EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

10 OCT 69

1. At approximately 10:00 pm this date Miss [REDACTED] of 707 Atlantic Ave., Winnipeg 4, Manitoba phoned our office advising that she and her boy-friend, [REDACTED] of 319 Kilbride Ave., Winnipeg 17, had seen a U.F.O. at approximately 11:15 pm on 9 OCT 69 near Anola, Manitoba. Details were obtained as per Operational Manual CO-Air para 6 at this time, and telex message WD904 was drafted and sent out to the appropriate places on 11 OCT 69.

27 OCT 69

2. On this date a statement was taken at Winnipeg Detachment Office from [REDACTED] in the presence of [REDACTED]. The statement is embodied hereunder.

STATEMENT BY: [REDACTED] ED: [REDACTED] 8:00pm
707 Atlantic Ave., Winnipeg 4, Man. 27 OCT 69

My boyfriend and I were driving home from his brother's place near Anola, Manitoba. It was about 11:15 pm (CDT) on October 9th, 1969. When we were about 5 miles west of Anola on PTH #15; I saw a set of lights in the sky to our left. So we stopped the car and turned the lights off. I noticed it because it was rising in the sky, then it would fall almost to the ground then rise again. It was sort of a long cylinder shaped object, with flashing bright red lights. We watched it for about three minutes, it kept going way up in the sky then fell close to the ground rather slowly. When it was closest to us it looked to be about a mile away from us. All of a sudden it just disappeared. The sky was fairly clear that night, there were a few stars out.

WIT: J.R. BARLOW Cst.

Org. Sig. [REDACTED]
and [REDACTED]

3. It is my opinion that both [REDACTED] and [REDACTED] are sensible, mature, young adults, I would appraise the source of the above information as quite reliable.

4. As no further action is required at this point, the file will be terminated here as shown below. Copies of this report are attached in duplicate to be forwarded to Headquarters Ottawa.

Box 227, Hamiota
Oct. 10/64

L. M. Mitelman,
Melita, Man.

Dear Sir,

A recent article in the Brandon Sun reports the sighting of a UFO near Melita.

This has prompted me to report that a young Hamiota couple sighted a very similar object 3 or 4 weeks ago, a short distance west of their town. Other than appearing first in the evening and it being described as the size of a ball the following morning, the matter was dropped, rather disbelievably.

The object, a deep orange-yellow in color, and circular in shape, appeared as though it were floating along the ground and travelled in a south-westerly direction. At times, parts were obliterated by trees, then it just vanished. It was in view about 4 minutes, at approximately 9:45 P.M. on a clear night.

It would be interesting to hear more information on the above.

OBJET: U.F.O. SIGHTING
Brandon, Manitoba - 5 OCT 69

- A - DATE AND TIME OF SIGHTING: 5 OCT 69, 1:00 - 1:30 A.M.
Central Time Zone (DST)
- B - CONDITION OF SKY: Cloudy
- C - IDENTIFICATION OF OBSERVER: [REDACTED] 139 Madison Cres.,
Brandon, Manitoba - [REDACTED]
- D - LOCATION OF OBSERVER AT TIME OF SIGHTING: North of Queens Ave. in back lane
between Madison Cres. and Green Acres
school yard, Brandon, Manitoba.
- E - IDENTIFICATION OF OTHER PERSON ALSO OBSERVING THE UFO: Mrs. [REDACTED], wife of aforementioned
- F - DESCRIPTION OF SIGHTING: Very bright - white light - appeared
oval shape - flashing intensities
lighting all the sky - one object
only - continuous motion - travel-
ling East to West - no sound - very
high - considered too high for a
plane to display a light of such
intensity - Positioned North and
East in the sky.
- G - DURATION OF OBSERVATION: Two and one half minutes approximately
- H - OTHER RELEVANT INFORMATION: When object disappeared in the West,
the observer looked to the East and
observed a stationary fluorescent
glow which did not subside during
the 1 1/2 minutes he watched some
before entering the house.
- I - COMMENTS:
Mr. [REDACTED] submitted a statement covering the sighting of
the UFO and same is embodied as received hereunder:

UFO SIGHTING

TIME: Early Sunday morning October 5 with the hour of 1:00 and 1:30am.

Sky Conditions: Cloudy patches; not a clear sky.

Weather conditions: Quite a calm night; hardly any wind at all.

- U.F.O. SIGHTING -

2.

STATEMENT OF [REDACTED] CONTINUED FROM PAGE 1.

Location: Walking north from Queen's Ave. East in laneway between Madison Crescent and Green Acres School yard.

Events:

My wife and I first noticed a flashing white light high in the sky almost directly above us and somewhat to the East and North of our position. We did not take exception to it at first, since we immediately thought it to be the flashing beacon light from the airport. Then we realized however, that this couldn't be possible, since the light seemed to be at too great a height and there was no sign of a beam from the ground. We also noticed that the light was flashing much too quickly (revolving) to be part of the airport beacon.

After it (the light) began moving across the sky in an east-west direction, we thought it might be a plane, but quickly ruled this out by the rapidity with which the light was moving and by the size of its beam. It had to be very high, and yet its oval-shaped beam, which was shining in an almost elliptical pattern was lighting up a large portion of the sky. Another thing, was that there was no audible sound that we could detect.

We watched it for a few minutes, after which it seemed to disappear in the west part of the sky. Actually I watched it for a bit longer time than my wife who became a little upset and went into the house ahead of me.

Other than the above, I saw nothing of any particular size, shape, colour or material. I cannot even recall seeing any moon that night, as all my attention was focused on that strange flashing light. It was the strangest phenomenon I or my wife had ever seen in the sky."

RE:	Gerald Richard GRATTAN (6 APR 69) Sighting of Unidentified Flying Object Rural Municipality of Arthur, Manitoba	6 OCT 69	PAGE THREE
-----	---	----------	---------------

10. The following is a statement obtained from Arthur CREWS.

Statement of Arthur CREWS (BD 27 MAR 1886)
Melita, Manitoba, 8:50 P.M., 10 OCT 69

"I generally get up in the morning about 2:00 or 3:00 A.M. This night I went in the living room just to see what the temperature was, it was a cool night. After looking at the temperature, when I turned around, I noticed a light on the window sill and thought it was a car. I hauled the curtain back and saw this bright light, a little bigger than the moon. It's outline was very sharp. It was still when I saw it, it stayed there only a few minutes and then moved South East, then it changed and went North West and out of sight."

WIT: ORIGINAL SIGNED
(G.R. GRATTAN) 2/CST.
Melita det.

ORIGINAL SIGNED:
A. CREWS

11. At first CREWS was not sure of the date only it was less than a month ago, he then remembered his daughter had visited him on the evening of 5 OCT 69, that very night he saw the object. This would place the date of his sighting in the morning of 6 OCT 69. The exact time he does not know, only that between 2:00 and 3:00 A.M. every morning he gets up to go to the bathroom. CREWS cannot say at what distance the object was, only it was very high in the sky. Very bright and of an illuminous nature it cast it's own light. It's color was yellow with a red tinge, very sharply outlined and emitting no sound. He estimates the object was still for approximately one minute and took at least two to three minutes to disappear. It was hard to tell it was moving only the fact that there were some tree branches between him and the object and these were moving across its face.

12. The same weather conditions pertain to CREWS' sighting as mine.

13. The reason CREWS did not mention this before is because he is 83 years old and thought that people would only laugh at him. I would consider CREWS as a reliable source.

CONCLUDED HERE:

LOI SUR L'ACCÈS À L'INFORMATION

"About two months ago, I'm not sure of the date. It was 2:00 A.M. and I woke up and saw this pinkish glow in my bedroom. I got out of bed and looked out the window. This light, pinkish in color, was hovering about 15 feet off the ground in my yard. It was about the size of a soft ball.

I went outside and it had already started to move and went straight South West in an erratic flight, kind of wobbling from side to side, at no more than 10 miles per hour. It took it a good 10 minutes before it was out of sight in the South West."

WIT: ORIGINAL SIGNED
(H.A. FINK) CPL.
i/o Melita det.

ORIGINAL SIGNED:
[REDACTED]

6. [REDACTED] farm buildings are located on the [REDACTED] Rural Municipality of Arthur, Manitoba. This is approximately 2 miles South East of my sighting. When first observed from the bedroom window, [REDACTED] says, the object was approximately 50 feet away, once outside the object was approximately 150 feet away and emitting no sound. The object was never over 15 feet above the ground and sometimes lower. Weather to the best of [REDACTED] recollection was clear however he could not be sure. He is sure visibility was good as he could see the lights of Melita. Visibility during daytime in a South West direction would be approximately 3 miles.

7. [REDACTED] has a good reputation in this area and is considered a reliable source. [REDACTED] does not wish his name mentioned in regard to his sighting. This is why he did not report same earlier but at the time he did talk to neighbors about it.

9 OCT 69

8. [REDACTED] reports to this office giving the date of his sighting as 2:00 A.M., 9 JUL 69. He remembers this because he had a meeting to attend that evening.

10 OCT 69

9. [REDACTED], Melita, Manitoba, reports to this office that her grandfather, one Arthur CREWS of Melita, Manitoba, may have seen a U.F.O., approximately one month ago.

1. Further to Melita Det. outgoing message number 17
6 OCT 69

2. At approximately 2:40 A.M. Central Daylight savings time I was proceeding North on P.T.H. #83 at approximately 45 M.P.H.. I noticed a light, the approximate size of a tower clearance light, in the sky, to the North East. The light appeared to be almost directly North of Napinka, Manitoba. The light started to get larger and at this time I noticed it was moving in a Westerly direction towards P.T.H. #83. I glanced at my watch and the time was exactly 2:45 A.M.. The object appeared to be moving at approximately the same speed as I was travelling and it appeared that our paths would cross on P.T.H. #83 approximately 6 miles North of Melita, Manitoba. While going North my view was momentarily obstructed by trees on the East side of the road. Once I had a clear view again the object had stopped. Its location at this time appeared to be over the S/W 1/4 32-4-26 Rural Municipality of Arthur, Manitoba, which is approximately 6 miles North of Melita. I stopped the car on the side of the road, turned off the lights and ignition and got out of the car. At this time I had a chance to make the following observations. The object was perfectly round and the bottom half was lighted, the upper half seemed to be blacked out with only a thin line of light around it. The bottom half was a yellowish red and seemed to be of an illuminous nature. It did not cast any light on the ground or on any surrounding objects. I did not hear any sound and did not notice anything unusual in the immediate area. The object at this time was about twice the size of a full moon, it appeared to be a perfect circle with no ragged edges or glow surrounding it. The object stayed in this position for approximately 45 seconds and then started to move to the east retracing its path. The object diminished in size equal to that when it was first sighted and faded into cloud cover. The time the object was last seen was 2:49 A.M.

3. The weather at the time of the sighting was a heavy overcast sky, with a ceiling of approximately 1,000 feet. Earlier in the evening the area in question had a light rain, however there was no rain falling at the time of the sighting. Visibility was approximately 5 miles, the wind was a dead calm.

4. [REDACTED] As a result of the publicity of this sighting [REDACTED], who farms North East of Melita, called at this office and reported sighting a U.F.O. approximately two months ago in the same general area. The following statement was obtained from him.

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

1. With regards to the above caption, please be advised as follows. On the 16 OCT 69, correspondence was received from Melita detachment regarding a U.F.O. sighting, reported via mail by Mrs. [REDACTED] of Box 227, Hamiota, Manitoba. Same letter was attached to Melita's occurrence report and is presently held on file at this point. In the letter, Mrs. [REDACTED] stated that a young couple from the Hamiota area had observed an unidentified flying object, a short distance West of Hamiota. She added that the sighting occurred three or four weeks previous to the 10 OCT 69, the day she had written the letter. She stated in the letter that the young couple had seen a huge object, deep orangy-yellow in colour and circular in shape. She went on to say that the object appeared as though it were floating along the ground and was travelling in a south-westerly direction. She added that the object was viewed for about four minutes, at approximately 9:45 P.M., on a clear night.

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

2. Investigation in the above regard revealed that the two young people concerned in this matter were [REDACTED] years of age, an employee of the Hamiota CO-OP, Hamiota, Manitoba and [REDACTED] years of age, a student at the Hamiota Secondary School. Statements were obtained from both Miss [REDACTED] and [REDACTED] on the 16 OCT 69. Same are attached to this report as Appendix "A" and Appendix "B" respectively. Both of these subjects are well known and respected in the community.

3. Inquiries in the immediate area of the occurrence have met with negative results. No one was able to offer any information on such a sighting.

4. Copy of this report is being forwarded direct to Melita Detachment for their information. As no further action is anticipated from this point, file is being noted as shown hereunder.

CONCLUDED HERE.

LOI SUR L'ACCÈS À L'INFORMATI

STATEMENT OF [REDACTED] (DB: [REDACTED])
ADDRESS: Box 227, Hamiota, Manitoba.
OCC: Student - Grade 12.

It was about 9:45 P.M. when [REDACTED] and I were driving West on PR #469. We were approximately two miles West of Hamiota when we first saw it. As we drove along, we saw a huge object, sort of an orange, reddish colour. It was circular in shape and seemed to be blotted out by the trees as it moved away. We only watched it for three or four minutes. As we watched it, we noticed it glowed. It was on the South side of the road when we saw it and it moved away from us in a south-westerly direction.

Wit: Cst. J.A. COAGIE

Sgd. [REDACTED]

QUESTIONS and ANSWERS:

Q: On what day and at approximately what time did you see the object?
A. I can't remember the day, but it was about 9:45 P.M.

Q. What was the condition of the sky at the time you saw it?
A. I can't remember.

Q. Exactly where were you when you saw it?
A. We were approximately two miles West of Hamiota, on Provincial Road #469 proceeding in a westerly direction.

Q. Were there any bursts from this object?
A. No.

Q. How bright was the object that you saw?
A. It was brighter than the moon.

Q. What colour was the object?
A. It was a reddish, orange colour.

Q. Did it leave a trail of colour or smoke behind it?
A. No.

Q. Was it dark at the time you saw it?
A. Yes.

Q. How big was the object?
A. It was much higher than the trees.

Q. From where you were, how big was the object in comparison to the moon?
A. It was a good twice the size.

Q. How long did you see the object in motion?
A. All the time we saw it. Three or four minutes.

Q. Did this object emit any sounds?
A. No. Not that you could hear.

Q. Where was the object when you first saw it?

A. It was just to the South side of the road and seemed to be behind this one clump of trees.

Q. What type of a path did the object follow?

A. It was low and moved away from us in a south-westerly direction.

Q. Was the object at any time up in the sky?

A. No. It was close to the ground.

Q. Was there anything else unusual that you noticed about the object?

A. No

--------------	--	------	--

STATEMENT OF [REDACTED] (DB: [REDACTED])
ADDRESS: Hamiota, Manitoba.
OCC: Clerk - Hamiota CO-OP, Hamiota, Manitoba.

It was either on the 16th or 17th of September, about 10:00 P.M., approximately two miles West of Hamiota, when we first saw it. As we were going West, we saw a big, orangish, red ball, about twice the size of the moon, behind some trees. It seemed to move out and keep ahead of us as we drove along. We watched it for three or four minutes as we drove along at 30 miles per hour. It then disappeared.

Wit:

Cst. J.A. COAGIE

Sgd. [REDACTED]

QUESTIONS and ANSWERS:

Q. On what day and at approximately what time did you see the object?
A. It was either the 16th or 17th of September, around 10:00 P.M.

Q. What was the condition of the sky at the time?
A. I'm pretty sure it was clear.

Q. Was it dark at the time?
A. Yes.

Q. Exactly where were you when you saw the object?
A. I was two miles West of Hamiota, on Provincial Road #469 going in a westerly direction.

Q. Were there any bursts of colour from this object?
A. No. It just glowed in itself.

Q. How bright was the object that you saw?
A. I thought it was the moon at first, but I guess it wasn't. It was almost the same brightness.

Q. What colour was the object?
A. An orangish red.

Q. Did it leave a trail of colour or smoke behind it?
A. No.

Q. How big was the object?
A. I'd say, about two or three times the size of the moon.

Q. How long was the object in motion?
A. About three or four minutes, until the time I lost sight of it and it went into the bushes.

Q. While you were watching the object, did you hear any strange sounds?
A. No. There was no sound at all.

Q. Where was the object when you first saw it?

A. It was on the South side of the road, out a piece in the field.

Q. What type of path did the object follow?

A. It seemed to float right along the ground.

Q. Did the object ever go up into the sky?

A. No. It stayed about the same level.

Q. Was there anything else unusual that you noticed about the object?

A. No.

Q. Were either you or Marriann drinking before, or on this occasion?

A. No.

1. At 9:45 A.M. this date, Mrs. [REDACTED] called and stated that at 4:30 A.M. this date, she had observed an unidentified flying object in the sky South West of her Farm Home. [REDACTED] live 12 miles West and 3 miles South of Bonnyville, Alta. The necessary particulars were obtained and were then phoned into Sub/Division who in turn forwarded Telex Message No. ESD1003 to the points concerned.

2. Mrs. [REDACTED] stated that she had gotten out of bed during the A.M. OF this date and upon looking out her bedroom window she had observed the unidentified object in the sky. This Detachment had not had any other reports regarding this matter. I have no reason to doubt the information supplied by Mrs. [REDACTED] although she is not known to this member she seemed very sincere when reporting this matter.

RE:
OBJET:

Unidentified Flying Object - Torbay Man's Pond -
Approximately 10 miles West of St. John's, Nfld.
Just off the T.C. Highway - 9 AUG 69.

9 AUG 69

1. At approximately 2:40 PM, Mr. [REDACTED], 18 Ridge Rd., St. John's and his son, [REDACTED], Apartment 306, Building 10, Hillview Terrace Apartments, St. John's, Nfld., reported that they had observed an U.F.O. at Torbay Man's Pond, approximately 10 miles west of St. John's just off the Trans-Canada Highway at around 11:00 AM, this date. Both men appeared earnest in reporting this sighting.

2. [REDACTED] were alone at this pond at the time and were fishing in this pond.

3. The following telex message was forwarded to NRC Meteor Centre, for information of Canforcehead and Commissioner:

U.F.O. REPORT:

- a. 11:00 AM, 9 AUG 69 - Nfld. Daylight Saving Time.
- b. quite clear with excellent visibility
- c. [REDACTED], 18 Ridge Rd., St. John's, Nfld. and [REDACTED], Apt. 306, Building 10, Hillview Terrace Apartments, St. John's, Nfld.
- d. Torbay Man's Pond which is located just off T.C. Highway, approximately 10 miles west of St. John's, Nfld.
- e. none known at this time.
- f. One object, fiery red in color with a distinct illumination or pattern in centre and appeared round in shape. When first observed, object appeared to be approximately 5 miles North of their location and 800 to 1000 feet high. Object was clearly visible for 3 to 4 minutes as it descended in a zigzag manner towards earth and disappeared behind a hill
- g. Cannot be certain as to shape as zig zag movement made exact description difficult. Smoke was observed coming from the U.F.O., however, there was no noise. A check of D.O.T. records at Torbay Airport indicates nothing unusual, although a Corvair aircraft did depart that point at 11:12 AM. Further investigation to be instigated and report to follow.

13 AUG 69

4. The following self-explanatory statements were obtained from [REDACTED] with the originals being held on file.

ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATIONSTATEMENT OF [REDACTED] (DOB: [REDACTED])
- 18 Ridge Rd., St. John's, Nfld.
- 13 AUG 69.

On Saturday, 9 AUG 69, at around 11:00 AM, I was at a pond with my son, [REDACTED]. This pond is off the T.C. Highway about 10 miles from St. John's, Nfld. I was fishing and my son yelled to me to look at what was coming down. I looked up in the sky and saw this object falling from the sky. When I first saw it, it was about 1000 feet or more up in the sky. It was about the size of a small plane. This object appeared to be zigzagging down and looked round. There was a tail of smoke coming from it till it went out of sight behind a hill about 5 miles or so away. It appeared a reddish orange in colour and there was a light glistening off it. Like the sun was reflecting off it. From the first time I saw it till it went out of sight behind this hill would be about 5 minutes or more. I did not time it but I would guess this was how long I saw it. It was coming down quite fast. There appeared to be a flame coming from the end of it and then the tail of smoke or something resembling smoke. The weather this day was clear and good visibility. I am a retired Telecommunications radio operator. This is the first time I have ever seen anything like this. When I first saw this object I assumed that someone was firing rockets. Later, I reported this to the R.C.M. Police in St. John's. I did not hear any noise from this object.

On Saturday, 9 AUG 69, at around 11:00 AM, I was at a pond on the T.C. Highway about 10 miles out from St. John's. My father, [REDACTED], was with me. I heard a loud puff sound like a muffled shot gun going off. I looked up in the sky and saw this object with a trail of smoke coming from it. This object was up about a mile and was coming down. The object was about the size of 3 or 4 cars, sort of a cigar shape, from the end there was an orange yellow glow. It was hard to tell if this was flames or not but it was really bright. I was watching this object's descent for about 3 minutes and then it disappeared behind a hill about a mile or so away. I did not hear any explosion. It was only when I first heard it that I saw smoke coming from it. This was north from where I was. I think I could find this spot where this object fell. The weather this day was clear and visibility unlimited. I am a [REDACTED]

5. On talking to Mr. [REDACTED], DOT Marine Agent, St. John's, Nfld., he advised that one of their helicopters was going up on a flight to check out its radio and he authorized this member and [REDACTED] to accompany the pilot on this flight.

6. [REDACTED] & this member accompanied by the pilot, [REDACTED] & searched this area of Torbay Man's Pond. The search lasted for approximately 3/4 of an hour, however, no signs were found of where this UFO had landed. It may be noted that this flight was gratis as the helicopter had to go on a flight this day.

7. [REDACTED] was puzzled that no sign could be found where this UFO landed. He felt certain that the area searched was where he saw the object fall.

8. [REDACTED] is a retired from the D.O.T. and is known as a sane and responsible individual. His son, [REDACTED] is a [REDACTED] at the Janeway Hospital, St. John's, Nfld., and he is known as a sane and responsible person. There were no indications that either of these men had been drinking the day they sighted this object. Also there is no indication of similar events of this nature being reported by either of these men. While there is always room for doubt in these incidents, I have no reason to question the [REDACTED] statements as being untrue. These two men are considered stable persons and the incident really appeared to disturb them.

9. In view of the above and unless otherwise instructed this file is being closed.

RE:

[REDACTED] (B: [REDACTED]) Fireball Sighting
Westport, Nfld. 22 AUG 69

22 AUG 69

1. At 11.45 P.M. this date, [REDACTED] of Westport telephoned this Detachment and advised that he had observed a bright flash or explosion in the sky just east of Westport. The telephone line was very bad and Mr. [REDACTED] was informed that he would be contacted early on the 23 AUG 69.

23 AUG 69

2. Patrol was made to Westport and it was learned that [REDACTED] and [REDACTED] (B: [REDACTED]) were at the [REDACTED] home at about 10.30 P.M. on the 22 AUG 69 when they noticed a bright red, round object in the sky. This object appeared to be stationary in the sky and was situated east of the community. The sky was clear at the time. The object was very bright and there was blue smoke trailing above the object in the approximate shape of the letter "S". The object was sparkling around the circumference and then it exploded with pieces flying in all directions. The flying pieces almost immediately disappeared. The object then was reduced considerably in size and looked like a distant star. It then started to slowly descend towards earth and disappeared behind a hill. It is now estimated that the object was observed for about five minutes in all. It was very bright for about two or three minutes. The smoke was not observed after the explosion. [REDACTED] and [REDACTED] state that there was a very loud juke box playing near where they were standing, consequently if there was any noise from the explosion they did not hear it. Mr. [REDACTED] thought that the object was about 25' in diameter while all the other witnesses estimated it to be about one or two feet in diameter. Mr. [REDACTED] also estimated that the object was about 8 miles above the earth and at first he thought that it was a jet plane that was afire and exploded.

