

William PROCHNER

68F 700-
68RS 700-
68IH 700-2

PAGE

THREE

(CONT'D FROM PAGE TWO:)

AND I DID NOT SEE any light cast on the ground or the barn. The light didn't appear white but rather a dull orange colour. The object appeared to be round-shaped but I could not see what the top of the object looked like.

The object hovered over the barn for approx. one minute. It seemed to stop spinning and very quickly it flew to the southeast of the barn. It flew approx. 50 feet, stopped, and then began to spin around again. I don't think that the object was spinning when it moved from one position to the other. I could not tell if the bottom of the object was flat, all I could see were the lights.

The object was still hovering in the yard when I left and went back into the house. I have never seen anything like it before or since this incident. ENDS:

Wit: Cst. F.W. Pushka

Sgd: Julius PROCHNER.

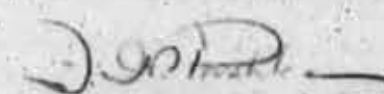

7. These three persons appeared to be sincere when divulging this information and since neither of them have anything to gain as a result of publicity, it is felt that they could be considered reliable.

8. Subsequent investigations in the surrounding area uncovered information regarding an unusual noise. Elizabeth (Mrs. Anton) EBERTS advised that approx. 4:00 a.m. on the date in question she had heard a noise resembling a whirling or whining sound. EBERTS looked out the window but was unable to see anything. The EBERTS farm is located approx. 1/2 mile to the northeast of the PROCHNER farm. Other inquiries in the surrounding district were non-resultant.

9. Reference to telex #R1448, the Meteorological Office at Regina, Saskatchewan advised that the following conditions existed on the 4-AUG-68 in the Regina area. The skies were cloudy with lightning and thunder. The rain commenced at approx. 2:30 a.m. and continued until approx. 3:30 a.m. The lightning started at 2:30 a.m. and continued until 4:55 a.m.

10. The investigation having been completed at this point, this file is being concluded.

CONCLUDED HERE:

(R.D.A.) Cpl.
i-c Det.

(F.W. Pushka) 23275 Cst.
Indian Head Detachment.

C.O. "F" REGINA.

Fwd 15-8-68. Telex R 1448 refers. No photographs or diagrams were made of the marks mentioned in para 2 as it was felt that they were of no significance to this event. Extra copies of this report are attached.

SHELburne, N. S., August 16th, 1968

UNIDENTIFIED MOVING OBJECT OR OBJECTS IN SKY: CONTINUED.

August 15th. Nightfall Thursday.

When it became obvious to me that object appeared to remain stationery in the sky in a direction South West from my observation point and perhaps twenty miles away or more, I established contact with the person on duty at the Air Force Station in Baccaro and reported the incidents to him which I have here related.

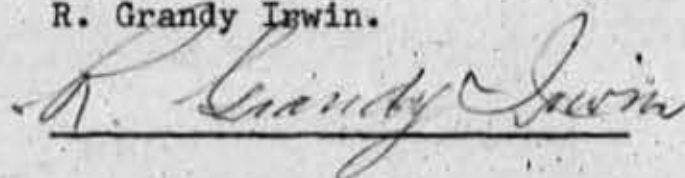

The report was made by me purely in the interest of our National Security and for no other purpose and it may be accepted by the Defence Department for what it is worth.

I do feel however that it might be well to have the area in the vicinity of Harper's Lake carefully observed in daylight, as that would be a most likely place for an uninvited visitor to seek sanctuary during the daylight hours.

There are no longer any inhabitants living in that vicinity and people rarely go there these days.

This is of course just my personal opinion and a very very long shot, at that. If it is considered as being unworthy of notice and you may confine it to the limbo of unwanted speculative reasoning.

R. Grandy Irwin.

N68/096

SHELBURNE, N. S., August 16 1968

THE REPORT OF AN UNIDENTIFIED MOVING OBJECT OR OBJECTS AS SEEN IN THE SKY AT NIGHT TIME BY R. GRANDY IRWIN ON THE DATES AS LISTED FROM THE OBSERVATION POINT OF THE WESTERN VERANDA OF HIS RESIDENCE IN SHELBURNE AT THE CORNER OF WATER STREET AND ST. PATRICKS LANE.

August 12th 9.45 P. M.

While witnessing the departure of twilight from the vantage point of my veranda steps on the Western side of my residence in Shelburne at the Corner of Water Street and St. Patricks Lane and while observing the appearance of night-fall and the appearance of the first stars of the night, I observed the first star to appear to my vision was the Evening Star in a direction slightly North of West and at an angle of approximately 40 degrees above the horizon. I also observed a lesser star at an angle of approximately 35 degrees above the horizon and about 5 degrees to the right of the Evening Star.

Suddenly a light appeared between the two stars mentioned. It had the appearance of being another star and was fully as bright as the Evening Star and it was in motion at the precise time of its appearance and it quickly gave the appearance of passing between the two stars already mentioned and it proceeded in a South Westerly direction. There was no sound and the night was calm. The object left no vapor trail or other residue to mark its progress. I call to my wife who was home at the time to come and witness this unusual sight but she was watching television and did not hear me call and I was regretfully compelled to witness this happening alone.

The object was proceeding at an enormous speed and veered first to the left and then to the right at very sharp angles of approximately 45 degrees at each change of direction. These changes of direction were instantaneous and required no discernable lapse of time. It appeared to change direction about six times but always remained on its general course toward the South West, where it disappeared from my vision. Whether its disappearance was by reason of the great distance it had travelled or whether the light had been extinguished by mechanical means, it is impossible for me to say. The elapsed time from the time of sighting until the time of its disappearance, I would carefully estimate to have been ten seconds.

R. Grandy Irwin.

N68 / 097

SHELBURNE, N. S., August 16 1968

UNIDENTIFIED MOVING OBJECTS IN SKY : CONTINUED.

August 13th--Tuesday-- Nightfall.

Observed Western sky in the direction of the Evening Star. Sky was clear of clouds and many stars plainly visible. No unusual movement of any solid object. Contrails of vapor clearly visible criss crossing in area where previous night's initial sighting occurred. Probably an indication that Jets had recently reconnoitered the area. These contrails were quickly dissipated by a mild drift of air from the North West which carried them away to the South East.

August 14th--Wednesday Nightfall.

Sky in this locality overcast. Nothing observed.

August 15th. Nightfall. Thursday.

Witnessed the appearance of the Evening Star in the West about 40 degrees above the horizon and also a lesser star slightly to the right and slightly lower toward the horizon. Suddenly a bright light resembling a star appeared between the two stars already mentioned. This light was of a brightness and intensity as that of the Evening Star but having a slightly orange color. This object was moving in a South Westerly direction very steadily and at a leisurely rate of speed, comparable to the light from a slow moving plane. I called my wife who observed the object which was clearly visible to her. I observed the object without visual aid and also with my binoculars which have a power of 7 x 35. This object also passed in a line which appeared to pass mid way between the Evening Star and the lesser star already mentioned and along to the South West, very slowly and steadily straight on its course. At the end of about ten minutes it appeared to become motionless where it remained for the next two hours, after which I discontinued my observations.