3. Other witnesses were [REDACTED] (B: [REDACTED]) and [REDACTED] (B: [REDACTED]). They were not in company with each other but in opposite ends of the community of Westport. Miss [REDACTED] stated that she saw the blue smoke after the explosion, otherwise her information was similar to that already given. Neither Miss [REDACTED] nor [REDACTED] heard any noise.

4. A message (BV 54) in this connection was immediately forwarded by SSB to the O.C. St. John's Sub/Division.

5. All the witnesses in this connection are considered to be steady and reliable persons.

RE. [REDACTED] - Report of U.F.O.
OBJET: [REDACTED] Near Fort Fraser, B.C. 22 AUG 69
VANDERHOOF DETACHMENT CASE UNORG.

1. In the afternoon of the 22 AUG 69 [REDACTED] came into this office and stated that he had seen a U.F.O. in the morning just off the LILY LAKE ROAD, about eight(8) miles from Highway #16 near a Forestry Camp in that area. [REDACTED] was the only person to see it, a friend had only heard it. [REDACTED] and his friend work for ALRAS ENGINEERING from Vancouver, B.C. [REDACTED] was staying at the Fraser Lake Inn in Fraser Lake, B.C., but has moved elsewhere. His permanent address is: 1195 Hanon Place, West Vancouver, B.C. and can be contacted there.

2. This is a statement of [REDACTED] that was written just minutes after the sighting:

"At 11:35 A.M. on Friday, the 22 August 1969 I heard a high pitched scream similar to a jet engine. When I looked up and spotted it, it had passed overhead and was moving away from me at a high rate of speed. I was on a mountain with clear visibility and about 250 feet above the valley floor. I observed it moving away from me and about 500 feet to 800 feet above me. As it moved away it was gyrating, it was teter tottering on a pivot through its centre and in line with my sight. By this time the noise could no longer be heard. I observed that when it gyrated, it stayed in a straight line and did not alter course due to the gyrating. I was able to observe it for some 20 to 30 seconds and at off point it did turn to the right but I didn't see the object banking to do this. When it turned it stayed at constant elevation then as it started back in my direction it began to lose elevation and I thought at the time that it had landed on the hill on the opposite side of the lake that fills the valley. I'm not exactly sure on its size but would estimate about 30 to 40 feet across and 10 to 15 feet deep. It did appear to be saucer like. The total time observed was approximately 40 seconds. I did hear the same noise again only once as the object made its turn and before I lost sight of it or it landed."

3. In view of the fact that [REDACTED] reported this incident some time after it actually happened and that [REDACTED] searched the area himself and found negative results and that the area is very heavily forested, the area was not searched. We could only go on the word of [REDACTED] which seems very reliable.

4. [REDACTED] came into our office in a sober condition. His appearance was good and seemed that of an [REDACTED]. [REDACTED] seemed very sure of himself. Since this incident we have had no further reports of a U.F.O.

OBJET:

Unidentified Flying Object
Boiestown, N.B. - 12 Aug 69

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

1. At approximately 11:45 PM, 12 Aug 69, a telephone call was received at this office advising of a sighting of an Unidentified Flying Object. Complaint was received from a Miss [REDACTED], age [REDACTED] yrs., of Boiestown, York Co., N.B.

2. It was learned that at the time of the sightings, 8 times in the space of approximately 1 hour, Miss [REDACTED] was at her home in Boiestown, N.B., with a friend Miss [REDACTED] of nearby Astle, York Co., N.B., and her mother, Mrs. [REDACTED]. The object was reported to have been oval shape, whitish in color with red and green lights around same. It was reported to move at a very fast rate of speed and would leave a trail or streak of light behind. It was seen at different distances in the sky, from what was described as quite close to well into the sky. It was reported to be large. Same would disappear and then reappear. It was last seen moving away in the direction west of Boiestown, N.B. The night was clear.

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

3. When asked about the fact that it disappeared and would then reappear, Miss [REDACTED], described this as if the object would go behind the stars. It was described as being very large, about the size of a star, however, she was unable to state how large a star was or is.

4. This report comes from the family of a well established person in the community and is felt to be reliable. I do feel that no report would have been made if they had not in fact seen something that they describe as an Unidentified Flying Object.

RE. OBJET: [REDACTED] - U.F.O. Sighting
Michael's Harbour, Nfld. 19 AUG 69

19 AUG 69

1. At approximately 11:30 p.m., a call was received from [REDACTED], Michael's Harbour, N.D. Bay, Nfld. stating that he and other residents of the noted community had sighted an object flying across the sky. The object had been flying approximately the same height as a jet, but much slower in speed.

2. [REDACTED] stated that the persons who had seen the object were: [REDACTED] (b. [REDACTED]), [REDACTED] (b. [REDACTED]), [REDACTED] (b. [REDACTED]), Mrs. [REDACTED] (b. [REDACTED]), [REDACTED] and [REDACTED].

3. [REDACTED] stated at this time that the object was seen at approximately 10:58 p.m. He gave a description of the object seen as having an appearance of a car's headlight seen at night. It was round and displayed a steady beam of light. The object was observed travelling in an easterly direction for approximately ten minutes. He stated there had been only one object sighted in the hazy sky which was prevalent.

4. A message was immediately forwarded via telex to NRC Meteor Center, with information to: CANFORCED, Commissioner, Ottawa and St. John's Sub/Division including all pertinent information to the sighting.

24 AUG 69

5. A patrol was made to Michael's Harbour and the persons who had seen the object were contacted and statements obtained in this regard. Same are being held on file this point. All persons interviewed were approximately [REDACTED] years of age.

6. Although the incident occurred five days prior to being interviewed, there were minor discrepancies among those questioned. Each individual related the time as being approximately 11:15 p.m., but no persons recalled the conditions of the sky at the time of sighting as similar. Differences arose among the individuals as to the color of the light, and the direction of travel when it disappeared. Several persons stated that the light seen had the appearance of a car's headlights at night with a haze shining in the direction of movement of the object. Differences also arose in this regard. Some persons stated that there was a haze while others did not. Those that allegedly saw the haze disagreed as to whether the haze was white or orange in color.

RE:
 OBJET:

PAGE 2.

[REDACTED] - U.F.O. Sighting

Con't from Page One

7. Through an investigation conducted, it was determined although discrepancies arose, that some object unknown was seen by these people. The object seen was white in color and circular. It travelled in an easterly direction at a slow rate of speed at approximately 20,000 feet from the ground. It should be noted here that the point of sighting is approximately twenty air miles from Gander International Airport and shortly after the sighting, a severe electrical storm occurred in this area. The fact that Gander International Airport is only a short distance away and the electrical storm which occurred, may have been the cause or contributed to the cause of the sighting.

8. Although these people have never come to the attention of this office at any previous time and they are unknown to us, this member feels that they did see an object which they could not identify.

9. As no further action is deemed necessary at this point, this file will remain as hereunder noted.

RE. OBJET: Complaint of: [redacted]
367 Montcalm St., Chateauguy, Que.,
Sighting of Unidentified Flying Object.,
HQ 400-9-5

1. With reference to our Montreal C.I.B., G.I. Section's complaint dated 6 AUG 69, pertaining to an unidentified flying object which was observed by Mr. & Mrs. [redacted] residing at 367 Montcalm St., Chateauguy, Que., kindly be advised of the following:-

20 AUG 69

2. This date, Mrs. [redacted] was interviewed at her residence and invited to supply us with the information requested as per paragraph 6 CO- Air of Operational Manual.

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCES A L'INFORMATION

- a) Sighting of object at 11:30 PM, EDT, 2 AUG 69.
- b) Clear sky with no clouds.
- c) Mr. [redacted], DOB [redacted], Mrs. [redacted], DOB [redacted], wife.
- d) At the time they both saw the UFO, they were walking in front of 17 Doucette St., in Chateauguy,
- e) Unknown.
- f) Description of sighting : 1- cigar-shaped, 2- redish glowing light, 3- altitude could not be evaluated, 4- no movement, 5- only one, 6- no sound.
- g) Please note that when the UFO was first noticed, it had a cigar-shape of about 3-4 feet long, then the light diminished inwardly then re-appeared again for a few seconds then disappeared completely. Duration of sighting approximately 1-2 minutes.
- h) The said observers pointed out that from their position the UFO seemed to be over the general area of Montreal and Caughnawaga, which are located North-East of Chateauguy, Que.

3. Please note that when interviewed, Mrs. [redacted] appeared much sincere in her statement. She further stated that her husband and her were much impressed by this sighting.

4. Report distributed in accordance with Operational Manual CO-Air paragraph 7.

RE: sa
OBJET: [REDACTED] U.F.O. Report
Hamton Dist., Sask. - 31 JUL 69

1 AUG 69

1. This date information was received from Yorkton Det. to the effect that the c/n had seen a U.F.O. while she was at the residence of [REDACTED] located 2½ miles west of Hamton, Sask.
2. The c/m was interviewed later this date and the following information obtained in accordance with Oper. Man. CO-Air:
 - a) 31 JUL 69 @ 2:15 a.m. C.S.T.
 - b) clear
 - c) [REDACTED], Gorlitz, Sask.
 - d) 2½ miles west of Hamton, Sask.
 - e) Mrs. [REDACTED], Mrs. [REDACTED], Miss [REDACTED], all of Gorlitz, Sask.
 - f) Desc: Round, appeared to be another star only approx. 3 times as large as Eastern Star, red in colour changing to a yellow-orange colour, no visible movement alone, was seen a little above north-east horizon.
 - g) 1½ hours.
3. The above information was also sent to the appropriate points via Telex Message CAN-74 same date.
4. It is considered that the information received is reliable.

RE:
OBJET:

Unidentified Flying Object
Grand Falls Area, Nfld.
20 JUL 69.

20 JUL 69

1. On this date, at approximately 10:40 P.M., [redacted] 29 Sutherland Drive, Grand Falls, advised that his son, [redacted], and [redacted] had just seen a glowing object flying across the sky. These boys were brought to the office and interviewed. They were observed to be visibly frightened to a point where their story was believed true. An attempt was not made to obtain statements from the boys at that time, due to their frightened condition.

21 JUL 69

2. Telex message #69/239 was dispatched to the O.C. St. John's Sub/Division covering this sighting as directed in Operational Manual, Co-AIR, paragraph 6.

3. The following statement was obtained from [redacted].

STATEMENT OF [redacted] (B: [redacted]),
29 Sutherland Drive, Grand Falls, Nfld.

"Around 10:30 p.m. 20 JUL 69, I was outside playing with my cousin, [redacted], Corner Brook, Nfld. We were playing at the corner of Sutherland Drive and Mayo St. At this time, [redacted] told me to look up in the sky. I looked up in the sky and saw an object that was round. This object was in two different shades of green. This object was moving in the air. There was no sound coming from it. This object flashed into a brighter green and then it went into the clouds. It didn't stay visible very long. It was moving quite fast in the air. I would say that this object was moving faster than a jet airplane in the air. I only saw the object for a few seconds and then it disappeared in the clouds. My cousin, [redacted], saw it longer than I did. At the time that I saw the object, it was raining a bit and the sky was cloudy. It was dark at the time. After I saw this object I got scared and ran in the house. This object appeared to go straight across the sky."

WIT: F.E. CRANTON, Cst.

JGD: [redacted]

4. [redacted], who was visiting the [redacted] residence, returned to Corner Brook, Nfld. Telex message #69/244 was sent to Corner Brook Sub/Div., in order that a statement be obtained from [redacted].

ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

5. On this date the following statement was obtained from [REDACTED].

STATEMENT OF [REDACTED] (B: [REDACTED])
30 Victoria St., Corner Brook, Nfld.

"On Sunday, July 20, 1969, I was visiting my uncle in Grand Falls. About 10:35 p.m., I was out playing with my cousin, [REDACTED]. We were both walking on Sutherland Drive. We were out ahead of my brother, [REDACTED], [REDACTED] and [REDACTED]. They were about ten yards or so behind us, walking in the same direction. It was fairly dark and it was raining lightly. I was looking up in the sky and all of a sudden a greenish coloured object came out of a low cloud, swooped down below the cloud and then went back up into the cloud. I only saw the object for about ten to fifteen seconds, just long enough to get a real good look at it, to point at it and to call to my cousin to look at it. I can't remember hearing any noise, before, after, or during the time I saw the object. The object was a greenish colour and it seemed to glow. I didn't see any light or windows on it. It was egg shaped, longer one way than the other, and it seemed to be travelling with the greater length up and down rather than sideways. There was an exhaust or vapour trail behind the object and this exhaust seemed to evaporate very quickly. I became frightened then and both my cousin and I ran to my uncle's house. I told my uncle and he phoned the police station. Right at the time I saw the object, I didn't get a chance to tell the other boys behind us and I didn't tell them until I got to my uncle's place. I have never seen an item like this before and as it was some distance off I wouldn't be able to say how big it was, except that it looked to be a good size. I have seen quite a few aircrafts in the sky and this object appeared to be bigger than any large aircraft I have ever seen".

WIT: J.J. WYLIE, Sgt.

(S): [REDACTED]

6. From the directions given by both [REDACTED] and [REDACTED], the object appeared to have been travelling from East to West.

7. Both [REDACTED] and [REDACTED] are attending school and appear to have better than average intelligence for their age. Both boys come from respectable homes in their communities. It is felt that their report of an unidentified flying object is true and not a fabricated story.

CONCLUDED HERE:

RE:
OBJET: Unidentified Flying Object -
Grand Falls and Bishop's Falls Area, Nfld.
20 JUL 69.

20 JUL 69

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

1. On this date, at approximately 1:05 a.m., [redacted], Country Rd., Bishop's Falls, Nfld. reported seeing an unidentified flying object travelling in a North Easterly direction.

2. Upon receiving this report, Csts. J. LENSEN and E.F. MacDONALD of our Grand Falls Detachment looked from the Grand Falls Detachment and saw a white light with a reddish glow in a Northerly direction, in the sky. The height of this object was unknown but it was below the cloud cover. This object was watched by both Constables for approximately 10 minutes and then it got real bright and faded out to nothing.

3. The Gander Weather Office was contacted with regard to this complaint and were asked if they could give any information regarding this object. They advised that the object did not show up on their radar and would apparently be non-metallic. They also advised that a weather balloon was released at 5:00 p.m., 19 JUL 69, however, it was to travel East.

4. Telex message #69/239 was dispatched to the O.C. St. John's Sub/Division covering this sighting as directed in Operational Manual, Co-AIR, paragraph 6. It should be pointed out that this message said that [redacted] had reported the light to be blue, green and yellow. This is an error and should have read blue, white and red.

5. On 22 JUL 69, [redacted] was contacted and gave the following statement.

STATEMENT OF [redacted] (B: [redacted])
Country Rd., Bishop's Falls, Nfld.

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

"On Saturday night, at approximately 12:00 AM, I was out behind my home in the garden. I was walking in the garden in a North Westerly direction. All of a sudden ahead of me I noticed an object in the North Westerly direction travelling towards a North Easterly direction. The reason I know these directions are because I had a compass, which I got at my home later on. On first seeing the object, there appeared to be one solid object with three different colours to it. The top of this object appeared to have three or four jagged edges, which were blue in colour. The middle part appeared to be egg shaped and was white in colour. The bottom part

Copy to 7122

RE OBJET:	PAGE
Unidentified Flying Object -	2.

CONT'D FROM PAGE ONE.....

THE BOTTOM PART appeared to be bulbed shaped and was red in colour. The top part, with the other two parts, were heading straight across the sky in a North Easterly direction. I went into the house and got my wife to come out. I brought a pair of binoculars and a compass from the house and went out and watched this object moving along the sky. My wife also went out to watch the object. We both watched the object for quite awhile and then we decided to telephone the Radio Station in Grand Falls. They told me to telephone the R.C.M.P. After telephoning them I went out and watched it again. I watched it until 2:00 a.m. There were a couple of times within the last half hour that it faded out. When the object was fading out for the first time, I noticed another object, which was round and red in colour, come from a South East direction and travelled North at a high rate of speed. This object appeared to go under the first object and then disappeared. The first object that I saw was lower than the cloud cover and didn't appear to be travelling at a high speed. Neither objects made any sound. It appeared that the first object was approximately 4 miles from my house. At the time, the sky was cloudy in the direction that the objects were, but it wasn't raining. I've never seen anything in the sky like this before.

WIT: F.E. CRANTON, Cst.

SGD: [REDACTED]

6. Mrs. [REDACTED] was interviewed and the following statement was obtained from her.

STATEMENT OF [REDACTED] (MRS. [REDACTED]) [REDACTED] (B: [REDACTED])
Country Rd., Bishop's Falls, Nfld.

"Approximately 1:00 A.M. Sunday morning, 20 JUL 69, my husband was outside and he came into the house and told me that he wanted to show me something outside. My husband took his binoculars and compass outside with him at this time. There was an object in the sky, which I have never seen before. The object was blue, red and white. The blue colour was on the top. The white colour was in the centre and the red colour was on the bottom. When I saw the object, it appeared to be long and narrow. This object was heading in a North Easterly direction, in a position which I have described the object. I was looking at the object through binoculars and it appeared much larger but I can't think of anything to describe this object better. I only watched the object for approx. 15 minutes before it started disappearing. This object disappeared for a couple of minutes and then it appeared for a couple of minutes. This went on three or four times. During the time that the object appeared again, another round object came from a South Easterly direction and travelled North under the first object. This second object was travelling at a very high rate of speed. The object only appeared for a matter of seconds and then disappeared. Neither object made any sound. When I saw the first object, at the beginning, the sky was clear. At the last when the object

16 October 1969

Inspector W.F.G. Perry,
A/Officer in Charge,
Criminal Investigation Branch,
Royal Canadian Mounted Police,
Ottawa 7, Ont.

Dear Inspector Perry:

Re my letter of August 22, your letter of August 1 and the
U.F.O. Hunt Club Road Report dated August 11, HQ-400-Q-5 (Vol.4),
69A-400-214, 69-400-255.

I have had the grass sample studied at the Geological Survey
in Ottawa. The grass was given X-ray analysis and the crystalline
substance showed no evidence of a mineral content or any type of
radio-activity. These results indicate that it was some type of
biological mould of which there are many varieties and these may
frequently assume a circular pattern. I might note the well-known
mushroom rings found in Ireland and other parts of the world. Since
no other phenomenon or aerial sighting was associated with this instance,
I see no reason to pursue this further. Thank you for your assistance
in calling this to our attention.

Sincerely yours,

Peter M. Millman

Peter M. Millman,
Head,
Upper Atmosphere Research.

RE:
OBJET:

Unidentified Flying Object
Hunt Club Road, Ottawa, Ontario

11 AUG 69

1. This date the sample of crystalline substance mixed with an amount of field grass was obtained from [redacted], 1225-F Leadbury Street, Ottawa. [redacted] was transported to the location where he obtained the crystalline substance, however, upon arrival at the location it was noted that there was no longer any traces of the substance to be found. An apparent explanation for this is that [redacted] explained to the writer that he picked the substance from the location approximately one month prior to this date and normal weather conditions could have possibly destroyed any remaining samples.

2. [redacted] explained to the writer that his uncle, [redacted], 1438 Hunt Club Road had only seen the crystalline substance on the ground and had not seen anything else unusual in the area. A later conversation with Mrs. [redacted] confirmed this statement. Mr. [redacted], RR #1 Manotick, Ontario, owner of the farm where the crystalline substance was located advised that he also saw the substance in his field. He described such as being located in three near perfect circles, two of which were together and the third circle located approximately 150 feet away. The three circles were described as being 15-20 feet in diameter with a perimeter of 1 ft. wide. There was no substance in the centre of the circle, however, the grass was flattened down in this area. This individual also stated that the crystalline substance found in the field was not a substance used from the farm, and furthermore [redacted] advised that he did not know what the substance actually consisted of.

3. Mr. [redacted], RR#1, Manotick stated that he was the person to discover the crystalline substance somewhere near the 12-14 JUL 69 as he was cutting the grass in Mr. [redacted] field. [redacted] passed over the area with the farm machinery where the crystalline substance was located and a small cloud of dark smoke arose from the ground. [redacted] also stated that he did not see or hear of any U.F.O. or other strange happenings in the area of this occurrence. Numerous other people living in the general area of the occurrence were questioned, however, nobody could supply further information.

18 AUG 69

4. The crystalline substance was left at Dr. Peter MILMAN'S office, National Research Council, Ottawa, Ontario. A further report will be submitted when the results of the analysis are received from

RE:

Unidentified Flying Object, Storeytown, N.B.
1 JUL 69.

1 JUL 69

1. At approximately 9:15 pm, Atlantic Time Zone, Mr. [redacted] of Storeytown, N.B. phoned this office and advised that he could see an Unidentified Flying Object over his home.
2. I patrolled to the [redacted] residence and viewed the object. It appeared to be diamond shaped and shiny white in colour and seemed to be moving very slowly in a N.E. direction. The object was viewed by myself and Cst. G.W. SANFORD at Storetown, N.B. and I viewed the object from Priceville, N.B., which is approximately 8 miles west of Storeytown.
3. When this object was viewed through a pair of binoculars, it appeared to be round at the top and came to a point at the bottom. It also had blue and red specks in it. It may be noted that the object appeared to be directly over us for the full duration of time it could be seen.
4. As the sun set, the object lost its shiny colour and finally disappeared. When viewed by the naked eye, its colour was about the same as the moons when it is visible during the daylight hours, however it was considerably smaller than the moon and appeared to be much closer.
5. The object was in sight for approximately 3/4 of an hour, the sky was clear, with little or no cloud. The wind was very light and the object appeared to be almost stationary.
6. It is felt at this point that the object sighted here was possibly the weather balloon that had been sighted in Sussex, N.B. the previous day. No further action is anticipated at this point.

RE. OBJET:
U.F.O. REPORT - by [REDACTED]
Assiniboia Dist., Sask. (19-7-69)

19 JUL 69

1. At 11:00 AM this date, [REDACTED], who farms 8 miles South of Assiniboia, 'phoned this office and reported that he had sighted an unidentified flying object in the sky at 2:56 AM C.S.T. from the steps of his home. He stated it was in the shape of a round ball with a cone-shaped attachment to the ball, followed by white lines which appear to be an exhaust. The ball was a bright cherry-red, cone being a bluish white with white exhaust lines.

2. A patrol was made to the farm and the following statement obtained:

STATEMENT of [REDACTED], ASSINIBOIA, SASKATCHEWAN
TAKEN: 19 JUL 69

"On Saturday morning, July 19th at 4 minutes to 3, I was standing on the step on the East side of the house. I saw an object that looked like a star to start with, this is what made me notice it, but it was a different color. The more I looked at it, the bigger it got. It came from the East at a terrific speed. It started low on the eastern horizon. The front was a cherry color and looked like a ball, a beautiful color. The second part, the cone shaped part was a purple color, and then the exhaust was a white which came out in straight lines. The exhaust which I saw, this is what made me think it was an object, which had to come out at a terrific force. This object came directly overhead at a terrific speed, no noise and I couldn't smell anything. About the size I would say, of a 5 gallon pail at about 100 feet away. As it went over the house it went out of sight. I ran to the South corner of the house, about 18 feet and it was too late. I couldn't see it anymore. This object did not light up the area. I saw it for about 3 or 4 seconds as it was travelling at a terrific speed. I have seen a satellite and it looked like a star, a speck, but this object, there was no comparison. I immediately 'phoned Moose Jaw and Regina. What puzzled me the most was the exhaust."