RE:
OBJET:

UNIDENTIFIED FLYING OBJECTS.
Fort Smith, N.W.T. - 16 JUL 68.

17 JUL 68

1. Word was received this date that three local women observed what they believed, was an U.F.O. in the early a.m. of the 16 JUL 68. As a result of interviews with the three persons, the following information was obtained.

- (a) Date and time of sighting: Approx. 12:15 am - 16 JUL 68.
- (b) Condition of Sky: Scattered cloud.
- (c) Identification of observer: Yvonne (Mrs. John) BOSTON.
- (d) Location of observer at time of sighting: Fort Smith, N.W.T.
- (e) Identification of other persons sighting:
 - 1. Francis (Mrs. George) FILIATRAULT, Fort Smith, N.W.T.
 - 2. Molly (Mrs. Merton) MOHR, Fort Smith, N.W.T.
- (f) Description of sighting: The UFO is described by all persons sighting, as round in shape and luminous white in color. The UFO appeared to be travelling very high in the sky and very rapidly. In relation to Jet Planes which travel over this area, the UFO appeared to be travelling much faster. All persons agree that the UFO was travelling in a slight rising arc from South to North.
- (g) Duration of sighting: 4 to 5 seconds.
- (h) Other relevant information: The persons sighting further stated that the UFO was very bright, even though it travelled behind clouds present in the sky. Two of the observers stated that there was a vapour trail present after the UFO had passed. All were together in the same vehicle parked in the driveway at MOHR'S residence. All agree that the UFO did not resemble a falling star or fire ball. There was no noise at any time during or after the sighting.

2. The source of the sighting in this instance is considered very reliable. All the persons concerned are known members of this detachment, and are considered not the type to invent or imagine the sighting described.

CONCLUDED HERE.

RE:
OBJET:

Unidentified Flying Objects
Sighting of - Springhill Dist. N.S.
(15-8-68).

SP 11 78

19 AUG 68

1. On the P.M. of this date, Mr. and Mrs. Richard A. SKEWES and baby sitter, Miss Gail YEMM were interviewed, and the following statements obtained separately:

Statement of Richard A. (Dick) SKEWES,
217 Sanatorium Rd., Hamilton, Ont.

"I was on the Trans Canada Highway #4 between Truro and Springhill Nova Scotia, I believe I was about 4-5 minutes North of River Philip, Time approx. 2400-0100 when I went up a grade (good, well-marked hwy) and around a corner to the left when I noticed to my right a group of some type of aircraft (unconventional) as far as I could see) hovering at approx. 100 ft. over the trees also to my left I could see another craft approaching at a tremendous speed from about 5-6 miles away angle of sight about 25-30° as I came nearer the centre of this activity one of the forementioned craft broke away from the group moved over the hwy. in front of me and began a slow descent of about 60°. I was sure we would be on a collision course. I slowed to a crawl but feared to stop. I turned the radio off and put my head out the window could not hear a sound a distinct outline of this vehicle was obscured by the series of rapidly & brilliantly flashing lights on the craft the lights were extremely unconventional unlike any I had ever seen. When the closing craft was about 40-50 ft away at I would say 35-40 ft high it suddenly veared up and disappeared in the distance behind me. The group which was to my right was still visible to me in the mirrors until I was too far away (that is to say to my knowledge they were still hovering in the same area and circling at the same time.

R.A.Skewes".

Wit: R.I.Evans, Sgt.

Statement of Mrs. Richard A. (Ann Marie) SKEWES,
217 Sanatorium Rd., Hamilton, Ont.

"I feel that the time was closer to 11 P.M. on Thursday, August 15th. We left Halifax at 9:15 P.M. and maintained a steady 60 m.p.h. average until our first stop after Moncton. My first reaction on seeing the aircraft was that they must be spraying a fire out since they are so low, so numerous, and so well lit up! But they travelled in such close proximity that I couldn't understand how they did not collide. They appeared to me to be covered with (mostly) yellow and green (?) lights, and I counted at least five before one appeared over

..../2

68-400-149 (Ham.)

22 AUG 68

CONTINUED FROM PAGE ONE

the highway in front of us, heading directly for us. I was positive it was going to land and collide with us. Dick slowed the car right down but there seemed to me to be no way of missing a collision. I prayed hard!!! I think I was too frightened to even scream! It reared up just in time passed right over the car and back over the trees to our right. I watched it out the window and for the first time saw an outline other than the mass of lights. It was dark in colour with what looked like white dots all over it. It reminded me of the World War II plane on display in front of the CNE grounds. After we reached the end of that straight stretch of highway and rounded the corner we lost sight of the craft since they were so low. My last impression was of a light in the sky that Gail and I saw directly over the area where the craft were flying. Gail and I both wondered what the light was caused by since it was very dark out and the moon was in front of us. I would sleep comfortably again if someone could explain to me what the craft were and what they were doing!

Witnessed by
R.I. Evans Sgt.

Anne Marie Skewes"

Statement of Gail YEMM, age 17 yrs.,
630 West 5th St., Hamilton, Ont.

"On the late PM of Aug. 15, 1968 I was travelling with Mr. and Mrs. Richard A. SKEWES via private car from Halifax to Springhill, N.S. Somewhere between Springhill and Truro, N.S., I saw 5 or 6 objects which I thought were airplanes hovering just above the trees, maybe 50 feet or so. It was too dark to see the color of these planes and all I can remember is there were a lot of lights. The only one I can remember is a yellow one, it appeared to be at the front and bigger than the rest. We slowed down and one passed in front of us and this is the one I thought was going to hit us. We did not stop nor could I hear any sounds from these objects. As I thought these were airplanes, I did not pay too much attention to them. It was just the yellow light I could remember best. When I glanced at it first I thought of a flying saucer then after I thought I could see wings without lights so thought nothing more about it.

"At approx. 11:00 PM - Aug. 17th we were passing Toronto and Mrs. SKEWES asked me what I thought those objects were we had seen on Thursday night. I told her airplanes, she then asked what I thought they were doing. I replied, "Possibly checking for a forest fire". This was the first time the subject had been brought up. Then on Monday Mrs. SKEWES telephoned me advising she had phoned the D.N.D. and the R.C.M.P.

Q. Do you think these were flying saucers?

.... /3

CONTINUED FROM PAGE TWO

A. I don't know. I seems funny there were so many and yet we couldn't hear them.

Q. Could they have been helicopters?

A. I don't think so. The window was open and we couldn't hear them. Helicopters make a lot of noise and these were real close.

Q. How many do you think there were all together?

A. There were 5 or 6.

Q. How long did you see them?

A. Between 5 and 10 minutes. We could see them for quite a ways before passing under. I did not look back.

Q. Were you scared of them?

A. No. Not until Toronto when we started talking about them.

Witnessed
R.I.Evans, Sgt.

Gail Yemm"

2. Mr. R. A. SKEWES has served three years in the Royal Canadian Navy and advised that 50% of his job was identifying objects from the lookout position. He has never seen anything like this, and with the one coming so close to his auto he was very frightened. He advised he did not discuss this event with the other occupants of the car as he did not want to upset them. He was discharged (Honourable) from the navy approx. 4 years ago.

3. The people interviewed are sincere about this matter, and it has them very confused at the present time. Mr. SKEWES at first did not want anything mentioned about this sighting as people would think him mental. However, after discussing it with his wife and baby-sitter, he felt it only proper that the matter be brought to the attention of the authorities for their information.

4. Mr. and Mrs. SKEWES and Miss YEMM are intelligent people and discussed this matter fully. They would appreciate having a reply on this matter to ease their minds.

CONCLUDED HERE.

(E.A.H.) S/Sgt.,
i/c Hamilton Det.

Sgt.
(R. I. EVANS) # 17106
Hamilton Detachment.

68-0-400-59

THE COMMISSIONER, OTTAWA

Re: Unidentified Flying Objects
Sighting of - Springhill Dist. N.S.
15-8-68.

FORWARDED for your information, together with copies of Hamilton Detachment initial report dated 21-8-68.

2. In view of the time lapse, it was not considered that a telex would serve any useful purpose. It would appear that the three observers are reliable individuals, and while they had ample opportunity to discuss the sightings, their stories do have certain discrepancies.

3. If these sightings are found to have a reasonable explanation, it would be appreciated if we could be advised accordingly for the information of the complainant.

4. As no further action can be taken at this time, we are concluding our file.

CONCLUDED HERE:

TORONTO
26-8-68

RE:
OBJET:

Unidentified Flying Objects
Sighting of - Springhill Dist. N.S.
(15-8-68).

SEP 11 '68

19 AUG 68

1. On the above date, Mrs. Richard A. (Ann Marie) SKEWES telephoned this office advising that her husband and her, accompanied by their baby sitter, Miss Gail YEMM, were returning to Hamilton, Ont. from Truro, N.S. when they saw 5 to 7 Unidentified Flying Objects. The following information was obtained as per O.P. Manual CO-AIR

- (a) 11:30 PM - 15 AUG 68
- (b) Clear
- (c) Mrs. Richard A. SKEWES, Age 29,
217 Sanatorium Rd.,
Hamilton, Ont.
Phone 388-1936.
- (d) Approx. 20-25 minutes driving time east of
Springhill, N.S. on #4 Highway.
- (e) Richard A. SKEWES, Age 25
Miss Gail YEMM, age 17
- (f) Approx. 20 ft. long. Depth 6 ft. to 10 ft.
Long and narrow. Dark color with spots.
Numerous lights, mainly yellow and decorated as
bright as a Christmas tree. Flying 30 to 50 ft.
above the ground. These objects circled around
several times in an irrational manner and one passed
over their vehicle. The SKEWES did not stop their
car as they were too scared, however could not hear
any sound from these objects. These objects were
cutting in and out and appeared to manoeuvre easily.
- (g) 5 minutes.
- (h) All members saw these objects and thought one would
hit them.

2. Due to the time lapse since this sighting, no telex message has been sent to N.R.C. Meteor Centre or elsewhere.

3. Arrangements have been made to interview these people and to obtain statements, also to get a more definite location of this sighting.

4. Mrs. SKEWES appeared to be very sincere about this matter and after they returned home, they discussed the event. It was after this they decided it should be reported.

RE:
OBJET:

**James Harrold CAMPBELL - Sighting of Unidentified Object.
R.N. of Shoal Lake, Man. 5-8-68.**

- a) Sighted on 5 August 1968 at 9:20 PM. CAMPBELL reported sighting on the 6th August 68. A detailed report was received on the 13th August 1968.
- b) The sky was very heavily clouded at the time of the sighting. CAMPBELL was flying below the ceiling. Visibility was approximately ten miles.
- c) The observer was identified as: James Harrold CAMPBELL,
259-1st. Street,
Brandon, Man.
- d) The observer was located 7 to 8 miles S.W. of Oakburn, Man., when he sighted the U.F.O. The object was approximately 1 mile west of CAMPBELL at this time.
- e) Another observer of the U.F.O. was CAMPBELL'S son Karry CAMPBELL, of the same address.
- f) There was only one U.F.O. sighted at this time. It resembled an object, being approximately 50 feet across and about 10 feet thick. The object was brilliant orange and did not look like it was burning. The object seemed to hover in one spot and then it moved off quite quickly to the west. CAMPBELL was flying at 1000 feet off the ground and sighted the object at the same altitude as he was flying.
- g) CAMPBELL and his son saw the object for a good 5 minutes and possibly close to 10 minutes. The object then headed due west, disappeared possibly going through a cloud then reappeared and then went out of sight.
- h) This is the first U.F.O. that CAMPBELL has seen. He has been flying for six months and does not wear glasses. The object seemed to be hovering over a field when it was first observed. CAMPBELL could not tell what the object was powered by. CAMPBELL estimated the distances by road allowances.

CONCLUDED HERE:

Mrs. A. H. Mellanby
98 South Bend Road East
Hamilton, Ontario

Dear Mrs. Mellanby:

Your letter of September 12 has been passed to me for reply.

Without more detailed information concerning the various objects which you have seen in the sky, it is very difficult to say exactly what they were. Your description tallies very well with the general appearance of certain times of experimental balloons and, as you know, these very often are sent up on a regular schedule. Just recently it was announced in the United States that many of the sightings made a couple of years ago were of a scientific balloon project which could not be announced to the public at that time.

Although we cannot always tell you exactly what has appeared in the sky, I can assure you that you need have no worry about any danger to Canadian citizens from these objects. In over thirty-five years of making records and of studying things seen in the sky, I have yet to see any evidence for objects operated by unfriendly intelligences over Canada either from outer space or from other nations. If such were present, you can be quite sure that both the Canadian and American Governments would take action.

Very sincerely yours,

Peter M. Millman
Head of Upper Atmosphere Research

PMM/vm

Malton Confirms Oakville UFO Sighting

OAKVILLE — A flying saucer was reported three miles off Oakville lakeshore early this morning.

The UFO sighting was confirmed by an Oakville policeman and by the control tower of Toronto International Airport.

THE POLICEMAN saw an object in the sky off the end of Dunn Street. It was encircled with lights and had

green and orange flashing lights on top.