WIT: (Cpl. J. R. Warner)

SGD: [REDACTED]

3. [REDACTED] had difficulty in describing the object as to size and altitude. He described the size as being the size of a 5 gallon pail at 100 feet. He felt the object was at an altitude in excess of 13,000 feet. He stated the sky was very clear with many stars. Enquiries in the area failed to locate any other persons who may have sighted this object.

DETACHMENT - DETACHEMENT

NORTH VANCOUVER

RE
OBJET

(BD: ██████████) -Sighting of Unidentified Flying Object
North Vancouver, B.C. 1 JUL 69
(ASSISTANCE TO DEPARTMENT OF NATIONAL DEFENCE)
(NORTH VANCOUVER DETACHMENT CASE) ORG.

1 JUL 69

1. At 2:20 A.M., ██████████ 212 E. 20th St., North Vancouver, B.C. called this office to report that he had sighted a red-coloured object traversing the southern sky. He could not identify the object and felt that the matter should be reported. A telex message outlining full details of the sighting was despatched immediately. Cst. I. GRANT subsequently interviewed ██████████ and obtained a statement on the matter, copies of which are attached hereto.
2. As a result of the interview, Cst. GRANT gained the impression that ██████████ is a truthful individual and that his sighting is quite valid. Investigation has failed to suggest any reason why ██████████ report should be doubted. His name does not appear in the indices maintained at this detachment or "E" Division Crime Index.
3. ██████████ works as a ██████████ and is presently employed by Creative Communications, 161 E. 1st St., North Vancouver, B.C. He spent 2½ years in the R.C.A.F. having attained the rank of LAC. In view of this man's experience in the Air Force, I feel that if the object sighted was any conventional aircraft, he would have identified it as such. After determining that no weather balloons were in use by the Meteorological Station at Vancouver International Airport, he was not able to suggest what the object could have been.
4. No further action is contemplated and unless otherwise instructed, this file will be considered as shown hereunder. Extra copies attached.

CONTINUATION - SUITE DE C237
REV. 1-4-66

RE: [REDACTED] - File # 69-400-44
OBJET: [REDACTED] PAGE

THIS IS THE STATEMENT OF: [REDACTED] taken at 212 East 20th Street, North Vancouver, B.C. 10 JUL 69, 12:30 P.M.

At approximately 2:00 a.m. on the 1st of July 1969, I was standing in the front yard of my house at 212 East 20th Street in North Vancouver, looking in the direction of Vancouver Airport.

I saw what appeared to be the port light of an airplane coming in to land. It was bright red in colour. After a few seconds of looking at it I realized that it wasn't moving. I then went inside the house and got my telescope, which is a TASC0 and was on 35 power.

When I looked through the telescope, I noticed that the light had grown to approximately ten times its original size, however, was in the same location. I observed it through the scope for about ten minutes, during which time I observed it to move slowly in a west-south-westerly direction. It was now decreasing in size. The light was a bright orange colour now, more so on the bottom and right side.

At this time, I went into the house again and phoned Vancouver Airport Met. Section and asked them if they had a weather balloon in the sky, as I thought it could probably be a balloon high enough in the sky to reflect the sun's rays. I was informed they did not, and when I went outside to see if the light was still there, I saw it disappear in the direction I saw it travel.

The weather that night was clear and warm, and the sky was very clear. There were lots of stars in the sky. The moon had a "halo" effect around it, and was in the south.

Witness: (B. GRANT) #26632

**U.F.O. REPORT - R.M. of Charleswood,
Man. - 8 Jun 69.**

- (a) 8 Jun 69 at 12:10 AM.
- (b) Clear sky.
- (c) Cst's WARNKE, R.E. JENKINS, R.H. HINES, and myself.
- (d) Cst's J.A. WARNKE and I were on patrol at the corner of Wilkes Ave., and Harstone Road, Charleswood, and Cst's R.E. JENKINS and R.H.HINES were approx. $\frac{1}{2}$ mile north of us on Harstone Rd. JENKINS and HINES were made aware of this sighting via police radio and they both got out of their P.C. and also observed what WARNKE and I observed.
- (e) One [redacted] of 721 Harstone Road noted JENKINS and HINES and came out with his binoculars, and also observed these U.F.O'S.
- (f) Four round ball shaped objects were seen travelling in a south westerly direction towards both observation points. They were all a bright yellow-orange color flying in somewhat of a formation of pairs, first side by side and changing to one pair on top of the others, remaining at a constant height. Size could be described as slightly larger balls in appearance than the planet Mars, that is large and bright at this time of the year. These seem to disappear one at a time first by leaving a contrail of sparks and then fading out. The first two did this and the third one gained a little altitude, left a glowing trail of particles and faded out. The last one rose rapidly and went out of sight.
- (g) Duration of observation was 12 min. approximately, from 12:10 A.M. to 12:22 A.M.
- (h) WARNKE and I first saw these U.F.O'S and called JENKINS and HINES, and all were out of our vehicles. There was no noise noted along with these objects. [redacted] did not see anything that we did not see through his binoculars, but he did see most of this sighting. These objects did not look like anything that any of us had ever seen before, and they did not look like flares of any sort. Message CHSWD 14 was sent from this Detachment as required in O.M. CO-Air, Para. 6. Extra copies of this report forwarded in duplicate for Headquarters, Ottawa. This file is as shown here-under.

RE: [REDACTED] (Mrs. [REDACTED]) [REDACTED] (BDU)
Report of Seeing Fireballs - Near
Sioux Narrows, Ontario. - 15-6-69
(Asst. to N.R.C. Assoc. Committee)

Receipt is acknowledged of your Kenora Detachment's report dated June 19th, under cover of your Form A-151-1 dated June 26th, 1969. A delay of this length in submitting the report is not in keeping with the provisions of Oper. Man. Re CO-air, para. 4 and every effort should have been made to provide pertinent details to your office as soon as Kenora Detachment was in possession of sufficient data, preferably by telex or telephone, which then could have been followed with the report. Please bring this to the attention of Kenora Detachment.

(Asst. to National Research Council Assoc. Committee) DC-400-7

15 June 69

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

1. During the early AM of this date information was received from the Ontario Provincial Police, Kenora that their officers at Sioux Narrows Detachment had notified that they were witnessing "Fireballs" in the sky immediately south of the Settlement of Sioux Narrows, Ont. The officers were on duty at the time and attended a complaint submitted by the captionally noted concerning these objects.
2. The lights were sighted at approximately midnight of the 14 June 69 and continued until approximately 3:30am of the 15 June 69. Persons who witnessed this incident during that period were the following:
 - Cst. S. WALL - i/c OPP, Sioux Narrows Detachment
 - Cst. B. PURDY - OPP, Sioux Narrows Detachment
 - Mrs. [redacted] - Fickas Road, Sioux Narrows, Ont.
 - Mr. [redacted] - [redacted], Char-Mar Lodge, Sioux Narrows.
3. The reliability of Mrs [redacted] and Mrs [redacted] could not be ascertained however the information provided by the O.P.P. officers is considered to be reliable. A delay was encountered in obtaining this information due to the officers in question working varying shifts and not being available for interview.
4. For your information Sioux Narrows is situated on the shore of Lake-of-the-Woods with many small lakes surrounding and the area is heavily wooded with many rock ridges throughout the region. In compliance with Operational Manual CO-Air, para 4 the following information is submitted:
 - (a) 12:00 MN 14 June 69 to 3:30 AM 15 June 69.
 - (b) Clear with intermittent cloud cover.
 - (c) One mile south of the Settlement of Sioux Narrows in Improvement District of Sioux Narrows, Ont.
 - (d) Frequent throughout period stated, no count was taken of number of occurrences.
 - (e) Brighter than a star.
 - (f) Bright orange reducing to a pale orange or yellow in color.
 - (g) Round, larger than a star, approximately 1/20 size of a full moon.
 - (h) Stayed bright about 6 seconds then reduced in intensity and went out completely for about 10 secs. then became bright orange again.
 - (i) No sound
 - (j) The main light was in the sky west of the settlement and one passed to the north east of the settlement.
 - (k) No other unusual observations.

LOI SUR L'ACCÈS À L'INFORMATION

1. With reference to paragraph 3 of the memo received from the Officer i/c C.I.B. dated 17 JUN 69 please be advised that enquiries were conducted this date. It has been established that the alleged U.F.O. launching that Mr. [REDACTED] observed five miles east of Stuart Lake on 31 MAY 69 was caused by the cleaning of the Trans-Canada Pipe Line
2. Mr. Tom NCCORCHUK, Construction Superintendent with Bannister Construction advised that Bannister Construction was working on the Pipe Line in the Stuart Lake area on 31 MAY 69. He further advised that Sand is shot into the interior of the pipe line and then is released under pressure. The Sand, natural Gas and residue from the interior of the pipe line shoots high into the air leaving a tail of vapours and sand etc. Mr. NCCORCHUK advised that this tail of vapours and sand could be taken for Space Craft taking off.
3. For your information Mr. [REDACTED] is employed by The Bell Telephone Co. and has been transferred to Red Lake, Ontario. Unless otherwise instructed file will remain as hereunder noted. Extra copies attached.

LOI SUR L'ACCÈS À L'INFORMATION

1. In compliance with Op. Man. CO-Air Par. 6 the following information is being submitted.

30 MAY 69

- (a) 30 MAY 69 6.45 A.M. C.S.D. time.
- (b) Sky was cloudy with high overcast.
- (c) [REDACTED] (Mrs. [REDACTED] [REDACTED]
350 Rabbit Lake Road
- (d) Rabbit Lake, Ontario - Approx. 2 miles from Kenora.
- (e) No other persons saw this object.
- (f) This object appeared like two pie plates, was silver in color, was cone shaped at the top, had port holes at the side and had a spinning disc at the bottom. The object was about 200 feet high and moved back and forth like a cradle. When it left it went straight up into the air like a rocket.
- (g) The object remained for approx. 1 Min.
- (h) Photograph "A" attached.

2 JUN 69

- (a) 2 JUN 69 2.30 A.M. C.S.D. Time.
- (b) Sky was clear.
- (c) [REDACTED] (Mrs. [REDACTED] [REDACTED]
350 Robbit Lake Road
- (d) Rabbit Lake, Ontario - Approx. 2 miles from Kenora.
- (e) No other persons saw this object.
- (f) This object appeared like two pie plates and gave off a very bright yellow light. The object stayed stationary.
- (g) The object remained for approx. 1 hr. Mrs. [REDACTED] did not see the object leave.
- (h) Photograph "B" attached.

2. Mrs [REDACTED] is very reluctant to give any more information as she feels that she will be ridiculed by the general public. She requests that her name not be disclosed for this reason. Mrs. [REDACTED] is a source of unknown reliability and is unknown to members of this detachment, also she seems to be very susceptible to suggestion on this subject. RE: [REDACTED] - Fireball Sighting -
7 Miles East of Westport on Westport Rd., Nfld. -
17 APR 69.

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

1. Receipt is acknowledged of memorandum from the O.C. St. John's Sub/Division, dated 21 MAY 69, relative to the above.

"18 APR 69"

2. On the above date, while on patrol in Seal Cove, Nfld., I was contacted by [REDACTED] of the Church of England in Baie Verte. He stated that he had been in Westport the previous night on 17 APR 69. While on his return trip from Westport, at approximately 7 miles east of Westport on the Westport Road, he sighted, what appeared to him to be, a falling meteorite. The time was 8:40 p.m. He said that it appeared to be anywhere from 2 to 10 miles from his position, being extremely bright, probably because of its nearness. He described the object to be of a cone-shaped figure, its centre being a burning orange-red colour, surrounded with blue, which formed the cone-shape. He estimated the object to be about 8 feet long and 6 feet wide at its widest extremity. He further stated that it was travelling extremely fast, heading downwards towards the earth at about a 45 degree angle. He said that it was travelling in a North-westerly direction and estimated the entire sighting to have lasted from about 2 to 5 seconds.

3. Upon returning to Baie Verte, the incident was reported to Cpl. H.G. KENNEDY. Baie Verte Message No. 29 was compiled and forwarded, via SSB, to the O.C. St. John's Sub/Division, 19 APR 69, as per existing instructions.

4. [REDACTED] is the [REDACTED] for the Church of England in Baie Verte. He is considered to be a steady and reliable person, and it is felt that his report is accurate.

CONCLUDED HERE.

RE:
OBJET: Unidentified Flying Object
Sighting from Parliament Hill
5 JUNE 69

5 JUNE 69

1. At approximately 10:15 P.M., while on patrol on Lower Drive on Parliament Hill I observed an object which appeared as a bright falling star descending vertically from an altitude of approximately 2000 feet to approximately 1000 feet north-north-east on the north side of the Ottawa River over Hull, Quebec. It hovered in this position for about thirty seconds, changing colors to red, green, and white. It then proceeded east and appeared to be circling, dropping and rising for about four to five minutes above eastern Hull and Pointe-Gatineau. It then hovered for about five minutes - blinking its lights constantly. At approximately 10:30 it proceeded west of Hull at an altitude of approximately 1000 feet, and came across the river in the Ottawa area and disappeared from view behind high buildings of Wellington St. at approximately 10:35. All this while the object was of no discernable shape. At approximately 10:50 a bright object appeared in the sky due south of Ottawa. It kept its bearings at approximately 1500 feet altitude with a smaller bright object approximately 500 feet below it. The objects disappeared and reappeared at different intervals but disappeared completely at about 11:10 P.M. However, it could not be ascertained if it was the same previously mentioned object. J.P.

2. At 10:19 P.M. all the lights on Parliament Hill (East, West and Centre Block) went out. Mr. L. TESSIER of the Ont. Hydro was notified who said the cause could not be ascertained at the time but could be due to an explosion in the sewers at the corner of Sparks and O'Connor Sts. which was being investigated.

3. This object was sighted by 3/Cst. L.J. FENDER, 3/Cst. W.L. MORRISSEY, Cst. W.S. MAJAURY, [redacted] (age [redacted] of 30 Lay St. Barrie, Ont.), [redacted] (age [redacted] of 147 Cook St., Barrie, Ont.) and [redacted] (age [redacted] of 120 Rodney St., Barrie, Ont.). The civilians mentioned are presently staying at the Beacon Arms Hotel in Ottawa. The sky was clear with a few clouds but visibility was excellent.

4. The above information was passed on to the NCO i/c "A" Div. Desk who advised the R.C.A.F., Base Station at Inlands.

5. Submitted for information purposes only.

RE:
OBJET:

Unidentified Flying Object - Trans Canada Highway -
Approximately 20 Miles West of St. John's, Nfld. - 19 MAY 69.

19 MAY 69

- At approximately 3.45 a.m. of the above date, Mr. [redacted] of 2 Mullock Street, St. John's, contacted this office and stated that he had observed a U.F.O. on the Trans-Canada Highway approximately twenty miles West of St. John's.
- [redacted] who sounded very excited when reporting the incident, stated that he had first observed the light ahead of his car on the Highway, at which time it resembled a star. As he continued East on the Trans Canada Highway, the light disappeared momentarily at which time his car radio cut out, his voltage indicator went to "Discharge" and the car stalled. He then observed the light to his rear, at which time the car appeared to function normally. The light followed him for approximately six miles, during which time he drove at a high rate of speed, and the light had no difficulty in keeping pace with him. There was no vapor trail visible or noise heard, other than from the car and the light was described as something unlike he had ever seen before. As [redacted] went over the crest of a hill, the light disappeared momentarily and he then observed it proceeding over the woods in a southerly direction.
- Mr. [redacted] was alone in his car at the time and there were no other similar reports received at this office. There was also no other vehicular traffic present on the highway at the time.
- The following self-explanatory statement was obtained from Mr. [redacted], with the original being held on file:-

STATEMENT OF [redacted], 2 Mullock Street, St. John's

At approximately 3.05 a.m., 19 MAY 69, I was proceeding East on the Trans-Canada Highway at approximately 20 miles West of St. John's, Nfld. I was alone in my car when I observed a light ahead of me which I thought may have been a star. I continued onward and the light disappeared. Suddenly, my car radio went dead, my alternator went to "Discharge" and the car stalled momentarily. At almost the same time I observed a bright light in my rear view mirror. There was no other traffic around at this time. The light followed me for approximately six miles, during which time it seemed to change positions behind me at will, coming close and/or following behind a little. I heard no noise whatsoever. I drove at speeds up to 100 m.p.h. but the bright light or object had no trouble following me. The only way I can describe it would be as a bright oval shaped, fluorescent type light, unlike any

UNLIKE ANY ... light I had ever seen before. After about six miles, the object veered South over the woods and that was the last I seen of it.

I was perfectly sober at the time of the incident and it really scared me. I cannot offer a logical explanation but, nevertheless, the light was there and it did follow me for approximately six miles, approximately 200 feet to my rear and possibly 20 feet high. It maintained perfect co-ordination with my speed.

(SGD:) [REDACTED]

5. The following telex message was forwarded to NRC Meteor Centre, for information of Canforcehead and Commissioner:-

U.F.O. REPORT:-

- (a) 3.05 AM, 19 MAY 69 (NFLD DAYLIGHT SAVING TIME)
- (b) clear
- (c) [REDACTED] (B. [REDACTED])
2 Mollock St., St. John's, Nfld.
- (d) Trans Canada Hwy, approx. 20 miles West of St. John's, Nfld.
- (e) None known at this time
- (f) One UFO, oval shape, fluorescent colour, unlike any natural light - first appeared as a star approx. 5 miles ahead, and then disappeared momentarily. During disappearance, car radio went dead, car alternator went over to complete discharge and car engine stalled for several seconds. Approx. 1 minute later, U.F.O. was sighted in rear view mirror of car and followed veh. for approx. 6 miles at speeds up to 110 MPH during which time the UFO followed at varying distances and appeared to move at will. No noise heard from UFO. Object then headed South and disappeared over hills.
- (h) [REDACTED] is [REDACTED] of Canadian Cancer Society, Nfld. Division, St. John's, Nfld. and would appear to be a reliable source as far as is known at this time.

6. [REDACTED] is presently [REDACTED] of the Nfld. Division of the Canadian Cancer Society in St. John's and was formerly a School Teacher in the Province for five years. He is known to Members of this Detachment as a sane and responsible individual when sober, but has been known to be unable to handle his liquor when drinking. There was no indication that he was anything but perfectly sober when he contacted this office in this respect. In addition, [REDACTED] was checked by Members of Harbour Grace Detachment at 2.30 a.m. on the date in question at Riverhead, Nfld., and found to be perfectly sober. There was no indication that he had been drinking previously and the time element involved would

ELEMENT INVOLVED WOULD .. not have allowed him any time for drinking. He also states that he was perfectly sober at this time.

7. If [REDACTED] had been under the influence of alcohol, I would doubt his story in view of his previous contact with Members of the Force. There is no indication of similar events of this nature being reported by [REDACTED]. While there is always room for doubt in these incidents, I have no reason to question [REDACTED] statement as being untrue. He is presently employed in a responsible position in St. John's and this incident really disturbed him.

8. In view of the above and unless instructions to the contrary are received, this file will be concluded at this point.

First Report

RE
OBJET:

[REDACTED] - Sighting Of Unidentified Flying Object
West Vancouver, B.C. 18 MAY 69
(NORTH VANCOUVER DETACHMENT CASE) ORG.

18 MAY 69

- At 1:00 a.m. [REDACTED], 2442 Palmerston Ave., West Vancouver, B.C. sighted a brilliant object travelling in the southern sky. He was unable to identify the flying body and consequently he reported the sighting to our Vancouver Sub/Division Headquarters, later this date. The matter was then referred to this detachment for the investigation outlined hereunder.
- Cst. I. GRANT and I went to the [REDACTED] residence and obtained a statement from the complainant, copies of which are attached hereto. After speaking to [REDACTED] for some time I gained the impression that he is a rational individual and that the sighting is quite valid. He at no time suggested that the object was an inter-planetary space vehicle or similar device, but rather opined that it was a very natural phenomenon, possibly some type of "space junk" which was burning up in this atmosphere.
- In an attempt to substantiate the reliability of the file subject, I checked the indices maintained at this detachment and at "E" Division Crime Index, but did not encounter his name. [REDACTED] is gainfully employed by GRAPHIC INDUSTRIES LTD., 566 Homer St., Vancouver, B.C. As a matter of interest, it should be noted that he is the father of [REDACTED]. During this investigation I found nothing which suggests that the reliability of [REDACTED] information should be doubted.
- No other similar sightings, during the time in question, have been brought to the attention of this detachment. No further action is contemplated at this point, unless otherwise instructed. Extra copies of this report attached.

REV. 1-4-66

RE: This is the statement of [REDACTED] (ED: [REDACTED]),
OBJET: 2442 Palmerston Ave., West Vancouver, B.C. taken this 13th day of
May, 1969 at West Vancouver, B.C.

"At 1:00 a.m. 13 MAY 69 I was seated in the living room of my house at 2442 Palmerston Ave., West Vancouver, B.C. when I saw a bright, white light in the sky, travelling from north to south at about 50° to the horizon. The body of light was elliptical and was surrounded by what appeared similar to sparks. It was followed by a small tail of light or sparks. The path seemed to be following a slight arc. The sky was very clear and I had an unobstructed view of it for about 2 seconds. I mentioned it to my wife and she looked up in time to see the tail end of light disappearing. We are living on the side of a mountain and have a panoramic view of the sky to the south. In 15 years of living here, we have very often observed lights of different types in the sky, but I have never seen this type of light before."

RE: U.F.O. REPORT - Fincastle Dist., Alta.
OBJET: 27 APR 69.

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

1. At approx. 1:30 pm 28 APR 69, [redacted]
DB: [redacted] of Box 651 Taber, Alta. and [redacted]
DB: [redacted] of Box 804 Taber, Alta. contacted this office and
advised of seeing a U.F.O. at approx. 2:01 am 27 APR 69. The
following Telex was dispatched to Lethbridge S-Div.

TR 34 U.F.O. REPORT

- a. 2:01 am 27-4-69
- b. Clear, scattered clouds, fairly light from moon
- c. [redacted] DB: [redacted] o/o Box 651
Taber, Alta.
- d. 1/2 Mi. S. of Fincastle, Alta.
- e. [redacted] DB: [redacted] o/o Box 804
Taber, Alta.
- f. 30 - 40 Ft. off ground, one object, large white
light, 2 - 3 Ft. in diameter, narrowed as it came
close, vapour trail approx. 12 Ft. across, grey/
black in colour, travelling North and left North
East.
- g. 5 - 6 seconds.
- h. Moving fast when approaching, slowed when it neared
the vehicle observers were occupying, speeded up when
proceeding North East and went out of sight over some
trees. Terrible odour from vapour trail!

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

2. Further enquiries were conducted in this regard in
the Fincastle Dist., Alta. but no one else could be found who
had seen the U.F.O. [redacted] further advised that his brother
[redacted] (Same Address) and [redacted] of Taber, Alta.
were in the vehicle with himself and [redacted], but that they did
not see the U.F.O. as they were sleeping. They were awakened
by [redacted] and [redacted], and they did see the vapour trail.