Flight observers at Malton confirmed seeing the lights, though the object did not appear on radar scanners.

The airfield observers, unable to explain what the object was, agreed the UFO was visible from the tower and that it did not move.

Const. Dennis Kaye said he watched the lights for more

than 20 minutes. The UFO, 1,000 feet above the water, had a circle of white lights. It appeared that the flashing green and orange light came from one source. It was not individual red and green lights as seen on an aircraft.

THE AIRFIELD observers watched the object through high-powered binoculars for almost 45 minutes. It sudden-

ly disappeared at daybreak they said.

"We get two or three sightings of UFOs reported here every week, with varying degrees of credibility," an airport official said. "This one appears to have been seen by some pretty knowledgeable and believable people. I really don't know what the object could have been."

The observers estimated the UFO's altitude to be about 3,

000 feet over Lake Ontario. It remained motionless during their observation.

Const. Kaye was forced to give up his observation of the UFO to investigate a report of a prowler.

Lakefront citizens also reported the object.

A number of sightings of objects similar to today's UFO have been reported on the Lake Ontario waterfront this year.

File No.
Chg'd. to

Dear Sirs:

I am attaching herewith a clipping which appeared in the Hamilton Spectator of August 29th 1968 which is self explanatory.

I am writing to you as I watched this U.F.O. on this particular night. I have seen this same sparking light in the sky practically every night since. This light moves from the northern part of the sky towards the south and appears in the sky about 11:00 p.m. each night.

There is also another light which appears in the sky to the west and moves in a westerly direction every clear night. This light appears in the sky (sparks red and green) each evening as soon as it gets dark. It shows before any of the stars. I have watched this and think it must be there when it is light but it cannot be seen until darkness falls.

These two sparking objects appear in the sky at the same time. They seem to jump around as they continue to move out of the range of the binoculars, however it takes hours for them to cross the sky.

I live on the mountain in Hamilton where I have a very clear expanse of sky to view, however, I have a friend in Burlington who is also watching this unidentified object from his home.

My reason for writing you is that many people in Hamilton have seen these strange lights and I think it is time we knew what they were. These are not stars, not planes, if they are satellites or weather balloons I don't think they would appear at the same time and move in the same direction, therefore it makes me wonder if we in Canada are being surveyed by some foreign power.

Maybe the government know what these objects are, if so I think we should be told. If the government do not know what they are I think it is time they spent some money to investigate these, and then the Canadian people should be informed of their findings.

In closing I wish to advise I am alarmed that something unknown is allowed to hover over Hamilton and vicinity and in the interests of the defence of Canada I hope your department or some other department of the government will be interested enough to investigate these sightings.

Yours truly,

Evelyn Mellanby
(Mrs.) A. H. Mellanby

Mrs. M. R. Pritchard
Sherwood Inn
Glen Orchard P.O.
Muskoka, Ontario

Dear Mrs. Pritchard:

Thank you for sending along your observations. I am afraid I haven't much to offer by way of explanation of them. The noise and smoke trail may have been only coincidentally connected. The trail may have been a jet trail which was oriented in such a way that it reflected an unusually large amount of moonlight making it appear very bright and hence very close. Distance can be very deceiving; since we tend to judge distance by size, when we really don't know size, then it becomes impossible to judge distances.

However, this is merely speculation on possible simple explanations and I have nothing certain to offer.

Thank you again for your observations.

Yours sincerely,

B. A. McIntosh

May 9, 1968

Buds just appearing on trees. - Very bright moonlight. Visibility excellent. No wind.

1:00 A.M.

Put dog out - waited for her, because of high pitched rhythmic metallic sound. Didn't think of U.F.O., just instinctively didn't like it. There seemed to be a glow in the sky behind the escarpment - but the moonlight was so bright that one couldn't be sure.

Approximately

1:05 - 1:08 A.M.

Brought dog in - put her to bed - walked to living room - turned off T. V. - walked to window facing West to take last look at moon - saw smoke trail - so unusual - called husband to look.

Smoke Trail:

Appeared from West - skimmed over escarpment (approx. 35 feet high) past garage, towards house - which is 200 yards away. Dipped down over small valley between house and garage - went straight up to miss trees at bed-room end of house. (These trees approx. 50 feet high) curved around back of house and disappeared over 45 foot birch tree, travelling North.

The trail was single and approx. 10 to 12 inches in diameter over escarpment. Right side cut in over road (which passes in front of garage) - but for entire course trail wasn't working properly.

This is the way it looked:

There being no wind, the whole thing didn't start to break up until 1:50 A. M. At 2:00 A. M. the regular jet went over but couldn't see it, which impresses on me, that had there been noise connected with smoke trail, our house would have been rocked and all the windows smashed, it was that close. Also, "what-ever" must have been down and in trouble when I heard the noise.

One guest at the Inn, (which is approximately 250 to 300 yards from the house) heard prowling at 1:00 A. M. and what sounded like someone bouncing a ball.

September 9th, 1968

Mr. Bruce A. McIntosh
National Research Council of Canada
Upper Atmosphere Research Section
Ottawa 7, Ontario

Dear Mr. McIntosh:

My apologies for not having written sooner. My neglect has not been for lack of interest or not wanting to speak out. We have had a very busy summer.

Not being a good judge of distance or heights, the figures I quote are our yardman's, not mine.

Several people in this area have seen different coloured flashing objects. Among those, one of our bell-hops, Robert Dullien, who saw two "some things" the first week in August. He thought that they were satellites until they started manoeuvring and changing colour.

If it is at all possible, Mr. McIntosh, I would be very pleased to hear your ideas and speculations on what my husband and I saw and what I heard.

Sincerely yours,

Mary R. Pritchard

Canadian U.F.O. Research,
204 Church St.,
Oshawa - Ontario,

Chief of Defence Staff,
Department of Defence,
Ottawa, Ontario,

Referred to	10/DRB
File No	38700-10-1
Chg'd. to	

Dear Sir,

I believe it is only proper,
for the Canadian Government to know
the following information.

First of all in the fall of 1967 two
objects appeared in the evening sky
one to the south east and one in the
north west about 170° apart. My study
of these two objects from the fall
of 1967 to the spring of this year
when they disappeared, shows that
both objects were in a synchronous
orbit with the earth. Now then due
to this one fact I believed the objects
to be Communication Satellites of the U.S.A.,
However when I requested the names
of objects from N.A.S.A. in Washington I
was told that two satellites were

(2.)

launched over the South Atlantic but were at an altitude of 22,300 miles by Communications Satellite Corporation. Making a check with them Mr. Jerry Hastings Senior Information Officer told me the same information. So if it is impossible to see these two Satellites with the naked eye! The question remains what were they? Both objects were 10 times as bright as Venus and in a synchronous orbit with the earth. The only thing I can suggest is a couple of space stations maybe U.S.S.R. I must make clear that these two objects do not fit the right pattern to be U.F.O.

Speaking of U.F.O. I must admit that I agree with DR. James McDonald and say also that I believe that U.F.O did cause the black out of 1964 in Canada and the U.S.A. I must say that in dealing with U.F.O. we must keep in mind, that we are dealing with matter and anti-matter objects. This is why I think that the neutron generator should not be dropped.

(13.)

It is true that the generator is costly
how ever what we will learn
from it inregards to anti-matter
makes it worth while building.
This country is makeing a very bad
mistake by dropping the Nutron generator
project!

Yours Truly

Mr. Donald W. Golding

R. Leo Sprinkle PH.D.

Dear Sir.

received your report today, Very Interesting.

In october 30 at approx 6 PM at a line approx along top of Lake Erie or running from trenton Mich. toward New Boston or as i look at a car Compass N.W line. I saw a broad bright object coming out of the sky at approx 12 toward 5 o clock. and then it steaddied along a line of edison wires toward approx 35 foot high at about 300 ft away the wires were from me. I with permission of the Garage store (tires) I had my car called the U.S. Navy and they had me hold line and got a check on it. IT WAS A BIG ONE. Then it went along up street and I got Gas we could still see it. it had gotten bright then dim. well LATER IT GOT BRIGHT AGAIN. Oct 31 I saw another for an hour and it was somewhat snow flake shape then finally got dimmer. twice since in evening Ive seen them, also twice in morning PLUS one morning at work I saw one on a N.W. Course from detroit towards toledo. this will note, that ive seen this regular on and off. as i use ford gate 10. just have to look up. twice also have seen in morning at 4 am time section over canada near the new being built Windsor sewerage plant.

I find it quite interesting.

Mr. Ralph G. Chamberlain
1661 Grant Avenue
Lincoln Park, Michigan 48146
U. S. A.

Dear Mr. Chamberlain:

This will acknowledge the copy of your
letter to Dr. Sprinkle, and the accompanying report by
Dr. Sprinkle. We have placed the letter on file, and are
very glad to have it for our records.

Sincerely yours,

Peter M. Millman

SUNDAY SEPT 29 HIGH AT WINDSOR AND LOW AT LA SALLE. TWO SPOTTED.

October 30

Between 5.30-6-30 PM E.S.T.

Large disk seen with two power Between (LA SALLE AND LINE RUNNING
toward Metro Airport N.W.N.

Detroit's Major airport.

Called U.S. NAVAL AIR STATION GROSSE ISLE. MICH AND REPORTED SAME.

THEY HAD ME HOLD LINE AND CHECKED, SAID IT WAS A BIG ONE.

WHEN I FIRST SAW IT IT WAS ABOVE A 45 Ft Detroit Edison Pole and I was
about 300 ft from it (Pole)

It had red light on side. at times i saw light dash out from it.
then it would also kinda fade out then get bright again. as it moved slowly.

ALL THE NAVY SAID WAS THEY GOT IT AND IT WAS A BIG ONE I ASKED ABOUT A 100 ft
No answer.

But I did note that if i put myself behind a unit I could hide it
at times except for the light flash. streaks

Mr. Brian C. Cannon
Canadian Aerial Phenomena
Research Organization
P.O. Box 1318
Winnipeg 1, Manitoba

Dear Mr. Cannon:

I am sorry I have been somewhat slow in replying to your letter, but repeated absences from my office have prevented my keeping up with all the correspondence. I have no explanation at present for either the sighting at Greenwood, nor the one from Victoria. We will just have to keep them on file as unexplained for the time being. For your information, I am enclosing a copy of my letter to Mr. Voorsluys.

Sincerely yours,

PMM/wm

RECEIVED

JUN 8 '68
METEORITE/UFO REPORT OF SIGHTING

N68/172

Date of sighting: Wed Nov. 27 1968
Day Month

Time of sighting: between 7 and 8 a.m. (p.m.) (Circle correct one).

Condition of sky (clear, cloudy, haze, etc.) Clear.

Location of observer (as precise as possible) west. Inglisville
in that direction

Name of observer Floyd. J. Gaul. & Iris. M. Taylor.

Name and addresses of others also observing:

1. Carl Ruggles. west Inglisville. R.R. 2.
2. Mrs Raymond Durling, west. Inglisville
3. Mrs. Iris. M. Taylor. seen it twice R.R. 2.

Description of sighting: Big white light. facing South

- 1 Shape - it look about size of a wash tub.
- 2 Size (compared to a known object) _____
- 3 Colour(s) (including any changes) changing from white to Red
- 4 Altitude (in degrees above the horizon) (a) at first sighting quite a ways
(b) at last sight sighting 1/2 hour
- 5 Movement: (a) direction it was going sitting still.
(b) speed _____
(c) hovering (if any), height, duration, etc. _____
(d) any change in speed _____
- 6 Number of objects observed _____
- 7 How long was it observed 1/2 hour
- 8 Description of any sounds heard no
- 9 Was the sighting seen
 - (a) through a glass window - Yes/No
 - (b) from a car - Yes/No
 - (c) in the open - Yes/No - open

(Over)

10. Other information and narrative report.

Seen a gain. ~~at~~ 11.30, P.m. same night
again of to the south of Inglewille.
The object looked like round on the bottom
and something sticking on the top of it, it came
up bright and go down and out and come up again
Mrs Iris Taylor. seen it. 11.30. P.m. and it was
still there at 12.30. How much longer dont
No.

Return to: Professor R. H. MacNeill
Acadia University
Wolfville, N. S.

Reported by Lloyd J. Gault
Address: Inglewille. A.R. 2.

Attention: K. A. Moore

Gentlemen:

This will acknowledge with thanks the details concerning the debriefing on the UFO photograph by Mr. R. F. Neal, and the copies of observer's report forms. We have examined this with interest, and placed it on our files.

We note that no copy of the photograph accompanied the other information. We would be interested in having such a copy, or at least being able to examine it.

Very sincerely yours,

Peter M. Millman

DEC 17 68

DEBRIEFING ON U.F.O. PHOTO BY MR. R.F. NEAL

Clear sky in vicinity of photo. Approx bearing 210° measured from city map.

Structure in object #1 not observed and was surprise to observers since this object seen as single source of light.

Rod shaped object (8) assumed to be light seen falling (11 sec. exposure) in a "lazy S". Two or three of these fell from (1).

Other light sources (2) - (7) inclusive not observed (perhaps artifact due to reflection in lens?). Some dots may be stars since this was possible considering conditions.

To check the theory that additional lights were lens reflections, Mr. Neal took some pictures of Venus and the moon with the same equipment and will forward them. (The last one)

Interviewer's Comment

Both observers rather well above normal in both experience and training. Attitude one of reserved caution and interest.