3. Extensive enquiries have been conducted as to the
reliability of these subjects and all enquiries have revealed
that these boys are quite dependable. Enquiries conducted with
C/Cst. HACKING of the Taber Town Police in this regard, revealed
that he was also of the opinion that these boys are quite re-
liable.

4. In view of the foregoing and as no further information
could be obtained that might be of any value, this file will be
shown as closed accordingly. Extra copy attached.

RE: [REDACTED] - 'et al' - B. [REDACTED] - Unidentified Flying
Object Report - Portage la Prairie District, Manitoba - 27 APR 69
(CITY CASE)

DF-400-7

ADDRESS: 111-5th St. N.E., Portage la Prairie, Manitoba.

'et al'

- [REDACTED] (Wife), B. [REDACTED], same address as above.
- [REDACTED] (Son), [REDACTED] years of age, same address as above.
- [REDACTED] (Son), [REDACTED] years of age, Same address as above.

27 APR 69

- At 10:35 PM this date Captain V.A. NAUGLER, Duty Traffic Control Officer at the C.F.B. Southport, Manitoba contacted this office and advised that at 10:16 PM he received a report of an Unidentified Flying Object from Mr. [REDACTED] of the above address. Captain NAUGLER gave a brief description of the object and further advised their Traffic control and Winnipeg Airport Traffic Control had no V.F.R. flight traffic in the area or any overdue. The Portage Flying Club was contacted by the writer with negative results. Captain NAUGLER also contacted Winnipeg Search and Rescue in this regard and they advised that they could not search the area unless there was an actual report of a missing air craft.
- Mr. [REDACTED] was contacted immediately and gave the following information concerning the U.F.O. At 9:45 PM he alone was standing in his front yard at the above address, facing in a northerly direction when he noted a pinkish colored light in the sky north of Portage la Prairie, Manitoba. The light appeared as that of a vehicle headlight at a distance of one-quarter of a mile or one-twentieth the size of the moons appearance. It appeared to be approximately one thousand feet from the earth, and five miles north and two miles east of the City of Portage. It was travel from north to south, horizontal to the earths surface but moving in a waving motion, up and down and about three times the light appeared to flash. At about 9:46 he went into the house and returned immediately with his wife and two children, same shown under 'et al' above. They all watched as the light turned in an easterly direction and it flashed about two times once again. At approximately 9:48 the light dropped towards the earth almost vertically, maybe a little from a westerly direction to an easterly direction. As the light dropped it disappeared behind the horizon of the viewer's which was blocked by buildings in the foreground. This was the last the viewer's saw of the light. There was no after affect as it went beyond their horizon. The light had no trailing affect at all nor any audible sound. None of the observers could give any explanation for the sighting. No further complaints were received about this time.
- The general atmospheric conditions in the Portage Area at the time of the sighting were as follows. The sky was absolutely clear of clouds, visability was fifteen miles plus, with no obstructions such as smoke, fog, dust etc., the wind was steady from the north at fifteen miles per hour.
- Cst. L. STRIGHT and Cst. N. TUBBS respectively of Portage H.P. and Det. made a patrol in the general area north of Portage to observe any unusual peculiarities, this met with negative results. Numerous persons in the area were question in regards to the U.F.O., this likewise met with negative results.

RE
OBJET:

PAGE

TWO

[REDACTED] 'et al' - 69P-400-13

CONTINUED FROM PAGE ONE:

28 APR 69

5. At 12:12 AM this date Portage City Det. telex #195 was dispatched to the O.C. Winnipeg Sub-Division and Info. 'D' Division.
6. Later this date the local Portage News Paper was advised of the circumstances of the sighting and published same. The local radio station C-FRY assisted by broadcasting the circumstances to the public and requesting that any person sighting the light contact this office. This met with negative results.
7. At 9:15 AM the C.F.B. Southport, Manitoba sent up a C-45 aircraft to search the area between the base of Lake Manitoba and the City of Portage for any peculiarities, but this met with negative results. There was no report of any missing aircraft which could have been in the area. The area north of Portage is completely flat farm country, swampy in parts with little tree and bush life. The area is moderately populated.
8. As the possibility existed that the light could have been a Gyra-lite used on passenger trains, the C.N.R. and C.P.R. in Portage were contacted. The C.N.R. advised that they do not have such lights on their Units and the C.P.R. which has them advised that there were no trains in the area within two hours before and after the sighting. The Gyra-lite in question is located on top of the head Unit. It rotates in a circle and sends a beam of light at about a twenty degree angle towards the sky. On a clear night only the beam of light can be seen but on an overcast night if the overcast is low enough a light spot will reflect off the clouds. From the description given by the observers this would definitely not have been a Gyra-lite.
9. Although Mr. [REDACTED] was unknown to the members of this Detachment it was felt that the information in question was fairly reliable.

29 APR 69

10. This date further investigation revealed the identity of the U.F.O. At 9:30PM on the date in question [REDACTED], [REDACTED], and [REDACTED] all of Portage were flying a kite in the North Memorial School grounds in Portage, which is located approx. one quarter of a mile north of Mr. [REDACTED] residence. The kite tail piece had a four cell flashlight attached to it. The pinkish color of the light was caused from a red plastic ring which is part of the head of the flashlight. At approximately 9:45 PM the kite string broke and the kite came to the ground about a block south of where it had been flying. This same instance occurred the following night by three unknown youths and was identified as such.
11. Might this file be considered as hereunder noted. Extra copies of this report attached for Headquarters Ottawa.

RE:
OBJET: UNIDENTIFIED FLYING OBJECT - Reported Sighting of -
Douglas, York Co., N.B. - 15 APR 69.

15 APR 69

1. At 12:15 a.m. this date [redacted], Carlisle Road, Douglas, York Co., N.B. reported to this detachment that he had just viewed an unusual flying object flying over the Saint John River and travelling in the direction of Fredericton, N.B. He further stated that he viewed the object through a set of 7 X 50 binoculars and described it as being oval, round, quite large and displaying red, blue and white lights. He believed the object to be flying approximately 3,000 feet above the Saint John River.

2. The Fredericton Airport and Control Tower were contacted and both advised that no aircraft were in the area and none had been in the Fredericton area since 10:40 p.m. 14 APR 69.

3. Radiogram # 145 was submitted to Fredericton Sub/Division in this respect.

18 APR 69

4. On this date [redacted] (Mrs. [redacted]), Carlisle Rd., Douglas, York Co., N.B. was interviewed concerning the sighting of the unidentified flying object. She advised that her husband, [redacted], had first sighted the object at approximately 12:10 a.m. and had called her to view it. She stated that when she first saw it, the object was above the Saint John River, opposite her home at Douglas, at a height of approximately 3,000 feet. She further stated that it appeared oval shaped with a green light on the front of it and a red light to the rear of it. She saw a dome of the top of the object which seemed to emit a bright yellowish-white glow. The object glided through the air and then would hover and appear to take a different shape. The object would move very slowly from one point to another. She further advised that the object would spin at a very fast rate and glow or shine light as bright as the sun striking a bright metal object. She advised that the object glided down the Saint John River in the direction of Fredericton and she watched it for about 15 minutes at which time she left the window and her husband continued to watch it. She advises that the object was definitely not an aircraft.

21 APR 69

5. On this date [redacted], Carlisle Rd., Douglas, York Co., N.B. was contacted and interviewed concerning his sighting of the unidentified flying object. He advised that he first sighted the object at approximately 12:10 a.m. of the 15 APR 69. He stated that the object appear to be about 5,000 feet above the Saint John River proceeding in a Southerly direction, following the Saint John River toward Fredericton. The object appeared to be gliding along and there was

RE.
OBJET

PAGE 2

UNIDENTIFIED FLYING OBJECT - Reported Sighting of -

CONT'D FROM PAGE #1 -----

AND THERE WAS no noise from it. The object was moving slowly at a speed estimated at 100 to 150 m.p.h. At this time [redacted] looked at the object through his binoculars and found the object was oval shaped with pulsating lights of red, blue and white around the middle of the object. [redacted] described the object to look like a hamburger with the pulsating lights set in the concave between the upper and lower points of the object. The lights appeared to be set in approximately 2 feet from the edges of the object. The lights appeared to change colour but not position on the object. The lights appeared to be more red and blue to the front of the object and mainly white to the rear of it. [redacted] did not see any red or green lights at the front or rear of the object. He stated the object would glide along, stop and hover and then gyrate in a wobbling motion and appear to bellow up and down, completely out of shape. The object would then stop and return to its normal shape. At this time the lights were blurred and he could not ascertain their colour. The object was first seen over the Saint John River in the Douglas area and then glided down the Saint John River over the Fredericton area to the area of New Maryland. [redacted] watched the object until it was distant enough to appear as a pinpoint of light and then it disappeared. At this time it was red in colour. The object disappeared in a south-westerly direction from Douglas, N.B. He stated that the object appeared to be 100-150 across and 10 feet thick.

6. No other reports of sightings were reported in the area and the Fredericton Airport Control Tower did not receive any reports of sightings.

7. The weather office at the Fredericton Airport was contacted concerning weather conditions at 12:00 midnight on the 14 APR 69 and it was learned that the temperature was 41 degrees, dew point 29, barometric pressure 30.13, no wind and the skies were clear and visibility was unlimited.

8. From investigation it would appear that the object seen by the [redacted] was not a meteorite and both are positive that it was not an aircraft.

9. The reliability of the [redacted] are not known but after conversing with each of them it would appear that their imaginations may have gotten the better of them as each have read numerous articles on unidentified flying objects and it was learned that each read of similiar descriptions as they gave me of the object they saw. There is no reason to discredit them in their sightings, but on the other hand there is no reason to credit them on what they saw.

10. No explanation is available as to the origin of the unknown object, but should further sightings be reported the appropriate action will be taken.

CONCLUDED HERE.

RE:
OBJET: [REDACTED] - U.F.O. Sighting
Feb. 15/18, 1969 near Liard, N.W.T. 69E 700.6

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

1. On 31 Mar 69 Liard Det. advised they had received information that [REDACTED] had seen an U.F.O. several weeks ago and they requested we interview him. [REDACTED] was enroute from the N.W.T. to Edmonton as seismic work in the area was finished due to spring break up.

1 Apr 69

2. [REDACTED] was contacted and came to the detachment office and supplied the following information. He is the [REDACTED] for Geophysical Services Incorporated and on Feb. 15/18, 1969 the camp was located at 60 degrees 8 Min. Lat. and 123 degrees 31 Min. Long. At approx. 11pm. M.S.T. he saw an U.F.O. moving from East to West 15-20 miles away and at 500' altitude. He watched through a transit (27 power) for 15 minutes and the U.F.O. was travelling 225 degrees azimuth at the same altitude. Described it as round, half reddish orange and half white.

3. FNL67 sent to Prince George S/Div. with the above information included.

4. [REDACTED] resides at 13535 - 113th St., Edmonton. The [REDACTED], [REDACTED], also saw the U.F.O. [REDACTED] was not available for an interview in this regard however [REDACTED] can provide his address if it is required.

5. [REDACTED] was quite definite and clear on what he had seen and I feel he would be a reliable source of information.

6. No further investigation is possible. The area where the sighting occurred is unpopulated, with the exception of seismic crews in the winter months, and all crews left the area about the end of March

7. Extra copies attached. Copy of this report to Liard Det. for their information.

RE:
OBJET:

██████████ @ ██████████ "et al" - U.F.O. Sighting,
Near Fort Liard, N.W.T. - 6 FEB, 1 & 7 MAR, 69.

CARDED

13 MAR 69

1. ██████████ to office and during conversation he mentioned having seen on 3 occasions, U.F.O.'s, which he was first reluctant to discuss for fear of being ridiculed. After being advised of other sightings in Fort Simpson, N.W.T. and Fort Nelson, B.C. he willingly gave the following details.

2. ██████████ is ██████████ for Geophysical Service Incorporated, Camp #422, located at several locations around Liard. In this capacity he is second in charge of the camp. The ██████████ is ██████████ who witnessed all three sightings as well, and actually brought the first sighting to ██████████ attention. ██████████ home address is 239 - 28th Ave. N.W., Calgary, Alberta. At the time these sightings were reported here, the camp was 14 miles from Fort Liard in a north easterly direction. When ██████████ first sighted the first U.F.O., the camp was at a different location, about 10 miles south east of Fort Liard.

3. When these sightings were reported, ██████████ was out of camp and was expected to be away for another 10 days or so. On his return to camp, the camp was moved to Flett Rapids, about 50 miles north of Fort Liard. On Saturday, 29 MAR 69, I departed for Flett Rapids to interview ██████████ but met two local men who had been working for the camp and they advised that work had ceased and the camp was moving out to Fort Nelson, B.C. this date. Fort Nelson Det. were advised and contacted ██████████ and obtained the information contained in Operational Manual CO-air. As soon as it is received from Fort Nelson, it will be forwarded. Prior to these reports, I knew both ██████████ and ██████████ fairly well and consider them both to be very reliable.

4. On Thursday, 13 MAR 69, Fort Smith Sub. Division was advised of the sightings via Liard message, LD-14. The contents of this message are as follows:

UFO Report: First sighting.

(a) 2 AM, 6 FEB 69

(b) Clear, starry sky.

(c) ██████████, Party Chief, Geophysical Service Incorp. Camp 422, Fort Nelson, B.C.

RE: OBJET:	[REDACTED] @ [REDACTED] - U.F.O. Sightings	PAGE -2-
---------------	--	-------------

(CON'T from page one)

(d) 60° 10' Latitude; 123° 30' Longitude (About 10 miles S.E. Fort Liard.

(e) [REDACTED] @ [REDACTED], Mechanic, G.S.I., Camp #422.

(f) Object shaped like bottom half of globe, round, flared on top as if surrounded by round disc. Very bright red in colour, which changed sometimes to greyish blue. Because of brightness, shape indiscernible when red colour, but very clear when greyish blue. Color changes took place very rapidly. Distance about 20 miles north west and 500' above ground. Object sometimes stood still, sometimes moved very rapidly and on occasion moved slowly, always in southerly direction. One UFO sighted.

(g) half hour to one hour.

(h) Object watched through trnasit, 40 power

SECOND SIGHTING:

(a) 12:30 am, 1 MAR 69

(b) Clear, starry sky

(c) [REDACTED], as noted above

(d) Latitude 60° 10' Longitude 123° 15' (About 14 miles N.E. Liard)

(e) [REDACTED], as noted above

(f) Altitude about 1000 ft. above ground, otherwise all other observations similar to first sighting.

(g) ½ hour

(h) Viewed through 40 power transit.

THIRD SIGHTING:

(a) Midnight; around 7 MAR 69, exact date not known

(b) (c) (D) (e) same as second sighting

(f) Around 500 ft. above ground; object not as bright as formerly, otherwise all observations same as previously reported.

(g) 10 minutes

(h) Same as previous sightings.

-3-

[REDACTED] @ [REDACTED] - U.F.O. Sightings

(CON'T from page two)

5. According to [REDACTED], when [REDACTED] sighted the first U.F.O. he got out a transit and put the most powerful lens in camp in it, 40 power, and after watching the object for a while alone, summoned [REDACTED]. After this sighting, both men kept watch on the sky each night thereafter, in hopes of seeing something again.

6. Local enquiries were made but nobody reported seeing any of the U.F.O.'s reported by these two men. The general direction of the sightings was towards Pointed Mountain which is south west of Fort Liard. The location of the camp at the times of the sightings was east of Liard and several hundred feet higher. From this vantage point, the camp overlooked a height of land which is directly west of Fort Liard and which blocks vision in that direction.

7. On Thursday, 20 MAR 69, I patrolled to the Pointed Mountain air-strip, about 15 air miles south west of Fort Liard to conduct enquiries at that point. [REDACTED], Pouce Coupe, B.C. a [REDACTED] for Pan American Oil Co. reported the following sighting. As in the previous sightings, details are as outlined in Operational Manual, CO-air.

- (a) Around 11PM to 1AM, night of 8 MAR 69.
- (b) Clear overhead, possibly some light clouds in area of sighting.
- (c) Noted above
- (d) About 19 miles south east of Fort Liard: Approx. Latitude 60°, 0' Longitude 123°, 20'
- (e) Nil
- (f) When first sighted object was round and red, but not real bright. It travelled, coming in the direction of [REDACTED] and getting brighter as it approached. It then receded, getting darker again as it went farther away until it just vanished in the distance. About 2 - 5 minutes later it appeared again from the same direction and was red in colour. The closer it approached it started to change colour until it was a misty blue or green. It was duller at the edges and fading at the corners. It again receded into the distance changing back to a red colour and finally disappearing. It appeared to be just about on the horizon and there was only one object sighted, always moving south or south east.
- (g) About 2 minutes each time
- (h) The size was estimated at about 50 to 70 feet across.

RE.
OBJET:

Unidentified Flying Object Sighting -
Fish Lake, Y.T. - 4 MAR 69

5 MAR 69

1. This date at 10:20 p.m., [redacted] of Porter Creek, Y.T., reported the sighting of an unidentified flying object at Fish Lake, Y.T. [redacted] was interviewed and the following information obtained. With [redacted] at the time of the sighting, were [redacted] and [redacted], all adult residents of Porter Creek, Y.T.
2. Information obtained from the above mentioned is as follows:
 - a) Sighting made 4 MAR 69 at 8:35 p.m. to 8:45 p.m. Y.S.T.
 - b) Sky clear.
 - c) As noted above.
 - d) All three men were on the ice at Fish Lake near Whitehorse, Y.T.
 - e) Object seen approximately the same time by two teenagers at Whitehorse, Y.T.
 - f) Object first appeared as a round bluish ball. It was stationary at the time and the size was described as half moon. The object split in two; one piece remaining half moon size and the same colour and position; the other piece turned a dark orange colour and appeared to approach the observers and increase to moon size. This second object appeared to move back to object at original position and take on original size and colour. Both objects seemed to fade away completely. The position of these objects was about 10° above the horizon. The direction of the object from the observers was towards the north and no directional movement was noticed.
 - g) The sighting lasted approximately ten minutes.
 - h) Five minutes after the object disappeared, the three men were proceeding to shore with their Ski-Doo. At this time the entire area was lit up by a blue light, similar to that which would be given off by an arc welder. The light made objects all around the lake clearly visible. This flash of light lasted approximately two to three seconds and at this time, the Ski-Doo motor cut out and almost stopped for no apparent reason and started running normally after the flash subsided. The observers indicated that they felt heat from this flash similar to rays of sun passing through window glass. Enquiries from other observers and locally in Whitehorse area indicated that this flash of light was not

[REDACTED] 69-400-103

(2)

(Continued from Page One)

. . . WAS NOT observed by anyone else. The local Department of Transport reported no aircraft traffic in the Whitehorse area between 7:00 p.m. and 11:00 p.m.

3. A sighting was also reported at 8:40 p.m. by [REDACTED] (BD: [REDACTED]) and [REDACTED] (BD: [REDACTED]). These observers were travelling east on Ogilvie Street in Whitehorse when this sighting was made. The object appeared in the north sky approximately 10° above the horizon, was stationary at the time when it was observed, and was described as being perfectly round, very clear in detail and emerald green in colour. This sighting lasted approximately 10 seconds and then the object dropped below the horizon. As it dropped, there appeared to be a burst of flame from one side. Nothing further was seen from these observers.

4. It will be noted that both parties as outlined above made their sighting at 8:40 p.m. of an unidentified flying object in the north sky in the Whitehorse area. It would appear that these observers, although in different areas, were referring to the same object. No further information was received concerning this unidentified flying object and there is no indication that a sighting was made by other persons in the area. Reliability of observers unknown.

RE:
OBJET: **CARDED** Meteor Sighting - Watson Lake Area, Y.T. - 4 MAR 69

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCES A L'INFORMATION

4 MAR 69

1. At 8:40 PM reports were received from the following people that a meteor had passed very low in the area and probably landed near by: Mrs. [redacted] Watson Lake, Y.T.; Mr. [redacted], Irons Creek, Y.T.; Mr. [redacted], Watson lake, Y.T.; Mr. [redacted], Watson Lake, Y.T. All persons are considered reliable in their reporting of what they saw.

2. The following information was passed by telephone to S/Sgt. JOHNSON, Yukon S/Div. N.C.O., in accordance with Operational Manual, CO-Air:

- (a) 4 MAR 69 - 4:40 PM
- (b) Light haze
- (c) Watson Lake, Y.T., Irons Creek, Y.T., Smith River, B.C.
- (d) Once - over Watson Lake, Y.T.
- (e) Very bright - like daylight
- (f) Bright white ball with orange/red tail
- (g) Ball larger than the moon
- (h) Five seconds
- (i) None
- (j) Southwest to Northwest, approaching at 45 degree angle, very low
- (k) Blacked out some T.V. for about 1 1/2 minutes

3. Personnel from D.O.T. stated that the pilot of an aircraft flying at 35,000 ft. reported seeing the meteor below them. D.O.T. submits reports through their own channels.

5 MAR 69

4. Mr. [redacted] of Spartan Exploration, Vancouver, B.C. reported he was driving toward Watson Lake on the Ross River Road 25 miles north of Watson Lake when a very bright, intense light lit the landscape for about two seconds. He did not see anything else. This occurred about 8:45 Pm, by his estimate.

5. Mr. [redacted] stated that five men at his far logging camp, 25 air miles west of Watson Lake were in the bunkhouse and noticed a bright light and at the same time the building shook and the windows rattled as though there were an earthquake. Yet at a camp 15 air miles west of Watson Lake the bright light was seen but there was no vibration. This information was passed to the S/Div. N.C.O. by telephone.

11 MAR 69

6. Mr. L.A. BAYROCK, Geology Division, Research Council

LOI SUR L'ACCÈS À L'INFORMATION

of Alberta, Edmonton, came to the detachment office seeking information. He was given all information available. He advised at this time that the vibrations felt at ██████████ camp could have been caused by the meteor breaking the sound barrier, and if so, it would have landed within a 30 mile radius of the camp.

13 MAR 69

7. Mr. BAYROCK advised that his enquiries were concluded. He questioned the five men at the logging camp and all denied that there had been any vibration. They claim all they saw was a bright light. Mr. BAYROCK is of the opinion that the meteor fragments landed within a 50 mile radius of Stewart Lake, 128 degrees 40 minutes W. and 70 degrees 36 minutes N. He considers the area too remote to continue the search.

RE:
OBJET: Complaint of "UNIDENTIFIED FLYING OBJECT"
Oromocto, Sunbury County, New Brunswick 5 MARCH 69 (TOWN CASE)

5 MAR 69

1. On the above date a complaint was received at this office from Mrs. Constance DOYLE of 25 McLaren Drive, Oromocto, New Brunswick stating that she and her husband (Capt. James DOYLE) had observed an Unidentified Flying Object in the sky the nights of 2 MAR 69 and 4 MAR 69 about 9:00 PM directly above their residence in what appeared to be a fixed position until about 9:30 PM when the object began to move in a Northeast Direction and after moving in this direction for about one-half hour to an hour it disappeared.

2. The U.F.O. was observed on Sunday, 2 MAR 69, and Tuesday, 4 MAR 69 at 9:00 PM, Atlantic Standard Time, for about half an hour until it began to move out of sight. On both the nights the sky was clear and starlight. It may be noted that on the night of 3 MAR 69 there was a snow storm in this area; therefore, nothing could be seen in the sky. The object was described to be larger than a star with a reddish light which at times appeared bright and then went quite dim. Radiogram No. 35 was forwarded to Fredericton S/Division in regards to the above.