Mr. Neal gives his occupation as "retired" but he says he was a photographer in the Himalayan mountains with National Geographic and also a policeman in India.

C.L.R. Unwin

The object was moving from South to North, when first observed had just passed overhead.

c. Shape of objects Circular disc observed from below
 of cluster

d. Color When over head a dazzling blue white as it moved away assumed the appearance of a 1st magnitude star.

e. Movement (Include if possible, angle of movement and time involved)
 The object was travelling from South to North at about the speed of a light plane cruising at 1500' to 2000' became stationary at about 80° stayed there for about a minute moved on & stopped again briefly over Pat Bay then faded out.

f. Other lights involved? Yes.

(If so, was light emitted or did it appear to be reflected from some other source) it was emitted. It was the back yard & kitchen being brightly illuminated that first drew attention to the object which seemed like a flying spot light. (brighter than the sun) Too bright to look at directly. Lit up the yard at least twice as bright as moon light with a bluish white almost shadowless illumination.

* a narrow beam earthward.

g. Additional Details

At the same time as the object resumed its northerly course the spot light was extinguished it flashed on again briefly when it came to rest the second time over the Pat Bay area. The whole object then faded out.

III CONDITIONS

a. Weather:

Cloud Cover

General overcast at a high level whole sky was obscured by cloud.

Type of Cloud

Aperture Setting

Developed by

V PREVIOUS SIGHTINGS

Any previous sightings of similar phenomena?

An object similar to this one was seen on Aug 30th at about 8:30 to 8:40 P.M. it moved in exactly the same manner as described above but it was only when it ejected ~~the~~ quantities of what looked like incandescent or super heated material which fell slowly earthward that both Mr. Voest and I remarked "It looks as if it's dumping something into the sea."

a. Name

b. When?

c. Their response

None except a phone call to the Observatory shortly after the sighting. They said that they were busy doing paperwork & suggested it could have been a satellite breaking up. One satellite which was not breaking up in any way was seen that evening.

VII OBSERVER'S INTERPRETATION

(star or planet)

Give your own impression as to what the phenomenon most probably was:

It certainly was not a heavenly body, as it changed course, moved at various speeds, changed colour from a blue white to deep orange & once turned deep red, and generally came to rest for periods of time from a few seconds to several minutes. The distance was too great to make any estimation of shape also it was generally too bright for such an estimation to be made. One sighting when the object came up over Esquimaux at about 7.45 pm. it was almost overhead at about 60° elevation it looked to be golden in colour & circular in shape on this occasion it was about $\frac{1}{3}$ the size of a full moon and shone a bright close beam of light down for about a second it then just disappeared. The object was seen from 12 to 15 times between the 30th Aug and 29th Sept.

April 15, 1969.

Commanding Officer,
Canadian Forces Base, Esquimalt,
Victoria, B.C.

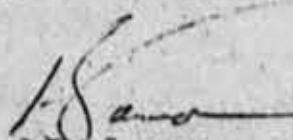

Dear Sir:

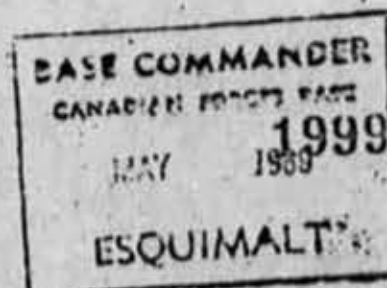

We are currently investigating the alleged sighting of an Unidentified Flying Object over Victoria, B.C. between the hours of 7:00 and 9:00 p.m. Sept. 29, 1968.

The purpose of this letter is to enquire whether or not your facility tracked such an object on radar. We also would appreciate any information concerning aircraft activity in the area which may have been mistakenly construed as the UFO. There is a reference in our file that the witnesses observed aircraft near the UFO. The object apparently expelled some form of "glowing" material that fell to the ground near a transformer on Devonshire Road.

Your assistance in this matter is respectfully requested and we look forward to a reply at your convenience.

Yours truly,

B.C. Cannon,
Director.

CANADIAN AERIAL PHENOMENA
RESEARCH ORGANIZATION
P.O. BOX 1310, WINNIPEG 1, MANITOBA, CANADA

May 27, 1969.

Canadian Forces Headquarters,
Dept. of National Defence,
Ottawa, Ont.

Gentlemen:

In recent months, we have had exchanges of correspondence with Canadian Forces Bases at Esquimalt, B.C. and Greenwood, N.S. concerning UFO sightings in these areas during 1968.

Specifically, we are interested in the Nov. 26, 1968 report from Greenwood dealing with an object(s) that was observed by ground personnel as well as being tracked on radar. The initial sighting was made by a Cpl. Boudreau with subsequent reports from Greenwood Ground Control Approach (both visual and radar).

Cpl. Boudreau's description of the object he observed would indicate that it was not attributable to aircraft or balloons and Greenwood GCA claim there was no traffic in the vicinity. We would like to know whether or not the sighting was fully investigated and what, if any, conclusion was reached.

The second case involves a report from Victoria, B.C. of Sept. 29, 1968 which I'm led to believe was also investigated by the Canadian Forces. We have accumulated a considerable amount of data on the sighting which involved a series of coloured slides that were allegedly taken by the two principal witnesses. At this point, we have been unable to arrive at a solution to the incident in terms of natural phenomena or misinterpretation of aircraft, weather balloons, flares and so on. We wrote to the Base Commander at Esquimalt and a Captain Frewer replied on May 20th to the effect that our letter dated April 15th had been referred to Canadian Forces Headquarters "in accordance with current regulations". Our letter requested information on aircraft activity and possible radar contact of the objects between 7:00 and 9:00 p.m. Sept. 29th, 1968.

We would very much appreciate your information pertaining to these two sightings. In addition, would you please advise where the responsibility now lies insofar as UFO investigation is concerned. We were under the impression that the matter had been turned over to Dr. Peter Hillman and his staff at the National Research Council. However, I interpret Capt. Frewer's remarks as to indicate that the Defence Dept. is handling at least a portion of the cases. Your comments would be appreciated.

Yours very truly,

B. C. Cannon,
Director.

Dear Mr. Cannon:

Thank you for your letter dated May 27, 1969. Your assumption that UFO investigation is now conducted by Dr. Peter Hillman and his staff at the National Research Council is correct. Military establishments have been directed to forward reports of this nature to Canadian Forces Headquarters in order to consolidate them for onward transmission.

A copy of your letter and our reply have been forwarded to the National Research Council for their consideration.