3. The Air Traffic Control Tower, Dept. of Transport, Fredericton Airport, Lincoln, New Brunswick was contacted regarding the above and it is believed that the object is the Planet VENUS as it is quite visible on a clear night moving in the manner as described by the complainant.

4. About 7:30 PM on the above date the U.F.O. was observed by [redacted] Oromocto, New Brunswick and myself which was identical as described by Mrs. DOYLE. The sky was clear and starlight.

5. Extra copies are attached in compliance with Operational Manual, CO-Air, Para. 6 for Headquarters Ottawa. In view of the above and unless otherwise instructed this file is being considered as hereunder indicated.

RE:
OBJET:

Unidentified Flying Object
Sighting from Parliament Hill,
4 MAR 69

4 MAR 69

- At 7:45PM, an object was seen from Parliament Hill going through the sky at a terrific rate of speed, heading from south to north. This object stopped and appeared in the sky over Hull, P.Q.
- This object was seen by Commissioner M.F.A. LINDSAY and D/Comm. W.H. KELLY as they drove onto Parliament Hill. This object was also seen by 3/Cst. D.B.BEST, 3/Cst. R.D. LLOYD, 3/Cst. R.V. MCCROSSIN and Cst. W.S. MAJAURY. This object was seen from Parliament Hill near the Privy Council Door.
- After this object appeared to stop it gradually moved in a north west direction and at 9:34PM disappeared from view. The sky at the time was clear and visibility was excellent. This object appeared to have the same shape and colour as a star or planet but was much brighter and larger. It appeared to be round in shape and much smaller than the moon in size. This object was observed from 7:45PM until it went out of sight at 9:34PM. No estimate could be made of the altitude, however it appeared quite high in the sky.
- Captain H.R. WOLFF, R.C.A.F. Uplands, Ottawa, from Base Operations was notified of the object and given the above noted information. Captain WOLFF was notified a short time later and he advised that he would not be taking any action concerning this object.
- In view of the fact that this object was seen by reliable sources, the O.C. Protective Sub-Division was notified of the above information as well as N.C.O. i/c "A" Division Desk. Unless otherwise instructed this file will be closed at this point.

RE
OBJET:

Unidentified Flying Objects -
Ottawa, Ontario - March 4th 1969.

4-3-69

1. At approximately 10:00 P.M. this date, while on foot patrol from the Police Lodge at Government House to the Prime Minister's residence, I noticed two (2) rather bright flashing red lights in the sky. At first glance I assumed that they were aircraft, but could hear no sound of engines. At this time the sky was very clear.
2. One of these lights proceeded east and was lost from view within a minute or less, while the other one travelled in a westerly direction. The light travelling west was visible for approximately 5 to 6 minutes. These lights were first seen directly overhead at a point slightly inside the gates to Government House, and were very bright red. The lights were very clear with no obstructions to hinder visibility. No definite shape could be distinguished nor was any type of trail behind these lights visible.
3. The forgoing information was passed to the Police Lodge via radio and Cpl. MARR reported same to the "A" Div. Desk NCO., Sgt. SMITH. A close watch was maintained for the next hour, while at the Prime Minister's residence, but no further sighting was made.

RE
OBJET:

Unidentified Flying Object
Sighting from Parliament Hill.
4 MAR 69

4 MAR 69

1. At approximately 10:00 P.M., I observed an object at low altitude appear over the Ottawa River, behind the Parliament Building. Upon appearance the object fell straight down and seemed to burn itself out in a short distance.

2. The object was sighted by myself, 3/Cst. R.D.LLOYD, while the sky was clear and visibility was excellent. The object shone like a star, was small and had no discernable shape. In falling it seemed to burn itself out. Just before it disappeared, there appeared to be an orange brown tail.

3. The above information was passed on to the N.C.O. i/c "A" Div. desk, Sgt. Smith. Unless otherwise instructed this file will be closed at this point.

RE
OBJET: Unidentified Flying Object, Onslow,
Col. Co., N.S. - 21 FEB 69.

21 FEB 69

1. At approximately 10:30 P.M. this date, a call was received from [redacted] of Bible Hill, N.S. to the effect that [redacted] of Onslow, N.S. had seen an U.F.O. A patrol was made to the scene by Cst. R.O. PEDERSEN, Truro Hwy. Patrol. He stated that all he saw at this time were the Northern Lights. Cst. PEDERSEN observed that [redacted] and undernoted three witnesses had been drinking and, as a result, concluded that their observations of the U.F.O. would no doubt be unreliable.
2. [redacted] stated the U.F.O. was shaped like an isosceles triangle, with two sides longer than the other. It seemed to be stationary and was lighted around the outside and seemed hollow. The light had a blue tint. It was cloudy on that night with a low ceiling. Mr. [redacted] could not estimate the altitude or the distance of the U.F.O.
3. Mr. [redacted] wife also observed the U.F.O. It stayed in the sky from 9:15 P.M. to 10:30 P.M. and did not move. It went out for 4-5 minutes, but came on again sharply.
4. The U.F.O. was also seen by [redacted] and his wife, [redacted] of Elm St., Truro, N.S. They corroborated [redacted] observations but were unable to supply any additional pertinent information to that of [redacted] and his wife.

3 MAR 69

5. A telex message was forwarded to N.R.C., Meteor Centre, Info: Canforcehead, Commissioner, and "H" Division.
6. Abovementioned message and this report were delayed since Cst. PEDERSEN felt that this reported U.F.O. sighting was part of the Northern Lights, and also difficulty was experienced in contacting the witnesses.
7. Copies of this report in duplicate are being forwarded direct to HQ., Ottawa.

OBJET:

UNIDENTIFIED FLYING OBJECT
Vancouver, B.C. - FEB. 27, 1969

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

- Further to Telex V3CIB/1305 concerning the reporting of this particular flying object, no further information has been ascertained, nor have there been any other sightings in that area.
- It was not possible to physically check out this particular area as it was well back into the mountains and would have had to be covered by air. Mr. [redacted], who works with the Vancouver City Planning Department, is a reliable person and there would be no reason to doubt that he did, in fact, sight something at the instant that he reported same.
- The nature of the weather, which was very bright and very clear, and with the numerous jet aircraft that frequent this area would lead us to assume that what in fact was possibly seen was just such an object and the column of smoke behind it would be the jet stream in the atmosphere.

UNIDENTIFIED FLYING OBJECT - Reported Sighting Of:-
South Devon, Fredericton, N.B. (23 FEB 69)

23 FEB 69

1. At 9.15 P.M. this date, Mr. [REDACTED], 266 Medley St., South Devon, Fredericton, N.B., reported to this Detachment that he and his family had sighted a U.F.O. at the above location. [REDACTED] stated that his neighbour, Mrs. [REDACTED], 274 Medley St., had sighted the U.F.O. first and notified him. [REDACTED] further stated that the object had been sighted at 8:15 P.M. and his son, [REDACTED] had viewed the object through a pair of binoculars.

2. The Fredericton Airport and Tower were contacted and they advised that at the time of the sighting two Vanguard Aircraft and a private Cherokee Aircraft were flying in the area. The Cherokee Aircraft was flying in the Devon Area.

3. Radiogram #85 was submitted to Fredericton Sub/Division in this respect.

24 FEB 69

4. On this date, [REDACTED], Mrs. [REDACTED], [REDACTED] and Mrs. [REDACTED] were contacted and interviewed with regard to their sighting of the U.F.O.

5. Mrs. [REDACTED] stated that she first noted a red and green steady light, approximately the size of a traffic light in the distance. She watched these lights for about 10 minutes. The lights appeared stationary in the air. She advised that the lights were about the wing span of a plane width from each other. She stated that the lights moved in an easterly direction and went out of sight behind a house. Mrs. [REDACTED] first noticed the lights while sitting at her kitchen window and then she went outside and stood on her porch. While in her kitchen she was watching the red and green lights through the crotch of a tree in her yard and for this reason she stated that they were stationary. She stated that while outside a bright white light exploded into view and she watched it for approximately 30 seconds. She heard an airplane approaching and she took her attention from the bright light and watched the airplane. She looked back for the bright light and it had disappeared. She doesn't know

if it disappeared behind a house or not. She stated the bright light was lower in the sky than the airplane. The sightings were noted in an easterly direction from her home at approximately 8:05 P.M.-8:15 P.M. She notified the [REDACTED] before she went out of her house.

6. Mr. [REDACTED] stated that Mrs. [REDACTED] telephoned him at 8.15 PM on the 23 FEB 69 and said there was something strange in the sky. He went out to the front of his house and saw a large red light in the sky. This light was in an easterly direction. He stated that the light stayed in the same position at an altitude of about 1,500-2,000 feet. The red light appeared to be glowing and appeared to be 8 to 10 feet in diameter. After watching the red light for a few seconds it turned a bright white like a electric welders torch and then disappeared rapidly in an easterly direction. The light reappeared after about one minute in a different position, but still in an easterly direction, and still very bright and at the same altitude. The light disappeared in an easterly direction after about two minutes. [REDACTED] stated there was no sound. He further stated that he saw two large airplanes in the distance behind this light and also saw a small plane in the area of Devon. [REDACTED] is certain that the light he saw was no airplane. He stated the light disappeared too quickly to be an airplane together with the fact that there was no sound.

7. Mrs. [REDACTED] stated that she saw a bright red light about the size of a half full moon. As the red light came closer it became bright white and described it as her husband had. She feels the light remained for approximately two minutes and then disappeared in a rapid manner. She noted the light in an easterly direction and it disappeared in the same direction that it came.

8. [REDACTED], [REDACTED] years, stated that he went outside and saw a red glow about the size of a half full moon with what appeared to be red flashing light on the front of it. The glow was moving in an easterly direction. Stated the glow circled over the Fredericton area faster than any airplane. As the glow came closer to him he looked at it through a pair of binoculars and saw it was oval shaped and revolving. He then moved to the back of the house and lost sight of it. He looked for about 5-10 seconds and saw a red spot in the distance. The spot was coming from an easterly direction at a fast rate of speed and as it got closer it got larger and turned from a bright red to a bright white. He states that it was about twice the size of a full moon. He looked at the light through his binoculars

UNIDENTIFIED FLYING OBJECT - Reported Sighting Of:-

3

and saw that inside of the light was a pure white disc approximately 10 feet across and 5 feet thick. He stated that there appeared to be rays emitting from the disc. The disc was described as being like two saucers placed face to face but the upper part was more oval than the bottom portion. The disc was revolving in an awkward manner, like a coin revolving after being spun on a flat surface and coming to a stop, flat on the surface. He stated the light remained about 2 minutes in a stationary position and he went in the house. He did not see the light disappear.

9. No other reports of sightings were reported in the area and the pilots of the three aircraft in the area did not see any unusual lights and nothing was noted on radar at Fredericton Airport.

10. The weather office at Fredericton Airport was contacted concerning weather conditions at 8.00 P.M. on the 23 FEB 69. It was learned that the temperature was 28°, high cirrus clouds at 30,000 feet, cloud opacity was 3/10, visibility 15 miles, winds East at 13 mph, dew point 20 and barometer reading was 30.30.

11. From investigation it would appear that the object seen by the three eye witnesses was not a meteorite and they are very sure it wasn't an aircraft.

12. No explanation is available as to the origin of the light, but should further reports be received the appropriate investigation will be conducted.

RE
OBJET: [REDACTED] (Mrs. [REDACTED]) [REDACTED] - Unidentified Flying Object.
Dawson Y.T. 17 FEB 69.

17 FEB 69

1. At approximately 6:30 PM, [REDACTED] of Dawson Y.T. phoned the police office to report that his wife had just seen an unidentified flying object. He advised that it was observed going over the "DOME". A check was made at the Dawson Curling Club, to see [REDACTED] as she had since gone there. Due to [REDACTED] being occupied at the time no information could be obtained. However it was learned that other people had also seen the object and these were [REDACTED] (BD [REDACTED]), [REDACTED] (BD [REDACTED]), [REDACTED] (BD [REDACTED]) and [REDACTED] (BD [REDACTED]), all of Dawson Y.T.

18 FEB 69

2. The following information was obtained from, [REDACTED] and [REDACTED]

(1) [REDACTED]
Address: Dawson Y.T.

Mrs. [REDACTED] advised that while at her home near the intersection of 6th Ave. and Harper St., Dawson Y.T., on the 17 FEB 69, at 6:05 PM, Yukon Western Standard Time, she had seen an object in the sky that she could not identify. It was described as being round in shape, about the size of a street lamp, bluish white in color and very bright, like a welding arc. The height of it was about half again as high as the "DOME". She stated that it just went across the sky, very fast and disappeared behind the "DOME". The duration of the sighting was approximately fifteen seconds, and only one object was observed. It was not a falling star as she had seen them before. The sky at the time was a little cloudy but stars could be seen.

[REDACTED] is found to be a reliable citizen of the Dawson community.

(ii) [REDACTED] - (BD [REDACTED])
Address: Dawson Y.T.

[REDACTED] stated that he had just come out of his house at the corner of 8th Ave. and Church St. in Dawson Y.T. to go skating when he noticed a bright light in the sky. The time was about 6:45 PM, Yukon Western Standard Time, 17 FEB 69. He was in company of [REDACTED] his sister and [REDACTED]. The location of the object was near the middle star of the "Big Dipper" handle. He stated that when the light was seen, it went up and towards the top of the "DOME". Here it hovered and then went up again, stopped and then flashed out of sight.

RE.
OBJET.PAGE
TWO

[REDACTED] (Mrs. [REDACTED]) [REDACTED]

The condition of the sky was clear, except the downtown area was cloudy. The "Big Dipper" could be viewed and also other stars. The light was round in shape, but the color was not definite. When first viewed, it was light green and then gradually became lighter in shade. Its height was about that of the "DOME" for it could not be seen when it went behind. It definitely was not a shooting star because it was going too slow to be one. There was just the one object seen, and the length of time that it was watched was approximately 30 to 35 seconds.

It is felt that [REDACTED] gave a very reliable description as to what he had seen.

(iii) [REDACTED] - (BD [REDACTED])
Address: Dawson Y.T.

[REDACTED] did not know the time of the sighting, but stated that the sky was clear, when she saw the object. She was with her brother [REDACTED] and [REDACTED] at the time. Its description was that it looked like a star going across the sky, however it was much brighter. The color of it flashed from red to green. She could not give the height, but advised that there was only one object which moved east, slowed down and then sped away. The duration of the sighting was about one minute.

(iv) [REDACTED] (BD [REDACTED])
Address: Dawson Y.T.

[REDACTED] had just come out of the [REDACTED] house with [REDACTED] and [REDACTED] at the intersection of 8th Ave and Church St. Dawson Y.T., when a bright light was noticed in the sky. It was flashing red and green like a traffic light. The height was quite high above the "DOME" and could be seen clearly. The time was approximately 7:30 PM, Yukon Western Standard Time, 17 FEB 69. The object moved fast, then slowed up, and then moved away faster than when it was first seen. The shape of it was like a star. Duration of the sighting lasted about one minute and only one was seen. There were lots of stars visible but none moved like this light.

The information supplied by [REDACTED] and [REDACTED] cannot be taken as being too reliable, due to their young age.

19 FEB 69

3. The following information was supplied by [REDACTED].

(1) [REDACTED] - (BD [REDACTED])
Address: Dawson Y.T.

[REDACTED] stated that he saw a reflection of light on the clouds, which had a diameter of twenty feet. This reflection gradually faded out to nothing. The time of this was approximately 6:15 PM, Yukon Western Standard Time, 17 FEB 69. His location at the time was in his backyard at the intersection of 6th Ave. and Harper St. in Dawson Y.T. This was seen for a duration of five to six minutes. [REDACTED] stated that it was not northern lights as he had checked for them and none could be seen. The light was off white in color and it remained stationary.

Three

Its height was twice that of the "DOME". The sky was clear at the time and the location of the reflection was close to the second star on the "Big Dipper" handle. The shape of it varied from round to oval.

It is felt that [REDACTED] is reliable and would not say anything unless he had something to report.

4. When sufficient information had been obtained, S/Sgt. JOHNSON, Yukon Sub-Division N.C.O., was telephoned at 2:00 PM, 19 FEB 69, so that a telex could be sent in accordance with Paragraph 6 of R.C.M.P. Operational Manual CO-Air.

5. The "DOME" mentioned above is a mountain top just east of Dawson Y.T., with a height of approximately 2900 feet. There are no other people known that viewed this object. This report submitted for information purposes.

RE: [REDACTED] - Report of U.F.O. Sighting
Near Port Clements, B.C. - 17 FEB 69 (UNORG.)

17 FEB 69

1. At approximately 1:15 AM this date a message was received at the Canadian Forces Station, Masset, B.C., from Vancouver Rescue Control Centre stating that they had received a report of an explosion and/or a fire near Port Clements, B.C. This was reported to them by the Department of Transport Station at Sandspit, B.C. who in turn received the information from a Mr. [REDACTED] at Sandspit and a Mr. [REDACTED] of Port Clements, B.C.

2. A patrol was made to Port Clements and Mr. [REDACTED] interviewed in regards to this matter. From his conversation it appeared that what he observed was a meteorite or a U.F.O., therefore a statement was obtained as per Operational Manual, CO-air, paragraph 6. The text of this statement is as follows:

- a) Date and time of sighting: 17 FEB 69 at 12:30AM PST
- b) Condition of Sky: overcast; ceiling of approx. 1500-2000 feet.
- c) Identification of Observer: [REDACTED], Port Clements, B.C.
- d) Location of observer: Approximately four miles south of Port Clements, B.C. on the industrial road to Juskatla, B.C. At 132 14' Long. 53 40' lat.
- e) Identification of other persons also observing UFO: None as [REDACTED] was alone at time of sighting.
- f) Description of sighting: As [REDACTED] was driving South, he observed an object coming towards him from a southerly direction. The object appeared egg shaped, with the pointed end leading. It was bright blue around the tip and outer edges, as consistent with extreme heat, and had a red flaming trail extending from the rear of the object. The altitude could not be established due to the brilliance of the object, however, it appeared about one yard across at ground level. It was travelling at a speed similar to that of a jet driven aircraft.
- g) Duration of observation: approximately 15-20 seconds.
- h) Other relevant information: As the object passed over [REDACTED] he stopped the vehicle and got out, however, he could not see the object, once it had passed over. Approximately two to three minutes later he heard a double explosion, like thunder in the distance. The two bursts were in very close proximity to each other.

[REDACTED] is very well known in the Port Clements area and is believed to be a reliable source of information.

[REDACTED] of Sandspit was interviewed by the Members of Queen Charlotte Detachment, however, he did not see the object. He heard

RE: OBJET.	[REDACTED] - Report of U.F.O. Sighting Near Port Clements, B.C. - 17 FEB 69 (UNORG.)	PAGE TWO
---------------	---	-------------

CONT'D FROM PAGE ONE)

....HE HEARD the double explosion at approximately the same time Mr. [REDACTED] did and felt that it had originated in the Port Clements area, therefore he reported it to the Radio Operator at the Department Station. He was not aware of [REDACTED] report at the time. [REDACTED] is employed by the Department of Transport and is considered a reliable source of information.

4. It was also learned, from further investigation that two persons in the Masset area also observed the object at approximately the same time. These persons were interviewed and statements obtained in the same manner as the statement of Mr. [REDACTED]. The following is the statement obtained from [REDACTED]

- a) Date and time of sightings: 17 FEB 69 at 12:45am PST
- b) Condition of sky: Hazy, slightly overcast.
- c) Identification of Observer: [REDACTED], Masset, B.C.
- d) Location of observer: Standing in his front yard. The Trailer Court, Masset, B.C. 132 8' Long. 54 1' lat.
- e) Identification of other persons also observing UFO: At the time [REDACTED] observed the object he was alone.
- f) Description of sighting: As [REDACTED] went into his yard, he noticed that the area was very bright, almost like daylight. He looked up and saw an object approximately two-thirds the size of a full moon, which appeared about one half mile away, in the sky to the south east. The object was very bright, like mercury lighting and lit up an area on the ground of approximately 75 yards diameter. Upon looking closer, [REDACTED] stated that he observed what appeared to be windows, from which the light was coming. There were eight windows in all, the two in the centre appearing the largest, being one-eight inch across at ground level, with the windows on either side decreasing in size and brilliance as they moved away from the centre. The shape of the object could not be distinguished. It was stationary for the complete period of observation.
- g) Duration of observation: approximately one minute.
- h) Other relevant information: After having observed the object, the lights went out on it suddenly and about three minutes later there was a loud crash with a rumble behind it, very similar to thunder at close range.

This person is known to Members of this Detachment and is felt to be a reliable source of information. At the time of the statement he was not aware of the other sightings.

5. The other statement mentioned was obtained from [REDACTED] of the Canadian Forces Station at Masset, B.C. He did not actually see the object, however, he did see the area light up. He was just leaving the Base, approximately one and one half miles from the [REDACTED] residence when he noticed the area was lit up quite brightly, similar to a very cloudy day, but that the light was of a more fluorescent type. He also stated that the light only lasted about fifteen seconds before

(CONT'D FROM PAGE TWO)

.....ABOUT FIFTEEN SECONDS BEFORE going out. It appeared to him that whatever caused the light was stationary, however, he did not see the object. He was driving his vehicle at the time, and did not hear any explosion, as mentioned in ██████████ statement. He is considered a very reliable source of information. He denied any knowledge of what the other persons involved saw or heard.

6. In conclusion it should be noted that none of these persons are related to one another in any way, and it is felt that there is no corroboration involved. The four observations cover an area of some seventy-five miles, and yet all four statements are identical in some respect. It is felt by the writer that these four persons actually did observe an object, of unknown origin.

"9 FEB 69"

1. At approx. 7:10 P.M. Mrs. [REDACTED] of McLennan, Alta. contacted this office by phone advising that she had just seen a "U.F.O." over McLennan and that it had gone north east over Kimiwan Lake and disappeared. This report was confirmed by other residents of the town.

"10 FEB 69"

2. McLennan Radio Message Mc/19 was forwarded to Peace River Sub-Division advising of the siting.

"14 FEB 69"

3. During the next few days it was learned that a few local citizens were sending hot air filled bags with a suspended candle into the night sky which would give off a reddish glow. Mrs. [REDACTED] was contacted and upon viewing one of these objects stated that it appeared identical to the one she had seen. Further investigation revealed that Mr. & Mrs. [REDACTED] of McLennan let one of the bags go shortly after 7:00 P.M. "9 FEB 69". They advised that it was let go near the shore of Kimiwan Lake and that it proceeded in a north east direction over Kimiwan Lake and disappeared. It was sent aloft near the area where Mrs. [REDACTED] had first saw it.

4. As there was no doubt that this is what Mrs. [REDACTED] viewed Radio Message Mc/21 was forwarded. No further action taken.

10 FEB 69

1. [redacted], [redacted] yrs., Gull Lake, Sask. reported sighting a U.F.O. The following particulars were obtained and telex G14 was dispatched to NRC METEOR CENTRE, Info Canforched & Comm'r Ottawa.

Date & Time: 10 Feb 69. 7.20 PM (MST)

Condition of Sky: Clear

Observer: [redacted]

Location of Observer: Gull Lake, Sask.

Other Observers: [redacted] yrs., [redacted] yrs., [redacted] yrs., Gull Lake, Sask.

Description: Round bright light larger than star, first observed in N.E., moving slowly south. Appeared very far off, slowed down when half way across sky and stopped, turning red and gradually getting smaller until it disappeared.

Duration: five minutes.