Sincerely,

C.L. Kirby,
Colonel

RE:
OBJET: Mary AUSTIN - Sighting of Unidentified Flying Object
Spruce Lake, City of St. John, N.B.
(30 DEC 68)

30 DEC 68

1. On the above date at 8.40PM a call was received at this detachment from a Mrs. Mary AUSTIN advising that she and several other people in the Spruce Lake, City of St. John, N.B. area had just sighted an unidentified flying object.
2. A patrol was made to the home of Mrs. Mary AUSTIN, Spruce Lake, NB. where it was learned from her brother, Donald AUSTIN, that he was the first to sight this flying object while he was proceeding home in his automobile along the Golden Mile Road, St. John, NB. When Donald AUSTIN arrived home in the Spruce Lake area he pointed this object out to his sister, Mary AUSTIN, and to several other people in the immediate area. As the object appeared to be moving away from the Spruce Lake area, Donald AUSTIN followed this flying object along route #1 towards St. George, NB. This object travelled along the highway at speeds of 40 mph and 60 mph, at times it appeared to be very high in the sky and then at other times it appeared as close as a few hundred yards away. The object appeared to be the size of a helicopter, with a white light completely covering the object. This light would be very bright at times and at other times would appear dim, it also appeared to have red and green lights. The AUSTIN's and several other people in the Spruce Lake area who saw this flying object described it as being similar to a half-moon, flat on the bottom and round on the top.
3. The following persons; Mary AUSTIN, Donald AUSTIN, M.V. AUSTIN, Jo-Anne DUNHAM, Jane ROCHER and Kenneth FAIR saw the above described flying object at 8.30PM Atlantic Standard Time, it was a clear night with the unidentified flying object being observed in the Spruce Lake, N.B. area for approx. $\frac{1}{2}$ of an hour.
4. The above mentioned people were questioned re: the sighting of the U.F.O. and all gave approx. the same description as noted above. These people were sober at the time and in my mind a reliable source of information.
5. In view of the above no further action is being taken at this point unless otherwise instructed.

CONCLUDED HERE

(F.G.W.) S/SGT
i-c Detachment.

G. McLean Cat.
(G. McLEAN) #23332.
Saint John Detachment.

APPROXIMATELY 5:30 P.M., Pacific Standard Time.

7. Mr. and Mrs. Victor IMHOFF, Mill Wright, Netherlands Overseas, residing at 1001 Johnson Street, Prince George, B.C. advised that they had also observed a flying object at approximately 5:15 P.M., 1 JAN 69. Mr. IMHOFF advised that they were enroute to their residence on Johnson Street via taxi when the sighting was made. He advised that they were travelling on Fifth Avenue near Watrous Street when it was first sighted. He advised that they made a left turn on Carney. He described the object as about 3 or 4 feet in diameter and was approximately 200 feet off the ground. The object appeared to be a dull orange colour.

8. Mr. Frank KERBRAT, Officer in Charge, Department of Transport, Radio Sonde Branch, Prince George Airport, was contacted in this regard. Mr. KERBRAT advised that they had a floating balloon come down in this area on the 1st of January.

9. Further reports of sightings of unidentified flying objects were received from the following people. Dates of sighting are in brackets. Mr. William McLEDD (3 JAN 69); Mr. KOMAS (4 JAN 69) and Mr. Martin PEARSON (5 JAN 69). All above noted persons are residents of Prince George.

10. In accordance with Operational Manual, CO-AIR, Paragraph 6, Telex PGC 8 was dispatched to Prince George Sub Division.

9 JAN 69

11. This date, information was obtained that an object had landed in the back yard of Mr. William DOW, 730 Burden Street, Prince George, B.C. A patrol was made to the noted address and Mr. DOW interviewed. DOW advised that the object come down at approximately 12:30 A.M., 4 JAN 69. The object was a plastic laundry bag, with one end held open with circular construction on drinking straws. A cross formed in the centre made out of straws had a number of birthday candles held to it with the use of straight pins. The top end of the bag was made secure by taping it with Scotch Tape. With the permission of Mr. DOW, the object was taken to the Prince George Identification Section Office where it was photographed and then returned to Mr. DOW. Copies of the photograph are attached.

12. It is understood by the writer that this object operates on the following principle. The bag, after constructed, is held up and the candles lighted. The hot air created by the candles causes the bag to lift and float.

13. It is felt that the object sighted could have been one of these plastic laundry bags or a floating balloon. The object observed by WEBSTER was the same object as that observed by COOK, MAGNUSON, Mr. RICHMOND and Family and Mr. and Mrs. Victor IMHOFF. As the vicinity of the sighting were all on Fifth Avenue near the streets from Watrous to Carney, it is felt that the object was probably one of these plastic laundry bags. It is felt by the writer that with the vicinity of the sightings and the landing of this plastic bag this is probably what was observed, and probably the work of ingenious children.

RE:
OBJET:

Walter WEBSTER - Complaint of Unidentified Object (Flying)
Prince George, B.C. 1 JAN 69 ORGANIZED.

1 JAN 69

1. At 7:30 P.M., Mr. Walter WEBSTER, Salesman, Bico, residence 1120 Dahl Street, Prince George, B.C. called this office advising that he had observed an unidentified flying object. WEBSTER stated that this sighting occurred between the hours of 5:00 P.M. and 6:00 P.M., Pacific Standard Time. WEBSTER advised that he was enroute to his residence and was travelling on Fifth Avenue, in the vicinity of Alward and Burden Streets, City of Prince George when he made the sighting. He stated that he was so astonished with what he had observed that he pulled into the Fifth Avenue Shell Service Station and drew his observation to the attention of one Donald COOK, Service Station attendant and a customer, Grant MAGNUSON. COOK and MAGNUSON are both residents of Prince George, B.C.

2. The object was described by WEBSTER as follows: One eighth the size of the moon, yellowish orange in colour with a glow around same. The object appeared to have a square attachment fastened to the bottom. The top portion of the sphere had diagonal straps across it. The object showed a radiant light and at times appeared very bright. It appeared to move and gain altitude. The altitude was estimated roughly at between 2,000 and 10,000 feet. The object gave no audible sound. The duration of the sighting was between one and one half hours.

3. COOK and MAGNUSON agreed with the description except that they did not observe the attachment on the bottom of the object.

4. Mr. WEBSTER advised his wife, Arlene, and his brother, Mr. Ernest WEBSTER of his observation. Mrs. WEBSTER advised that when she observed the object just before 6:00 P.M., it appeared dull and could not make out any pattern. She advised that it appeared to be very bright and then would get dim.

5. Mr. Ernest WEBSTER, Assistant Manager, Civic Properties Commission, City of Prince George, residing at 582 Radcliff Drive, Prince George advised that he viewed the object through binoculars. He stated that it was at such a distance that he could only observe a radiant orange glow. He further advised that the object would disappear and then re-appear much fainter. Ernest WEBSTER and family observed the object for approximately one half hour, between the hours of 6:30 and 7:00 P.M., Pacific Standard Time.