11 FEB 69

2. Both [redacted] and his father [redacted] were interviewed and gave a similar account of the sighting. [redacted] had gone to the [redacted] home to visit and at 7.20 PM., while knocking on their door, had observed this object. He immediately informed the [redacted] who came out and watched it move across the sky, until it was almost straight east of Gull Lake and then slowly disappear. [redacted] then came down to the Det. & reported the sighting. [redacted] stated that he thought it went in a zig-zag path as it moved in a southerly direction. [redacted] is a local businessman and is not the type to manufacture a story for publicity purposes. He, together with his son & [redacted] are considered reliable.

3. This sighting was made subject to a news item in the local weekly paper however no other persons came forward reporting a similar sighting. No other sightings have been reported since.

RE:
Unidentified Flying Object
Near Two Hills, Alberta 8 FEB 69

8 FEB 69

- At about 9:50 PM of the above date a telephone call was received at this detachment office from farm location (NW 18-55-12). [REDACTED] reported that upon returning from Derwent, Alberta with her father [REDACTED], brother [REDACTED] and cousin [REDACTED] that they noticed a brilliant object in the sky to the front of their vehicle. At this time they were proceeding west on a district road at location (SW 17-55-12).
- Immediately upon receiving the call Constable SIGMUNDSON and I proceeded via police vehicle to highway # 45 north and west of Two Hills, and prior to reaching the highway I observed a bright object in the sky at a distance estimated at one mile north. The object appeared to change colour, from white to orange to red and then reverse colour. The object was low in altitude and sight of the object was lost for a period of 3 to 4 minutes, before it was again sighted. The next time I saw the object it had appeared to have travelled a great distance west, and at this time the object appeared to blend in with the horizon and seemed to disappear.
- At the detachment office Telex message # 4 was dispatched and sent to Edmonton Sub/Div in compliance with OP: Man. CO- Air.
- Local residents who observed the phenomenon:
[REDACTED] Yrs., [REDACTED] Yrs., [REDACTED] Yrs., [REDACTED] Yrs.,
[REDACTED] Yrs., [REDACTED] Yrs., [REDACTED] Yrs., [REDACTED] Yrs.,
[REDACTED] Yrs., [REDACTED] Yrs., [REDACTED] Yrs., [REDACTED] Yrs.,
[REDACTED] Yrs.
- The above mentioned residences all live in the district in which the object was observed and it is felt that the honesty and integrity of the persons is above reproach and therefore I feel that their observations are creditable.

9 FEB 69

- On the above morning a patrol was made to the Hairy Hill District, accompanied by [REDACTED] of Two Hills. [REDACTED] felt that the object disappeared over Hairy Hill; however, a subsequent search met with negative results with regards to any sightings, by residents in the area.
- Those persons viewing UFO were interviewed and information received
At approximately 9:50 PM [REDACTED] [REDACTED] [REDACTED] and [REDACTED] were travelling west one mile from farm location (NW 18-55-12).
[REDACTED] locked up and saw a bright object pulsating at what appeared to be at a very low altitude.

RE:
OBJET:PAGE
121

Unidentified Flying Object - Two Hills, Alberta 8 FEB 69

Continued from Page 1.

The basic light was rectangular in shape; but when the light brightened the shape increased in size and intensity of light. As it brightened it also turned from a dull to bright in colour. The object crossed the sky in a north to south zig-zag, however, the main direction was westerly. It appeared to move about two miles from north to south. It seemed to travel just above tree top level, and disappeared below the tree tops several times. In completing the zig-zag moves the object would come to a complete stop before reversing direction.

8. During this sighting the carload continued driving, and arrived at the [redacted] farm. [redacted] contacted the persons in the [redacted] farm, and all of those persons in paragraph 4 viewed the object from the [redacted] farm. Further information gathered from the persons who viewed the object from the farm indicated:

When there was a colour change, there was a direction of movement change. The colours definitely noted were: red, yellow, and white. The persons interviewed are unable to associate any specific colour with a direction of flight pattern. The object appeared to drop at Hairy Hill.

9. There is no indication of the time length that the object was viewed. However, it would not be longer than a total of ten minutes. As Cst. SIGMUNDSON was operating the police vehicle he was unable to make any observations of the object.

10. I have travelled a number of times in aircraft, and worked on an RCAF Station at Portage La Prairie, Manitoba. This object was not like any aircraft or helicopter that I have ever seen.

CONCLUDED HERE:

RE: OBJET: Shirley (Mrs. Raymond) KNIGHT (B: [REDACTED])
UFO Report - Fort Simpson, NWT - 6 FEB 69
(Assistance to Canadian Armed Forces) EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

6 FEB 69

1. At 9:30 PM, Mr. Ray KNIGHT phoned to advise that he and his wife had just observed an apparent UFO landing at the D.O.T. Airport, 12 miles south of the town of Fort Simpson. Mr. and Mrs. KNIGHT are known to this detachment and both are considered fairly reliable. They expressed certainty that the object that they had seen was not an ordinary airplane or helicopter.

2. In company with Cst. K.D. GILL, an immediate patrol was made to the scene. In compliance with "C" Department Policy, the following data was obtained from Mr. KNIGHT:

- (a) 6 FEB 69, Friday, 7:30 PM to 9:30 PM (Pacific Standard Time)
- (b) Clear with stars and northern lights
- (c) Shirley (Mrs. Raymond) KNIGHT
- (d) D.O.T. Airport, Fort Simpson, N.W.T. - Through front room picture window of own home, opposite the D.O.T. airstrip
- (e) Raymond KNIGHT, Airport Manager
- (f) Red dot, surrounded by white background with green and blue spikes which sparkled like a piece of crystal. Descended to about 600 or 700 feet above ground level and then to tree top level where it hovered up and down for about 10 minutes before disappearing behind the trees.
- (g) Two hours
- (h) Was not seen again after disappearing behind the trees. No noise was heard as the KNIGHTs remained in their home.

3. With Mr. KNIGHT, a patrol was made across the main D.O.T. strip to its junction with the old unused field. Due to the deep snow it was impossible to continue with a vehicle past this point and since Mr. KNIGHT now expressed uncertainty as to just how far away the object may have landed, there was no advantage to patrolling any farther on foot. Mr. KNIGHT stated that the object may have continued to move after it was cut off from his line of vision as it went below tree top level. D.O.T. Aeradio were contacted but advised that they had not seen an UFO nor had they received any notification of an aircraft in the vicinity.

7 FEB 69

4. Mrs. KNIGHT was interviewed and confirmation of the above data was obtained. To the right is a rough sketch which Mrs. KNIGHT drew at the time she was watching the phenomena.

RE:
OBJET:
[REDACTED] (B. [REDACTED]) - U.F.O. Report,
Near Golden, B.C. 22 JAN 69 UNORG. 69E 700-6

22 JAN 69

1. At approximately 7:50 PM, [REDACTED] phoned this Detachment and advised of two strange lights that he had seen in the sky at 7:30 PM. [REDACTED] lives with his sister, Mrs. [REDACTED], and her family, in the Blaeberry area approximately 13 miles Northwest of Golden, B.C., and he advised that he, as well as some of the others at that residence had seen strange lights on previous occasions which they had not reported. He stated that he had phoned [REDACTED], a local service station owner, previous to phoning this office, and [REDACTED] had advised him to call the Police about the incident.

2. In the morning of the 23 JAN 69, Search & Rescue Headquarters were contacted in the event that the lights could have been from a missing plane, or from a plane in trouble at that time. They advised that they had had no reports of missing aircraft and therefore advised that they were not interested in investigating at that time. Golden telex message #GOL 22 to NCR Meteor Centre, information Kamloops Sub/Division, CANFORCEHED, and Commissioner per Operational Manual CO - Air, paragraph 6, was sent this date.

3. Mr. [REDACTED] was also contacted on the 23 JAN 69 regarding this incident, and he advised that [REDACTED] is a reliable type of person. [REDACTED] himself is a well known local resident, and his information should be regarded as reliable. He stated that after [REDACTED] had phoned him on the 22 JAN 69, he took a drive on Highway #1 towards the Blaeberry area. At approximately 9:30 PM, while driving about 8 to 10 miles from Golden, he noticed a fairly large white light travelling horizontally in the sky near the Mountain Range across the Columbia River. [REDACTED] looked at the light for some seconds through his binoculars and then it went out. He had nothing further to state regarding the light except that he had no idea what it was, and that he had not seen anything like it before. It should be added that [REDACTED] holds a private Pilot's Licence, and is a pilot of some years experience, and has his own plane. He is not available at present for a statement, however it is felt that he will not have anything further to add, as the above information was stated direct to the writer by [REDACTED].

4. On the 24 JAN 69, a patrol was made to the Blaeberry area and statements were taken from [REDACTED], [REDACTED], and [REDACTED] regarding sightings of strange lights. These statements, which are self explanatory, are forwarded herewith. It should be added that all sightings were at night time when the sky was clear. The reliability of all of the above mentioned persons is not known, but all seemed sincere at the time the statements were taken. They advised that they had not reported these sightings previously because of the possibility of adverse local opinion regarding their characters, as is sometimes the case with incidents of this nature.

CONCLUDED HERE.

RE: OBJET:	[REDACTED] (B. [REDACTED]) - U.F.O. Report, Near Golden, B.C. 22 JAN 69	PAGE
---------------	--	------

Statement of [REDACTED], (B. [REDACTED]) taken at Blaeberry on 24 JAN 69 at 3:15 PM.

On the 22nd of January at about 7:30 PM, [REDACTED] and I were just going out to the barn to feed the horses. The horses usually hang around the corner of the barn yard, but that particular day they had been about the centre of the yard, along the fence line. They had been acting up all day and they wouldn't go anywhere near the barn. We got about half way up there and the horses just took off to the top field. We went up to the barn and Janet went inside. I whistled for the horses but they wouldn't come. The stallion came part ways a number of times but he'd shake his head and run back. I went inside the barn to see if the curiosity would bring them down, but they didn't come. I came back out to see what they were doing and tried to call them in again and the stallion did the same as before, so I went back into the barn to see if the curiosity might bring them down again. We were in the barn, and we heard a loud crash in the bush and I thought maybe it was a Bull Elk that had gone crazy from a lung disease they get. I told the girl to head for the house. She ran down to the house and I followed. I ran in and grabbed my rifle and I took my 6 volt flashlight and I ran up to where I've got the hay on a platform. I saw the horses were in the top field along the fence line and they seemed quite uneasy so I shone the light up to see if I could see any game or anything up in there. Then I noticed that the horses were looking in a Westerly direction, and the way they were holding their heads up, I knew there was something attracting their attention. So I sorta turned half way around and looked towards the West. I saw two bright white lights and they were coming down at a 45 degree angle in a Northerly direction. I figure that they were about four miles away from me and about 100 feet apart. When they got to about 500 feet altitude they both went out at the same time. I saw these two lights for about a minute. From the distance away and the altitude and their brightness I figure they would probably measure about 10 feet in diameter up close.

[REDACTED] goat had been acting up all day as well as the horses. The horses hadn't touched their feed all day.

I have seen these strange lights about five or six times previous to this in the last year. They have always looked the same bright whiteness. They have all been farther away except one I saw around the 15th of September at about 7:00 PM. At that time I was emptying a bucket into a hole in the ground when I happened to glance across past the house, and I saw a bright white light travelling horizontally at a terrific speed. I'd say this light was about half a mile from me and about 300 feet high.

I've never seen any lights like these other than the times I've mentioned, and I don't have any idea what they are. I know they're not planes or flares, and I'm sure they're not shooting stars.

RE: OBJET:		PAGE
	[REDACTED] (B. [REDACTED]) - U.F.O. Report, Near Golden, B.C. 22 JAN 69	

Statement of [REDACTED], (B. [REDACTED]) taken at Blaeberry, B.C. on 24 JAN 69 at 2:30 PM.

I don't know the date, it was just before Christmas about 8:00 in the evening. I was Ski-Dooing out front of the house in the field. I was facing up towards the Willow Bank Mountain, in an Easterly direction. I looked up and saw a large round light in the sky travelling South. It was moving straight across the sky. It had a small tail of light behind it. I saw the light for a few seconds and then it went out. I don't have any idea what it could have been. After this I saw a greyish cigar shaped object going the opposite direction. The night was clear, but this time there was no light on it and it came in front of the Willow Bank Mountain. I didn't see any wings on it, so I don't think it was an airplane. I looked at it for about a minute and then came home. This object would have been about a mile and a half from me. I had the Ski-Doo running so I didn't hear any other noise.

ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

Statement of Mrs. [REDACTED], (B. [REDACTED]) of Blaeberry, taken at 2:50 PM on 24 JAN 69.

About the middle of September, 1968, at about 8:00 PM, I was standing at the front window of the house. I looked out and noticed a large yellowish ball, about the size of the moon. I was looking in a South Westerly direction. This object seemed about three miles away and not very high in the sky. It was moving slowly to the left and then it speeded up and then went out. It didn't look like it went behind anything. It just looked like someone turned the light out. I don't have any idea what it was. I had never seen anything like it before, and I haven't since then either.

Statement of [REDACTED], (B. [REDACTED]) taken at Blaeberry on 24 JAN 69 at 3:05 PM.

In the first part of October I was with Uncle [REDACTED] and we were going to town and I looked up into the sky from the car and saw a great big round thing in the sky. It was about 9:00 PM and dark outside. This thing I saw was about twice the size of a star. It went from East to West and just disappeared. I saw this thing for about 5 to 10 seconds. I saw a shooting star before and this thing didn't look like it. Shooting stars just come right down. This thing went straight across. It was about as high as the stars.

RE:
OBJET: Cst. G.J. JARED, #22616 - U.F.O. Sighting
Carmacks, Y.T. - 3 FEB 69

3 FEB 69

1. At 10:00 p.m. this date while driving north towards Carmacks, Y.T. on highway #2, I noticed an unusual white light in the sky towards the Mt. Nansen area. I stopped the vehicle at Mile 96 and observed this phenomenon for at least 5 minutes. It dodged behind the hills at Carmacks, and in order to get a better look, I continued through the village, and up Coal Mine hill to Mile 106. I again observed it for about 5 minutes. There was no noise, movement, or colour, just a pulsating white glow. It appeared about 1/8th. the size of the full moon which was also out that night. The sky was dark, with scattered wisps of cloud, and the other stars were clearly visible.

2. The light still appeared to be about 15 miles away towards the Mt. Nansen area, and about a mile off the ground as it cleared the local mountain tops. However, as we observed it, it grew brighter, then slowly faded softer, and appeared to diminish in size and intensity until it disappeared altogether. [REDACTED], a [REDACTED] for White Pass was also parked at Mile 107, and had observed the same object for several hours while driving south from Pelly Crossing. He was interviewed, and his statement is attached. The reliability of this witness is unknown. Mrs. Gloria JARED, my wife, was accompanying me at the time, and also witnessed the above described object.

6 FEB 69

3. To date local investigation has revealed no plausible explanation for this occurrence. [REDACTED], another [REDACTED] from White Pass Petroleum mentioned that he had observed a similar phenomenon on 24 JAN 69. I was unable to obtain a statement from him at this time, however he gave his address as 312 Hawkins St., Apt. #2, Whitehorse, Y.T. The information contained in paragraphs 1 & 2 was passed to the Yukon Sub/Division on 4 FEB 69 for processing of the usual telex. Any further sightings will be subsequently reported in the prescribed manner.

STATEMENT OF [REDACTED]

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

I left Pelly Crossing at 8:30 p.m. on 3 FEB 69. As I left I saw a white light, with a bit of a haze over it. I was driving south to Whitehorse, and it stayed on my right side. I noticed it again at Five Finger rapids, about 9:45 p.m. I stopped and watched it for a while at Mile 107, for about 2 minutes, then it went real bright, then disappeared over the top of the mountains. That would be about 10:00 p.m.

I saw the same thing about 2 weeks ago, at about the same time when I came through from Clinton Creek. On both occasions the sky was clear, there was no noise from it, no colours, just white; hard to judge movement as the truck was moving. Size would be about like a street lamp.

Yorkton Dist., Sask. - 3 FEB 69. 400-9

et al - [REDACTED] (B: [REDACTED])

3 FEB 69

1. At approx. 10:40 P.M. on the above date, [REDACTED] phoned this office and stated that he and his brother [REDACTED] had just observed what appeared to be an Unidentified Flying Object. The object was described as follows: flashing orange red light approx: 10 to 15 ft. in diameter.

2. An immediate patrol was made to the scene by myself and Cst.P.SHAW and the following statements obtained.

STATEMENT OF [REDACTED] OF YORKTON DIST. SASK.
BEGINS: At approx. 10:30 P.M. on the 3 FEB 69 I was with my brother and we were approx. 5 1/4 miles south of Yorkton, Sask. on #9 Hwy. when my brother saw a reddish orange light to the right. I looked in the direction indicated, which would be approx. south west and to me the object appeared to be approx. 1 1/4 miles away at the time. We didn't think much about it at the time. As we turned west, 6 miles south of Yorkton, Sask., we saw the light again ahead of us. It still seemed to be a mile ahead of us. We followed the light at the same distance for two miles west and then the road came to a dead end. The light seemed to go down behind some trees and we lost sight of it. We turned around and came back east a mile and turned into our drive way. Approx. 150 yds. into our drive way we stopped the truck, as we saw the light again coming back east. We shut the truck and lights of and watched the object for approx. five minutes. It appeared to be coming towards us and then it stopped and started to go west again. It then disappeared and appeared to leave very fast. The light appeared to be an orange misty colour and was constantly going bright and dim. It was just one big mass of light. The light did not turn in a U shape but went straight back and forward. I could see no shape to the object. We shut the truck of and could hear no noise. The object seemed to be lighting and lowering and appeared to be about 100 ft. of the ground.

WIT: B.A.MACKEIL
TIME: 11:15 P.M.

SGD: [REDACTED]

The above statement is held on file at this point.

--------------	------------------	-------------

"CON'T FROM PAGE 1"

HELD ON FILE AT THIS POINT.

STATEMENT OF [REDACTED] OF BOX 447 YORKTON DIST. SASK.
 BEGINS: I was coming south from Yorkton in my father's truck on #9 Hwy. I was making a right hand turn approx. 6 miles from Yorkton when my brother and I noticed a flashing orangy red light due west of the highway. It seemed to be about 1 1/2 miles away. We followed it with the truck and we were gaining on it. It appeared to be from 20 to 100 ft. above the ground. The light seemed to be flashing all over the thing not in one specific area. We followed it to the end of the road and lost sight of it on the other side of a bunch of trees. We watched to see what we could see for maybe five minutes then we turned and came toward home. We made a left hand into our home lane when we saw it again rising from the bunch of trees. We drove another 150 to 200 Yds. and then shut the lights and the truck off and stepped outside. It then started to rise and came toward us, possibly about 35 to 40 mph and stopped halfway in the middle of a field and it seemed to hover moving closer to the ground and then going up again. As it went nearer the ground the light got dimmer and as it went up it got brighter. This all took place about 10:00 P.M. The object then sped of to the west at maybe 3 times the speed at which we had first saw it. In my estimation it could have been 10-15 ft. in diameter in which the light was flashing. I don't think it was a plane, it made no noise whatsoever.

WIT: P. SHAW
TIME: 11:25 P.M. 3 FEB 69.

SGD: [REDACTED]

The above statement is held on file at this point. No one else saw the object mentioned. C.F.B. at Whitespruce Yorkton, Dist. Sask. was notified and stated they saw nothing on their radar.

3. The [REDACTED] brothers are known to members of this detachment and are reliable and honest persons. Telex message YDET27 dispatched as per O.M. Co-AIR Pat. 6.

RE: OBJET
[REDACTED] - "U.F.O." REPORT
8 1/2 miles north of Berwyn, Alberta - 1 FEB 69.

1 FEB 69

1. At 10:15 PM above date a message was received from Peace River Detachment by radio, that one [REDACTED] of Berwyn, Alberta had observed an unidentified flying object (U.F.O.). The scene of this sighting was 8 miles west, 2 miles north, 2 miles west and 1 1/2 miles north of the Town of Grimshaw Alberta, at the [REDACTED] residence. The U.F.O. was observed directly west of this point.

2. An immediate patrol was made to the scene and the subject questioned as to pertinent details of the sighting. The following Telex message was then dispatched:

"U.F.O. REPORT"

- (a) 1 FEB 69 - 9:50 PM mountain standard time
- (b) sky clear
- (c) Observer: [REDACTED] (DB [REDACTED]) of Berwyn, Alta.
- (d) Observer at residence 8 1/2 mi. N. of Berwyn, Alta. at time of sighting.
- (e) Other observers: [REDACTED] - Berwyn, Alta.
[REDACTED] - Berwyn, Alta.
[REDACTED] - Dawson Creek, B.C.
- (f) No definite shape, orangish red and bluish green on top, brightening and fading, a little up and down movement, altitude and distance indeterminant.
- (g) Observed for 5-8 minutes then disappeared.

3. [REDACTED] and the other parties concerned were in a sober state of mind at the time of the sighting and his position in the community as a reputable person is well established. There is no question of character in this instance. As there is no further action required this point regarding this matter this file will be shown as here under.

RE: OBJET: Unidentified Flying Object - Assist. to NRC Meteor Centre.
Near Ste. Rose du Lac, Man. - 2 Feb 69. DG-400-7

2 Feb 69

1. At 5.50 PM, Mr. [REDACTED] of Ste. Rose du Lac, Man. reported that he and his family had just observed an Unidentified Flying Object and if I wanted to see it, to look towards the West just above the horizon. I looked towards the West as instructed but did not see any U.F.O.
2. I talked to [REDACTED] later that evening and learned that his son [REDACTED] ([REDACTED] yrs), around 5.00 PM had been looking out a window on the West side of the house and observed a white light in the Western sky. As he watched, it appeared to go up and down and then it came down to a point just above the tree line. As the object commenced to come towards Ste. Rose du Lac, [REDACTED] mentioned the fact to his sister [REDACTED] ([REDACTED] yrs) and two of her friends, [REDACTED] (BD [REDACTED]) and [REDACTED] (BD [REDACTED]) of Ste. Rose du Lac, the statements of [REDACTED] and the three girls, attached hereto on Appendices "B" to "E" inclusive. According to [REDACTED] and the girls, the object seemed to hover directly over the village of Ste Rose du Lac at a height no greater than approximately 100 feet. It stayed in that position for close to five minutes at which time they observed it was circular in shape, with a dome in the middle. There were lights running along the middle of this object, with the one at the front being red in colour, the next one blue, there was a green light in the middle and the end was black ([REDACTED] described it initially as a black light) There also appeared to be heat waves emitting from this object. The object was silver in colour at that particular time. The object then reversed itself and disappeared to the South-West.
3. [REDACTED] and his wife had been into Dauphin, Man. that afternoon and returning around 5.40 PM, he noticed the youngsters standing outside and looking towards the West. They related the above story to [REDACTED] and while showing him where the object had appeared, he saw a black thin object appear in the West and proceed towards Ste. Rose du Lac. [REDACTED] Sr. claims it was not an aircraft. His statement is attached hereto on Appendix "A".
4. A check with the Dauphin Airport revealed there were two aircraft in that vicinity around 6.00 PM, but nothing in the area prior to that time.
5. In compliance with Operational Manual - Co-Air Para.6, our message #1. was dispatched to our Dauphin Communications at 7.20 PM.

RE: OBJET:	Unidentified Flying Object	PAGE 2
---------------	----------------------------	--------

CONTINUED FROM PAGE ONE:

3 Feb 69

6. Around 5.45 PM this date, [redacted] called me again and reported sighting another flying object in the West and this one was heading towards the South-East. Using binoculars, I observed either a commercial jet or a military aircraft coming from the West and heading in the general direction mentioned by Bishop.