2 JAN 69

6. Further reports of the sighting on 1 JAN 69 were received from the following people. Mr. Geoff RICHMOND, Postal Clerk, 309 - 211 North Ospika Blvd., Prince George, B.C., accompanied by his wife and three teenage children, observed an object while travelling on Fifth Avenue near Carney Street. RICHMOND described the object as about 1/20th the size of the moon, spherical shape and had an orange glow to it. RICHMOND advised that he only observed the object for a couple of minutes as he was driving his automobile. The sighting was made at approximately 5:30 P.M.

RE:
OBJET:

**Unidentified Flying Object -
West End, Bell Island, Nfld. 9 JAN 69**

1. On 9 JAN 69 at approximately 7.55pm after hearing a conversation over the Police radio at Bell Island Detachment Office concerning an unidentified object, this member made a patrol to the West end of Bell Island to see if the object could be observed from that point.
2. The weather conditions at the time were fine with the sky clear. There appeared to be a few light clouds to the East but in all there was nothing to hamper visibility.
3. While driving West on No. 2 Rd., I observed a round bright light high in the sky to the North West and it was moving at a downward angle of about 45 degrees to the West. This light was moving at a fairly high rate of speed but not as fast as a falling star. It was also brighter than a star.
4. After travelling for about five to ten seconds in this direction it stopped with the light fading and then turning to orange and at infrequent intervals changing to red. At various times this light would fade out to a point and disappear and then return again three to four seconds later. No noise could be heard and no shape of the object could be established.
5. The object was observed in the manner mentioned until 8.24pm at which time it faded to a point and disappeared fairly close to the Western horizon. After stopping from it's downward angle the light appeared to be moving very slowly to the Western and then went out of sight. The light was larger than the North star and when first sighted appeared to be much brighter.
6. There were no other known observers at this point. The conversation being carried on over the Police radio was from Harbour Grace Detachment to their various Police cars. The members in these cars also had the object in sight.
7. In view of the foregoing no further action deemed to be necessary at this point.

THE N.C.O. I/C HARBOUR GRACE DETACHMENT

Re: Unidentified Flying Object

1. With reference to your report of 2 FEB 69 there appears to be some conflict between the information contained in para. 2(e) and that outlined in your message HG7 of 9 JAN 69. The message stated that the object was located about northwest of Harbour Grace and then moved west and back to northwest several times, but your report indicates there was a difference of opinion as to whether the object was stationary or if it moved alternately north and south.

2. For record purposes kindly have a brief report submitted clarifying this point.

STILL UNDER INVESTIGATION.

RE:
OBJET:

Unidentified Flying Object - 9 Jan 69

1. Receipt of memorandum from O.C. St. John's, dated 17 Jan 69 is acknowledged.
2. The following is submitted further to our radio message of 9 Jan 69 and in compliance with Operational Manual, CO Air, Par. 6.
 - (a) Thursday 9 Jan 69, 7:30 p.m., Wld. Standard Time.
 - (b) Cloudy with infrequent clear intervals.
 - (c) Edith (Mrs. Jack) ROSE, Kitchen's Hill, Harbour Grace, Wld.
 - (d) S/Sgt F. CORRELL, Cpl. D. SEAR, Csts. V. STEWART, D. BARRETT, W. TRENHOLM, L. MARSHALL, K.B. MacDOUGALL, Aux Member Reginald PARSONS and Jerome ROSE. Mr. ROSE and Cst. MacDOUGALL viewed the object through 7 x 50 power binoculars.
 - (e) The object was brighter than any of the stars and the moon, appeared to be slightly larger than the North Star. The witnesses varied in stating the object was only circular in shape to it alternating between being circular to triangular. It was sighted North West of Harbour Grace. There was a difference in opinion to whether the object was stationary or whether it moved alternately North and South.
 - (f) There was only the one object and it changed colour from a bright orange to red and back again at frequent intervals.
 - (g) The object first reported at 7:30 p.m. on the 9 Jan 69 and passed out of sight at 8:10 p.m. the same date.
 - (h) There were no sounds coming from this object and no smoke or vapor visible. Although viewed through binoculars it was impossible to see this object clearly.
3. Unless otherwise instructed no further action is being taken.

METEORITE/UFO REPORT OF SIGHTING

Date of sighting: Wed. Dec 27th 19 68
Day Month

Time of sighting: a.m./p.m. (Circle correct one) approximately 7.10 in evening

Condition of sky (clear, cloudy, haze, etc.) _____

Location of observer (as precise as possible) It was in the forest

Name of observer Mr. & Mrs. Earle Hallis

Name and addresses of others also observing:

1. Mr. Reginald Sutton whose name
2. you have met as he was the one
3. who sent our name in. He said it a little later

Description of sighting: looked like a big ball of fire or a red light

- 1 Shape - a round object as near as we could tell
- 2 Size (compared to a known object) it was hard to tell the size
- 3 Colour(s) (including any changes) when we saw it it was red

- 4 Altitude (in degrees above the horizon) (a) at first sighting _____°
(b) at last sight _____°

it was just above the trees and then it went down to go below the trees

- 5 Movement: (a) direction it was going _____
(b) speed it seemed to move slowly
(c) hovering (if any), height, duration, etc. it was hovering for a short time and was very low
(d) any change in speed no

6 Number of objects observed 1

7 How long was it observed about 10 minutes

8 Description of any sounds heard we didn't hear any sound as there was a church bell ringing at the time for prayer & meeting

9 Was the sighting seen

- (a) through a glass window - Yes/No
- (b) from a car - Yes/No
- (c) in the open - Yes/No

(Over)

10. Other information and narrative report.

When I saw it first I thought it was a fire as it was just over the flu. at the Baptist Church which is a short distance from our home. We can see it plain from our house. I was going to call my husband to go to the fire when I saw the object move. He came to the kitchen window and looked. Then we both went out doors and watched it; it seemed to be moving slowly; we watched it for about 10 minutes then we couldn't see it for the trees and it was just a few minutes after this when 4:30. Oulton saw it going down the bay.

A week later we saw a white looking object in the west; it would go red clear looking; then seem to disappear; but it didn't seem to move in the sky. Hoping our remarks will be of some help to you in finding out more.

4:30. Earle Hallie

- (a) through a glass window - Yes/No
- (b) from a car - Yes/No
- (c) (in the open) Yes/No

(Over)

10. Other information and narrative report.

Dear Sir
 I hope this will be of help as
 there is a few questions I don't quite understand
 or it is quite hard for me to explain
 this is something I have seen before and hope
 you will give me a better idea of it again
 A side of it looks like
 This will give you
 the light not bright and
 then don't come
 then it would
 go out all together
 and come on bright
 that let up the
 sky

I hope this will help.
 Thank
 Mrs. Floyd Burns