7. The photographs taken by [redacted] and his son were taken on a colour film, only one turned out, having been developed by the Winnipeg Tribune in black and white. The picture is not clear, but a silver object slightly larger than a pin-head can be seen just above the horizon in the general area where the youngsters saw the U.F.O. No definite characteristics of the alleged U.F.O. can be made out from the photograph. After receiving the negatives of the film from the Tribune, [redacted] sent them away to be developed in colour. They were all developed with the exception of the one mentioned above, the negative of which, was not returned. If [redacted] recovers the missing negative, I could have our Ident. Branch develop some prints if the NRC Meteor Centre so desires.

8. I consider [redacted], to be a reliable person, he is a [redacted] for the Village of Ste. Rose du Lac, Man. and is also in charge of the local [redacted]. Although I am inclined to believe his particular sighting may have been the type of aircraft mentioned in Para. 6 of this report, he would not knowingly mislead authorities in matters of this nature. I also believe the teen-agers saw something in the sky and are truthful. However it is difficult to understand why no one else reported the sighting if it was actually that close to the village. Mr. [redacted] who was listed as a witness in our Message #1, did not see anything when the youngsters brought the sighting to his attention (He is a [redacted] at the Ste. Rose High School), but this was after [redacted] had returned home and the object had disappeared.

9. Unless further action is required as per the final sentence of Para. 7, this investigation will be considered closed.

10. Extra copies of this report attached for "HQ" Ottawa.

APPENDIX A

STATEMENT OF [REDACTED] (BD: [REDACTED])
Ste. Rose du Lac, Manitoba Taken: 8 Feb 69

"On Sunday Feb 2, 1969 at approximately 5:40 PM I returned from Dauphin. While driving up the street I saw three girls standing in my yard without any coats on. The temperature was 14° below at this time. The girls were staring towards the sky.

Upon entering the house I asked my son [REDACTED] what had happened. He explained that he and the girls had seen something strange in the sky.

I started to question him on what he had saw and where it had come from. While he was showing me through the kitchen window a black, thin object appeared in the west. This object came towards town. I watched this object for approximately two or three minutes then phoned the R.C.M.P.; took my camera and went out to try and take a picture. Outside my vision was obscured by a telephone cable. This object tilted on it's side, sat motionless for a few seconds, then disappeared up in the air towards the south-west."

STATEMENT OF [REDACTED] (BD: [REDACTED])
2nd Ave. E. Ste. Rose du Lac, Manitoba Taken 8 Feb 69

"On Sunday the 2nd of February, around 5 O'clock I was standing in the kitchen of my home and looking out the window towards the West. I saw a white light up in the sky. I was watching it and it started moving up and down then it went down to just above the tree line and then it went back up onto the clouds then it came back out again. Then it started to come towards town. I mentioned this to the girls who were in the house. It looked as if it was hovering over the Blacksmith's shop. That's when I went outside to take the picture. It was over the Blacksmith's shop for about 5 minutes then it went south west slowly. It speeded up and then it was gone.

This thing was circular and it had a dome on top and it had lights in the middle of it. The first one was red, then blue, right in the middle was a green one then right at the end it looked black."

STATEMENT OF [REDACTED] (BD: [REDACTED])
Ste. Rose du Lac, Manitoba

Taken: 8 Feb 69

"On Sunday, February 2, 1969 between 5:20 and 5:30, [REDACTED] called his older sister [REDACTED] to look out the window at what he believed was a U.F.O. Then [REDACTED] called [REDACTED] and myself to the window to see the object. It was very bright and when it came closer to us it appeared oval shaped with a dome on top. A red light was blinking. There was a black tip in the front and on each end there were heat waves. It moved back quickly to where it was before and started to move southward. [REDACTED] said he saw it appear above the treeline at the West. I then went outside to look at it better. [REDACTED] then came out also and took a picture. It kept moving quite quickly and then went behind a cloud and disappeared when it was about south, south-east. About 5:30 a second object appeared from above the tree line. We had phoned our Science teacher when we saw the first one but he could not see it. We went to see him when the second one appeared and pointed it out to him. This one did not appear to be as close as the other one (first). It was bright in colour then it suddenly started turning black at the tip towards the end. It continued to travel southward a few more minutes (while still black) and the tip changed to a pinkish colour and changed that colour till the end of the object. It then disappeared when it was southward."

LOI SUR L'ACCÈS À L'INFORMATION

"On Sunday, February 2/69 between the time of 5:20 and 5:30 I saw from home a U.F.O. [REDACTED] (drew) pointed this out to me and as we were watching the object moved closer towards up rapidly. It seemed to hover over the blacksmith's shop about two blocks away. The object was self-luminous and very bright. It was dome-shaped and as it seemed to be stopped there were heat waves all around it. There seemed to be something revolving at the bottom of it and it vibrated. On the left side there was a black object and there were lights blinking off and on on the right side. Then it rose quickly in the west and travelled through the sky and disappeared all of a sudden. We went outside and could hear no sound. My parents then came home at 5:30 and as my brother was pointing out the direction it again appeared about ten minutes later. This time the object was much higher and further away. It appeared in the same place. At first it was black and travelled quite rapidly across the sky. Then starting on the right it began turning pink till the object was completely pink. It moved west again and from where we were it disappeared behind smoke from a chimney."

APPENDIX "E"

STATEMENT OF [REDACTED] (BD: [REDACTED])
Ste. Rose du Lac, Manitoba Taken: 8 Feb 69

"Sunday, February 2/69 about 5:20 PM I was over at [REDACTED]. [REDACTED] called his sister [REDACTED] and 3 of us to the window. He pointed out an object in the sky. He had been watching this object for about 15 mins. It was moving terribly fast. We were all fascinated by it. We watched it move - and it moved fast.

It first was white in color. It came very close to us. I saw one bright light on it. It was oval shaped being higher in the center. It had a black thing on the end. It came very close to us. We went outside to examine it closer. It seemed to move closer to us and rush back. When it came closer it seemed to have heat waves around. It was moving terribly fast. From West across by the South and disappeared below the tree line. All of what I saw was directly above the tree line.

Everyone was puzzled at what they saw. [REDACTED] spotted another one in the sky above the tree line about 10 to 15 apart. This time it was black. It seemed stretched out in length. Then it turned a pinkish-orange from one end to another. Then it disappeared. It didn't disappear up or down. It seemed to disappear out of the atmosphere. It appeared the same height but seemed to just push away."

RE: OBJET: Mr & Mrs [REDACTED] - U.F.O. Report
Crossfield District, Alberta - 30 JAN 69

9.35 pm, 30 JAN 69

1. A telephone call was received from [REDACTED] (Mrs [REDACTED]) to the effect that she and her husband had seen a U.F.O. a few minutes before. Mrs [REDACTED] was very upset however she stated the object was disc-shaped and had windows in it. She further advised that her husband was enroute to Crossfield, taking their baby sitter home. The [REDACTED] reside on a farm 4 miles west and 1/2 miles south of Crossfield, Alberta.
2. Mr. [REDACTED] was located in Crossfield and interviewed relative to this matter. He had left the farmhouse immediately after the object had been seen and had not discussed it with his wife to any degree. Mr. [REDACTED] stated the object had been disc-shaped and that he observed windows along the contour of the object. He indicated that there was glowing yellow light coming through the windows and that this was the same colour as a long pointed object coming from the rear of the object. He could not say if the object coming from the rear could have been exhaust. [REDACTED] estimated the object to be the size of a large airplane and to be 2 - 3,000 feet in altitude. He stated it appeared to be about 1 mile north of his farmhouse and proceeding from west to east. [REDACTED] stated he could easily be wrong in his estimate of size and distance as he did not observe the object for more than about 5 seconds. He felt its speed was over 500 mph.
3. Patrol was made to the [REDACTED] farmhouse. Mrs [REDACTED] was interviewed and she stated she had first noticed the object and brought it to the attention of her husband. They had just driven into their yard and were facing in a north westerly direction when she looked out the window and saw what she thought was a meteorite. Both were seated in their truck at this time. She told her husband to "look at the meteorite" however she then took a better look and claims she saw windows in the object. Her husband, seated in the driver's seat of the truck, had to move the sun visor and on looking also saw the object. Mrs. [REDACTED] said the circumstances were the same as described by her husband and that she saw the object for possibly 10 seconds. Mrs [REDACTED] got out of the truck to see the object better however suddenly both the lights and object disappeared. There was no noise heard.
4. When interviewed Mrs [REDACTED] was still upset. She is an amateur astronomer and mentioned that the planet Venus had set prior to their arriving home. There were no stars shining to the north at the time the object was sighted. The sky was clear and there was no haze or mist. The temperature was about 30 degrees below. No Northern Lights were visible. A flare pit was visible

RE:

PAGE

Mr & Mrs [REDACTED] - U.F.O. Report

"2"

A FLARE PIT WAS VISIBLE to the north west of the farmhouse. To the east of the farm is a large Petrochemical Plant that was giving off a large quantity of smoke and steam. Both the pit and Plant are well known to [REDACTED] and as he is a foreman at the Plant he is familiar with them. He stated neither could have caused an illusion similar to the object he saw.

5. Mr. [REDACTED] has been known to myself for about two years. He has been found to be reliable and I consider him to be very level headed. Neither he nor his wife drink alcohol and both were found to be very sincere in telling their stories. Both persons advised that they could be far out in their estimate of size and distance of the object as it was not in their sight long enough for them to really make a good sighting. There are no other occupied farmhouses for about 1 mile in any direction from their farm. No other U.F.O. reports were received from persons in this area.

6. From the investigation made I feel that the [REDACTED] did see something and that their descriptions are the best they could make in view of the length of time they had the object in sight. Crossfield Message 69/2 was sent to Calgary Sub Division. The correct spelling of [REDACTED] was not given in the Telex and might it please be amended.

RE:
OBJET: Unidentified Flying Object - 9 Jan 69

1. Receipt of memorandum from O.C. St. John's, dated 17 Jan 69 is acknowledged.
2. The following is submitted further to our radio message of 9 Jan 69 and in compliance with Operational Manual, CO Air, Par. 6.
 - (a) Thursday 9 Jan 69, 7:30 p.m., "fld. Standard Time.
 - (b) Cloudy with infrequent clear intervals.
 - (c) [REDACTED] (Mrs. [REDACTED]) [REDACTED] Kitchen's Hill, Harbour Grace, "fld.
 - (d) S/Sgt F. GORRELL, Cpl. D. BEAR, Csts. V. STEWART, D. BARNETT, W. TRENHOLM, L. MARSHALL, K.B. MacDOUGALL, Aux Member Reginald PARSONS and Jerome ROSE. Mr. ROSE and Cst. MacDOUGALL viewed the object through 7 x 50 power binoculars.
 - (e) The object was brighter than any of the stars and the moon, appeared to be slightly larger than the North Star. The witnesses varied in stating the object was only circular in shape to it alternating between being circular to triangular. It was sighted North West of Harbour Grace. There was a difference in opinion to whether the object was stationary or whether it moved alternately North and South.
 - (f) There was only the one object and it changed colour from a bright orange to red and back again at frequent intervals.
 - (g) The object first reported at 7:30 p.m. on the 9 Jan 69 and passed out of sight at 8:10 p.m. the same date.
 - (h) There were no sounds coming from this object and no smoke or vapor visible. Although viewed through binoculars it was impossible to see this object clearly.
3. Unless otherwise instructed no further action is being taken.

THE N.C.O. I/C HARBOUR GRACE DETACHMENT

Re: Unidentified Flying Object

1. With reference to your report of 2 FEB 69 there appears to be some conflict between the information contained in para. 2(e) and that outlined in your message HG7 of 9 JAN 69. The message stated that the object was located about northwest of Harbour Grace and then moved west and back to northwest several times, but your report indicates there was a difference of opinion as to whether the object was stationary or if it moved alternately north and south.

2. For record purposes kindly have a brief report submitted clarifying this point.

STILL UNDER INVESTIGATION.

D.D. 28 FEB 69.

Div. File: 69-B-400-12

THE COMMISSIONER, OTTAWA (J. A. McCullough) ^{Insp.,}
Commanding St. John's Sub-Division.

1. FORWARDED with reports from Bell Island and Harbour Grace Detachments dated 22 JAN 69 and 2 FEB 69 having reference to telex message SD96 of 9 JAN 69. Further report will follow.

STILL UNDER INVESTIGATION.

(R. N. Baynes) ^{S/Insp.,}
Assistant C.I.B. Officer.

RE:
OBJET: Unidentified Flying Object -
West End, Bell Island, Nfld. 9 JAN 69

- On 9 JAN 69 at approximately 7.55pm after hearing a conversation over the Police radio at Bell Island Detachment Office concerning an unidentified object, this member made a patrol to the West end of Bell Island to see if the object could be observed from that point.
- The weather conditions at the time were fine with the sky clear. There appeared to be a few light clouds to the East but in all there was nothing to hamper visibility.
- While driving West on No. 2 Rd., I observed a round bright light high in the sky to the North West and it was moving at a downward angle of about 45 degrees to the West. This light was moving at a fairly high rate of speed but not as fast as a falling star. It was also brighter than a star.
- After travelling for about five to ten seconds in this direction it stopped with the light fading and then turning to orange and at infrequent intervals changing to red. At various times this light would fade out to a point and disappear and then return again three to four seconds later. No noise could be heard and no shape of the object could be established.
- The object was observed in the manner mentioned until 8.24pm at which time it faded to a point and disappeared fairly close to the Western horizon. After stopping from it's downward angle the light appeared to be moving very slowly to the Western and then went out of sight. The light was larger than the North star and when first sighted appeared to be much brighter.
- There were no other known observers at this point. The conversation being carried on over the Police radio was from Harbour Grace Detachment to their various Police cars. The members in these cars also had the object in sight.
- In view of the foregoing no further action deemed to be necessary at this point.

RE
OBJET: UNIDENTIFIED FLYING OBJECT
Beaverlodge, Alta., 30 JAN 69

30 JAN 69

1. On this date I was working night shift at Beaverlodge, Alta. At approximately 10:00 PM I was returning to the office when I noticed Mrs. [REDACTED] standing on the corner by the detachment building. I was stopped by Mrs. [REDACTED] and advised that there was an unidentified flying object in the sky west of Beaverlodge, Alta. I sat in the car and observed it for a few minutes. It appeared to be quite distant as it seemed quite small, however, the bright orangy red colour was quite distinct. The colour seemed to change from the first observed orangy red to an off-white. I then parked the car to walk back and take a better look with Cst. D.R. GAETA, who had come outside to observe it along with Mrs. [REDACTED] and myself. When I got back to the corner where I had previously observed it, it had disappeared. It was learned from Cst. GAETA that one [REDACTED] had phoned to advise us that he had observed a U.F.O. of the same description, in the same area. Cpl. W.R. BIGGAR, i/c Beaverlodge Detachment was immediately notified, and the following Radiogram was prepared and sent to Peace River S/D;

RE: ORIG: Mrs. [redacted] - Sighting of Unidentified Flying Object
Near Ucluelet, B.C. 29 NOV 71
(UCLUELET DETACHMENT CASE) UNORG.

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

- At 11:00 A.M. 29 NOV 71, Mrs. [redacted], of Long Beach, B.C., called this office and reported that she and her husband, [redacted], saw a U.F.O. early morning of the same date.
- Patrol made to the [redacted] residence which is situated approx. fourteen (14) miles North of Ucluelet, B.C., on Highway #4. The following story was related to the writer. At approx. 0500 P.S.T., 29 NOV 71, Mr. [redacted] awoke and looked out the bedroom window, as he usually does to see what the weather is like. Mr. [redacted] noticed a bright light in the West just above the treeline. The light appeared to be a star, but was much brighter and larger. Mr. [redacted] jumped out of bed and this is when Mrs. [redacted] awoke. She asked her husband what was wrong and he told her that he had just seen a U.F.O. Both of them then looked out the window and observed a large star which then turned into a round hazy ball of light, first greenish in color, then a reddish pink. A/N stated that this ball of light which was much larger than a full moon, appeared like a moon shining through a cloud. A/N stated there were no clouds in the sky. This hazy ball of light would disappear for a few minutes and then reappear as a large star. After about thirty (30) minutes they lost sight of this star behind the trees. After a few minutes it again reappeared, in the shape of a large ball. Mr. & Mrs. [redacted] observed this object until approx. 0610, at which time they went back to bed. At 0630 Mrs. [redacted] got up and looked for the object but could not see it.
- Inquiries in this area did not reveal any other persons who saw this object. We have had no other reports of this type at this office. Mr. & Mrs. [redacted] are well known in this community and are regarded as rational people.
- On the 2 DEC 71, Ucluelet detachment message #153 was sent to NRC Meteor Centre, with info to Canforched, the Commissioner, and Victoria Sub/Division.
- The weather report for the above noted time and date was obtained from the Department of Transport, Tofino, B.C. and reads as follows. Darkness, partial cloud with some fog, visibility 5 miles, winds calm, 5/10 Alto-Cumulus. The position of this observation is approx. 49 degrees North, 125 degrees 40 minutes West. The D.O.T. had not released any weather balloons, and there were no known aircrafts in the area. Extra copies of report attached.

RE: [REDACTED] - Report of U.F.O.
Wawota Dist., Sask. - 8 OCT 71

NO RECORD
NOV 19 1971
CIB INDEX

27 OCT 71

1. This date we received a C-238 in the mail from [REDACTED] Detachment advising that on the 23 OCT 71, [REDACTED] of Wawota, Sask., stated that on the 8 OCT 71 he observed a U.F.O. [REDACTED] stated that at about 7:00 P.M. on the 8 OCT 71, he was driving near his farm house, 1 mile West and 4 miles North of Wawota, Sask., on the S.W. 1/4 of Section 2, Township 12, Range 1, West of 2nd, when he saw a white light come from the North travelling in a South-East direction. [REDACTED] advised that he would like one of our members to look into the matter.

8 NOV 71

2. After several attempts, I was able to contact Mr. [REDACTED] this date and he advised that he saw a round object approximately 3 feet in diameter moving South-East, at the above location. He stated that this object was white and green and gave off a red trailing light. This object turned over once and appeared to be in the shape of a cone. [REDACTED] stated that he was proceeding East along a municipal road in his vehicle when he first observed this object flying just over the tree tops. HE stated that it appeared this object went into the trees and bounced around in the trees and continued on over his vehicle. He stated that when it went over his vehicle, the vehicle stalled for a second and then started up again on it's own. In all he observed this object for approximately 15 to 20 seconds. [REDACTED] was alone at the time of the sighting. [REDACTED] advised that [REDACTED] of Wawota, Sask., also observed this object.

3. I interviewed [REDACTED] and he advised that he was hunting at a point approximately 5 1/2 miles North west of [REDACTED] when he observed what appeared to be a bright light in the sky South East of his position. He advised that at the time he thought it was a meteorite of some sorts and he did not pay any attention to it.

4. [REDACTED] is not well known to myself or the other members of this detachment, however, after interviewing several of his neighbours and persons in the Wawota, area, it is felt that the reliability of his sighting is in question. [REDACTED] is known to exaggerate on almost everything he sees or does. There is no doubt that [REDACTED] saw something, however, after spending 2 weeks thinking about what he saw he decided to contact one of our members to report a U.F.O.

5. [REDACTED] has gone to the trouble of going out to the field and searching the bush, where he thought this object bounced from tree to tree, however, he stated that he could not find any sign of burning or damaged trees. He advised that he searched the ground in the area for pieces of metal in case this object was damaged going through these trees, again with negative results.

6. There has been no other reports of this nature from the area, although numerous persons have been approached concerning this sighting. It is the writer's opinion that [REDACTED] no doubt observed ameteorite of some sorts and as time passed this object has grown and become brighter in [REDACTED] mind.

7. Telex KIP 19 concerning this matter has been forwarded to the NRC Meteor CENTRE. No copies forwarded direct.

RE:
OBJET: Unidentified Flying Objects -
Hodges Cove, Trinity Bay, Nfld. - 11 OCT 71.

12 OCT 71

1. At approximately 2.50 P.M., [redacted], Clarenville, Nfld., contacted this office and stated that last evening around 7.30 P.M. she was driving from Hodges Cove to Clarenville when she and several other persons in the vehicle saw about 6-8 very bright white lights in the sky. She stated that they did not appear to be the lights of a low flying aircraft as they were all white and then appeared to be too low for stars. She further related that the lights were moving at a very fast rate of speed travelling from West to East.

13-24 OCT 71

2. As per O.M. CO-Air a message was forwarded in respect to the sighting. The complainant together with [redacted] age [redacted], [redacted] age [redacted] and [redacted] age [redacted] were all independantly interviewed at length. They all stated that they saw the lights and that there were about 6-8 of them moving very fast from West to East in the sky, then disappearing into the clouds. The vehicle was travelling on Hodges Cove road which due to its terrain is encompassed with numerous hills and sharp curves to the left and right. The description of the lights varied from a number of light bulbs going on and off to, being similar to the lights on a runway at night landing in a aircraft. There was no definite indication of the altitude of the light as they all disagreed some stating lower than a low flying aircraft to being as high as stars are normally. All occupants stated that the lights were not flares such as a ship in distress or fireworks. The road on which they were travelling is adjacent to Trinity Bay. They all stated that there was no noise accompanying the lights.

3. Mrs. [redacted] the operator of the vehicle did however state that they did pass 5-6 vehicles coming in the opposite direction after seeing the lights. I patrolled to the approximate scene and while returning to Clarenville noted lights in the sky which were made by oncoming traffic. At the time of the sighting it was raining heavily and a gale force wind was blowing. It is felt by this investigator that the lights seen were reflections of head lights of oncoming vehicles and due to the rain, wind etc made the more pronounced than normaly. No other explanation could be uncovered to clarify the lights. Unless otherwise instructed this file will remain as recorder above.

RE:
OBJET:
U.F.O. REPORT - PTH #1, 6 miles East of
Brandon, Manitoba. 27 OCT 71.

27 OCT 71

- At 9.00A.M., this date, report of U.F.O. was received here from one [REDACTED] of Douglas, Manitoba that he had seen while proceeding West on PTH #1 approx. 6 miles East of Brandon, Manitoba.
- DATE & TIME OF SIGHTING:- 8.30A.M., 27 OCT 71 - C.S.T.
CONDITION OF SKY:- Heavy overcast.
IDENT. OF OBSERVER:- [REDACTED] (BD [REDACTED])
Douglas, Manitoba. Occupation - [REDACTED]
LOC. OF OBSERVER AT TIME:- Driving West on PTH #1, approx. 6 miles East of Brandon, Man.
IDENT. OF OTHER PERSONS:- Subject alone.
DESCRIPTION OF SIGHTING:- [REDACTED] described the object as being bright white in colour, shaped like two plates, one inverted on top of the other with a triangular shaped object on the top center. The object appeared to be travelling East over the highway in a climbing attitude, slowly fading and then suddenly disappearing.
DURATION OF OBSERVATION:- Approx. 2 minutes.
- [REDACTED] reported that he left home in Douglas to drive to Brandon and proceeded West on PTH #1 and at a point approx. 6 miles East of Brandon happened to look in his rear view mirror. He stated that when he did he saw the above described object directly above the highway apparently moving in an Easterly direction. He was unable to determine how far away it was but stated that the object seemed to lift up on its North side, then levelled off, slowly faded and then suddenly disappeared. He stressed the point that what he saw was extremely bright white in colour, clearly visible and very large in size. [REDACTED] claimed that he watched the object in his rear view and side view mirrors for approx. 2 minutes before it disappeared and stated that it was clearly visible and definitely not an airplane. When questioned as to traffic on the highway at that time, [REDACTED] stated that there was a semi-trailer and other cars on the road but the drivers did not appear to notice the object he saw.
- In view of the foregoing, telex message was forwarded from this point in compliance with Op. Manual CO-Air, Para. #6.
- Checks were made with the Communications people at the Brandon Municipal Airport with respect to weather and air traffic at the

(CONTINUED FROM PAGE NO. 1)

TRAFFIC AT THE time of the sighting, where it was learned that no light aircraft were flying that particular morning due to heavy winds. It was further learned that they have no knowledge of any aircraft which might have been in this area at the time, but that it was extremely unlikely that an aircraft would be that close to the airport without their knowledge. The weather at 8.30A.M., 27 OCT 71 was cloudy with 1200 foot ceiling and 15 miles visibility, wind was 290 at 17 MPH.

6. Enquiries were conducted in the general area of the sighting however nothing of value was learned with no more sightings being reported and nothing apparently amiss or unusual noted. Checks were also run on ██████████ to determine his reliability and it was found that this subject is not known to the Brandon City Police but our Detachment indices indicate his involvement as a Juvenile in 1966 in a B.E. & Theft wherein no charges were laid. This subject was quite in earnest when interviewed and did not hesitate either in reporting this incident or in describing what he saw. However he claims that there was East bound traffic on the highway at the time of the sighting and indicates that it was a bright white colour clearly visible and large in size. This brings to mind the question as to why this object was not seen and reported by the people traveling East on the highway at the same time as he indicates it was so obvious as to be clearly visible through his rear and side view mirrors.

7. As no further sightings have been reported here to date and as nothing new has been uncovered in this regard, file being considered as shown hereunder. Extra copies of this report attached.

RE:
OBJET: Fireball Sighting
Nr. Rosalind, Alta. - 2 OCT 71.

"2 OCT 71"

1. As stated through Camrose Telex #100 I sighted a fireball on the above noted date. The following observations were made and are listed below as set out in the Operational Manual.
 - A. The fireball was sighted on the 2 OCT 71 at approx. 10:30 P.M.
 - B. The sky was clear with light scattered clouds and a full moon.
 - C. The fireball was observed approx. 3 miles north of Rosalind, Alta.
 - D. Two bursts were noted. The first burst on the initial sighting and the second burst occurred when the fireball appeared to burn out.
 - E. The initial burst compared in brightness with an extremely bright flash of lightning. The trail of the fireball appeared to be two or three times as bright as the moon.
 - F. The color of the fireball changed from a bright yellow/orange to a greenish blue similar to a mercury vapor light.
 - G. The fireball appeared approx. two times as large as the moon in relation to the moon.
 - H. The fireball was observed in flight approx. 3 seconds. The trail remained approx. 8 to 10 seconds.
 - I. No sound was audible as the observation was made from a moving vehicle.
 - J. The fireball travelled from the northwest to the southeast at approx. a 30° angle above the horizon and an approx. 10° downward angle.
 - K. The trail of the fireball grew in intensity after the fireball burned out for approx. 4 seconds and then faded from sight in another 4 to 5 seconds. On the second burst the fireball appeared to explode into small fragments and fade out.
2. This file will be shown as concluded unless further information is required. In that event the file will be re-opened and a further report will be submitted.

UNIDENTIFIED FLYING OBJECT REPORT
[REDACTED] (BD: [REDACTED]) Observer

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT /
LOI SUR L'ACCÈS À L'INFORMATION

1. Further to Telex number WD1146 dated 30 SEPT 71 sent to NRC METEOR CENTRE and CANFORCED, Info to COMMR Ottawa, as per CO-Air Para. 6, Operational Manual, this report is being sent to enlarge upon the details of the sighting and to advise as to what the statements of the person reporting and his friends are in this regard.

2. [REDACTED] called this office and advised that on the 19 SEPT 71 at approx. 3:30 - 4:00 A.M., he and his friends had seen a flying object unlike anything they had ever seen before. Apparently the object flew across the highway in front of their vehicle and then stayed stationary in the air just to the East of the highway (#6) and sat there and spun making a humming sound. It was also stated that they continued North on #6 highway and that the object seemed to be following them, and did so until they reached the town of St. Laurent, Manitoba, about another 30 miles up the highway.

3. [REDACTED] (BD: [REDACTED]) and [REDACTED] (BD: [REDACTED]), both of 283 Lulu Ave., Winnipeg, and their companion [REDACTED] (BD: [REDACTED]) of 507 Boyd Ave., Winnipeg, all saw it and came into the office to give statements relating to the sighting of this object. Statements are attached hereto as Appendix "A", "B" and "C" respectively.

4. Report of the sighting was sent to the local Police forces in the area where the object was said to pass through and there had been no confirmation of this report by them or made to them.

5. Attached hereto as Appendix "A1", "B1" and "C1" are photostat copies of the diagrams drawn by each one of the observers, as they think the object looks.

6. Unless further action is required at this point, this matter is concluded here. Original of statements to be held on file this point.

U.F.O. Report - [REDACTED] - Observer

PAGE 15

APPENDIX "A"

STATEMENT OF [REDACTED] (BD: [REDACTED]) 283 Lulu Ave., Winnipeg, Manitoba. Phone: 786-1833 Unemployed at present. Taken: 4:10 P.M. 19 SEPT 71 Winnipeg Detachment office.

We were going North on #6 highway towards Ashern about 3:30 - 4:00 A.M. 19 SEPT 71 and my brother, [REDACTED], said look. He said he saw a flash across the highway in front of the car. [REDACTED] was driving at the time. Then we looked up and saw this big spotlight, a big white light on the right side of the highway. At this time it was about a mile or a mile and a half in front of us. We were about 10 miles from the Perimeter. It was ahead of us and just off the highway and was moving real slow so we speeded up and got along beside it and we stopped the car and turned it off. We rolled down the windows to see if we could hear anything. At this time the object was just sitting still and was spinning. It was only about 50 - 75 yards away. There was sort of a humming noise, low pitched of medium volume. It was quiet enough that if you were inside a house that you wouldn't hear it. You'd have to be outside.

The object was shaped like two saucers, one on top of the other and there was a red light on the left side in the middle, and a green light right in the very centre of it and a white light to the right of it still in the middle. The lights appeared to be stationary and just blinked on and off while the rest of it was spinning. The red and green lights were both flashing together while the white one stayed on, I think. It spun there like that for about 30 seconds. Once it tilted, the back side of it (the other side from us) seemed to drop down and then it righted itself again.

Then it took off real slow, about 15 m.p.h. I guess, towards the South. It seemed to be following the highway. [REDACTED] said let's turn around and follow it and see what it is. [REDACTED] and I didn't want to and we continued North to go into Woodlands to see if we could find an R.C.M.P. It was about three miles away, we couldn't see the shape any more but we could still see the lights flashing. We still kept on going North and then it seemed to catch up to us rather than going farther away. Then we told [REDACTED] that it was catching up and [REDACTED] turned to see it but I don't think he would because he was driving. It seemed to be catching up to us and it got about a mile away and then we couldn't see it anymore because we went past some trees. Then we hit Woodlands and we saw that it was just a store so there wouldn't be any R.C.M.P. there and we kept on driving. From that time we first saw it until we lost it behind the trees approx. 10 minutes had passed and all this time it was within eye sight.

After we took the turn in the highway we saw it again behind us and we saw it all the way up to St. Laurent. Then a gravel truck was coming up behind us and we lost sight of it. Gordon says he saw it cross the highway, but we never saw it after that. I guess about a half hour or 45 minutes had passed since we lost it behind the trees, down at Woodlands, for about 10 or 15 minutes.

U.F.O. Report - [REDACTED] - Observer

APPENDIX "A"

STATEMENT OF [REDACTED] (cont'd)

Then we never saw it after that.

- COLOUR - It must have been a dark colour because it was a clear night and we could see the stars and the Northern lights, because we couldn't see a colour, really, just the outline of it and the lights blinking on and off continually. I think the white light stayed on continually.
- SHAPE - It was like two saucers being upside down on top of each other but more oval. The bottom half of it was deeper or thicker, than the top half. When we were up close to it, 50 - 75 yds., it seemed to be about a car length long and a car width deep.
- ALTITUDE - When we saw it up close it was about 30 feet off the ground. It seemed about the same distance from the ground while it was moving both South and then again to the North. If it was much higher than that we wouldn't have lost it behind those trees. When we saw it the second time, after going around the bend, it was out over the fields, farther and seemed to be up higher.
- MOVEMENTS - The object seemed to be following the highway. Every time the highway curved it would sort of curve too. It stayed on the right side of the highway and sort of ran parallel to it most of the time. It ran parallel to the ground when it moved and when it was motionless and just sat spinning. We only saw the one object.
- DURATION - About 45 minutes I think, I don't know. I kept watching it. I didn't keep an eye on the time. There was that one time in there for about 10 minutes when we didn't see it.
- SOUND - It was a constant humming noise. I don't think it varied. It didn't increase in volume or pitch when it started to move off.
- Q. Had you had anything to drink prior to this?
A. No, it was at least 2 weeks ago that I last had anything alcoholic.
- Q. You aren't on drugs or anything are you?
A. No - alcohol yes, but drugs no.
- Q. When was the last time you had some sleep? How many hours previous and for how many hours did you sleep?
A. The last time I slept was about 13 hours previous. I had gotten about 11 hours of sleep.

1

APPENDIX "B"

STATEMENT OF [REDACTED] (BD: [REDACTED]) 283 Lulu Ave., Winnipeg, Manitoba. Phone: 772-4680 [REDACTED] - employed by Heinrich Ltd., 75 Archibald Ave., Winnipeg 6, Man. Taken: 5:15 P.M. 19 SEPT 71 Winnipeg Detachment office.

We were going out chicken hunting and we just got about 10 miles out of the city and I spotted this big white light crossing the road ahead of us. I called [REDACTED] and [REDACTED] attention to it and I thought that it was a plane or something. It was quite a ways off and the light was kind of bright, like a big spotlight. I went faster in the car to catch up to it to see what it was. We caught up to it and it was just floating there. It was just about a 100 yards or so away. Then we stopped the car and shut it off and rolled down the window to listen to it. It was making a humming sound. There didn't seem to be a variation in the pitch. It was loud enough that we could hear it.

There was three lights on it. A big bright white one, a red and a green (they were smaller than the white one). The white light seemed to have faded because it was not as bright as when it was farther away.

We were going North on #6 highway and it followed us for about 30 to 40 miles.

When it was just hovering there, it was about 20 feet off the ground. It stayed there for about a minute or so and then it started off towards the direction we had come from (South). It was travelling about 15 or 20 m.p.h. and we took off towards the North. There was a mile or more - quite a distance away and we could still see it, just the white light, it was blinding us so we couldn't see the others and then it came back towards us. It came in just a matter of seconds and then followed us, not too close but we could still see the white light. It followed us for about 30 or 40 miles about $\frac{1}{4}$ of a mile off the highway into the fields.

We were going to report it to the R.C.M.P. but we didn't cause [REDACTED] thought we'd be locked up or something.

It wasn't a plane or anything. It's like something I've never seen before. I've never seen anything like this before.

Whatever it was, it was about 30 - 35 feet long and about 15 - 20 feet in depth.

COLOUR - I'd say it was a light colour. A grey or something. It's hard to tell with that light on it. Actually it was more of an outline rather than seeing a colour.

SHAPE - It was sort of round. The bottom was like a saucer. It looked like the lights were on top. It was 20 - 35 feet long and about 15 feet high or so.

U.F.O. Report - [REDACTED] - Observer

APPENDIX "B"

STATEMENT OF [REDACTED] (cont'd)

- ALTITUDE - When we first saw it, it wasn't really high. You couldn't see anything but the white light. When you got closer you could see the other two lights. While it was hovering it was about 20 - 30 feet off the ground. It didn't hover too long. When it was following us it was quite a ways away, but I would guess that it was about 100 feet up.
- MOVEMENTS - It stayed stationary but it was level. And it was spinning, the lights didn't seem to spin though. All the lights were on steady but the white light was on brighter and seemed to blind you until they were closer. It stayed perfectly level, both when hovering and when moving. It seemed to move smoothly. It always seemed to move in a straight line, that is it didn't zig-zag, but it seemed to follow the road, a little distance off into the field.
- DURATION - We kept seeing it off and on for about 45 minutes or so. We travelled about 40 miles while all this was going on.
- SOUND - It was a steady hum, no variation in pitch or volume either while it was hovering or when it started to move away.
- SKY CONDITIONS - Cloudy to the West and to the East it was clear. Could see the stars and the Northern lights. The object was on the East side of the highway most of the time.
- Q. Had you had anything to drink prior to this?
A. No - the last time I had anything alcoholic was 4 or 5 days before.
- Q. You're not on drugs or anything are you?
A. No.
- Q. How many hours since the last time you slept and how many hours did you get?
A. I got 8 or 9 hours of sleep about 16 hours previous to this happening.

U.F.O. Report - [REDACTED] - Observer

APPENDIX "C"

STATEMENT OF [REDACTED] (BD: [REDACTED] 507 Boyd Ave.,
Winnipeg, Manitoba. [REDACTED] - Salisbury House. Taken: 8:10
P.M. 19 SEPT 71 Winnipeg Detachment office

We were driving down #6 highway (North). We were around Grosse Isle and [REDACTED] sighted a bright light going across the highway and he mentioned it to us, and when I noticed it. It had one bright white light and flashing red and white light. It seemed like it was hovering over the field about 75 - 100 yards. We stopped the car and shut off the motor and we could hear a humming noise and it looked like it was rotating. It started to move East and we drove on. We watched it for about 3/4 of an hour 'til we got to St. Laurent and then it went out of sight..

COLOUR - I didn't see a colour. It was too dark. I just saw an outline of it.

SHAPE - Oval - it was just an outline. Red and green light flashed on and off, alternately, but the white light stayed on constantly and quite bright, like a spotlight. The ship was rotating or seemed to and the lights appeared to be stationary.

ALTITUDE - I couldn't say how high it was but it wasn't very high. When it was moving it seemed to go up on a slant.

MOVEMENTS - When it was hovering it stayed level and was rotating. When it took off it rose up at a slant but appeared to still maintain a level position.

DURATION - I saw it for about 3/4 of an hour.

SOUND - Constant humming. Didn't vary in pitch or volume.

Q. You hadn't been drinking?

A. No. It's been over a month since the last time I had a drink.

Q. You're not on drugs or anything?

A. No!

Q. When was the last time prior to this that you had slept and for how many hours?

A. I got about 3 hours sleep about 4 hours before this happened. The night before that I got a full 8 hours.

 ACCESS TO INFORMATION ACT/
 LOI SUR L'ACCÈS À L'INFORMATION

1. Reference to the above and our Telex #ASH/240 and Op. Man. CO-AIR para 6, Unidentified Flying Objects, I report the following.
2. At approximately 12:15 AM, 19 SEP 71, Mr. ██████████ (B: ██████████), 6478 Victoria Drive, Vancouver 16, B.C., and Mr. ██████████ (B: ██████████), 1402 East 27th, North Vancouver, B.C., came to our office and reported the sighting of some unidentified flying objects the evening before. They appeared to be sensible type persons and were quite sincere in the information that they gave. Information is as following and in compliance with Op. Man. CO-AIR, para 6:
 - (a) Date and time of sighting - 18 SEP 71 between the hours of 10:00 PM and 12MN Pacific Standard Time.
 - (b) Condition of sky - Clear.
 - (c) Identification of observer - As above noted.
 - (d) Location of observer at time of sighting - on top of a mountain north of Loon Lake, B.C., which is approximately 20 miles north of Cache Creek, B.C.
 - (e) Identification of other persons also observing the U.F.O. - Nil.
 - (f) Description of sighting - As follows:
 There were three objects sighted. #1 was in a southerly direction approximately 25 degrees above the horizon at about two to ten miles away. The object appeared bright white in colour and was shaped like a peace symbol. It bobbed up and down for a while and then became stationary. #2 and #3 were in a westerly direction and about 2 degrees above the horizon. #2 was hexagon in shape and all red in colour. It held a stationary position most of the time. #3 had a white centre with a red ring around it. It bobbed up and down most of the time it was watched. A sketch of the above objects with explanation is attached.
 - (g) Duration of observation - Approximately two hours. Subjects observed U.F.O.'s through the scope on their rifle.
 - (h) Other relevant information - Subjects had only one hour sleep the night before, had not been drinking and were quite positive in what they saw. They stated that the reason they could not watch the objects any longer was due to them being over tired. In the morning when they awoke they looked in the direction in which they had observed the U.F.O.s and could see nothing. Where the #2 and #3 objects were seen together there was a high mountain with snow on it, they believe the objects they saw were just above this.

HQ-400-Q-5

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCES A L'INFORMATION

1. With reference to the above may you please be advised that at 8:30 P.M. on Monday the 16 th day of August, 1971 a phone call was received at this Detachment from one [redacted] of 144 Dover St., Campbellton, N.B. advising that during the early mornin hours he had seen a mysterious object that he could not identify and he requested that we make an attempt to identify it for him.

2. Immediate investigation revealed that at approximately 4:30 A.M. of this date [redacted] had occasion to get out of bed and he noticed an ambur light approximately 500 yards above Sugarloaf Mountain, which is in the City of Campbellton. Since this light did not resemble the stars [redacted] watched it for a few minutes. During this time the object moved in an easterly direction and in so doing came closer to [redacted]. At this time [redacted] got his wife out of bed and both of them observed the object as it appeared to hover near the same spot. During this time [redacted] counted five (5) ambur lights that appeared to be pulsating. After a period of approximately 15 minutes the object started moving toward the South and as it neared the horizon it dissappeared as a streak of light, as [redacted] described it, "as fast as the eye could follow." [redacted] could not determine any shape to this object nor could he tell how far away it was.

3. On Thursday the 19 th day of August, 1971 at approximately 2:00 A.M. Cst. G.BARAGAR and Cst. D. MARTEL of this Detachment were on patrol in the area of Sugarloaf Mountain when they also noticed a mysterious light on the East side of the Mountain. A short time later the same light was observed on the West side of the Mountain and at this time these members drove as near to the Mountain as they could and in so doing noticed that this object was moving in the same direction as they were. In view of this they kept driving in the same direction for approximately 7 miles with the object following, or at least travelling in the same direction. At times this object was on the right hand side of the car and on other occasions it was on the left hand side. These members stopped on several occasions and when they did so the object stopped as well. On one occasion they stopped and turned all of the lights on the P.C. out. This object also stopped and it's lights became very dim. The flashing red dome light of the Police car was put on and at this time two objects that resembled rabbit ears (T.V. Antenna) appeared on each side of the object. These rabbit ears appeared to take on a dull red colour. At approximately 7 miles from the City the P.C. was turned and brought back the same highway it had left on. The object followed again stopping when they did until they reached the Sugarloaf Mountain again at which time it stopped. Shortly thereafter it dissappeared behind the Mountain and they were unable to see it again.

Unidentified Flying Object -

PAGE

"2"

CONTINUED FROM PAGE NO "1"

.....TO SEE IT AGAIN. At no time could they determine the shape of this object nor could they tell how far away it was. They could tell that at times it was much brighter than others and also at times it was much larger than others. They described it as being as large as a softball at times and other times it resembled the stars. The time of their observation was approximately 3 hours.

4. On each of the two occasions mentioned previously a check was made with the Charlo Airport and C.F.B. Chatham both were met with negative results. I might also point out that no sound was heard on either of these two occasions, from this object. On each of these two occasions Telex messages were forwarded to NRC Meteor Center with Info to CANFORCED, Comm. Ottawa, "J" Division, and Moncton Sub/Division.

5. Since these two sightings several reports of sightings have been made from Matapedia, Rimouski, New Carlisle and New Richmond, P.Q.

6. On the 1st day of September, 1971 I had occasion to be speaking with one [REDACTED], 146 Dover St., Campbellton, N.B. and at this time he mentioned to me that he had also seen this object, however, because of the fact that he had mentioned it to his wife and she laughed at him, he had not told anybody else about it. He described his sightings as being nearly every night for about three weeks. On the first occasion he saw it, the day Appollo 15 was launched, it was quite a distance from him and he assumed that this bright light was Appollo 15. He observed the object for approximately 10 minutes and it gave the appearance of being very bright and sparkling. On the next occasion that he recalls the object was much closer and at this time he could determine that this object was flat on the top and rounded on the bottom, he also advises that he was able to see lights from the interior of this object and that it was giving off a noise similar to that of a siren. He advises that he walked from his work to his home, a distance of approximately 1 mile and this object followed him. Again the object was near the Sugarloaf Mountain. Once he reached his home he went inside and never bothered to look out again. He has seen this object on several occasions since and the last being on the 30th of August, 1971. He finishes work at 12:00 MN each night from Monday through Friday and he has been advised to call the writer immediately should he see this object again.

7. In view of the above this file will remain open until such time as these mysterious objects are identified or further investigation appears fruitless. Two copies forwarded direct to H.Q. Ottawa.

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

- At 9:10 PM this date, Mr. [REDACTED] contacted this office advising that he presently has in view an unidentified object in the sky which seems to be moving. Myself and Cst. L. LANZA made a patrol to the residence which is located approximately two miles east and one mile north of city centre Creston, B.C. The object at this time was found to have moved from the original sighting in an upwards direction and was not quite as distinct. The object was located in the sky in a north north-east direction. In relation to the stars, it was found to be in almost a straight line across from the top stars of the "Big Dipper."
- The object was examined by myself through the detachment binoculars which are 7 x 50 power. At the time of the observation, the object appeared to be ovalar in shape and emitted three distinct lights in a flashing pattern. The most intense light was red which seemed to flash at different points on the object. The bottom portion of the object emitted a green flashing light while the top portion emitted a weaker amber flashing light. The object appeared to be moving in an easterly direction and upwards in relation to the stars. Eventually the object moved further away and became fixed in a position too far away to examine the object any further.
- A patrol was made back to the detachment where [REDACTED] contacted this office again advising that the object had moved closer and could be seen readily. A patrol was made to the residence by myself and the object viewed again. This time the object had moved westward and found to be much closer than the previous viewing. The object was once again viewed through the detachment binoculars and found to have the same shape as previously noted. At times, the flashing would be more vivid than other times. The time was approximately 10:00 PM. The object was viewed further by myself and [REDACTED] and at one point a bright white light emitted from the object southwards in a beam similar to the beam of light from car headlights. This beam of light eventually disappeared and couldn't be seen again. It also appeared that the object was revolving as a unit thus giving the flashing light effect. The sky on these sightings was found to be very clear and heavily clustered with stars. After approximately 20 minutes the object appeared to move upwards rapidly and eventually came to a fixed position where it couldn't be seen readily with binoculars.
- At approximately 11:00 PM, Mr. [REDACTED], Creston, B.C. was contacted and asked to view the object through his son's 60 power telescope. [REDACTED] called back after the object had moved away and advised that it had moved too far for the 60 power telescope to distinguish the features. The colours could be readily seen on the object. A patrol was made to [REDACTED] residence by myself and the object viewed. At this time, the object was blurred due to the distance, however, the red, green and amber lights could be distinguished.

PAGE 2

U.F.O. REPORT - Assistance to National Research Council

.....continued from page "one"

4. [REDACTED] son, [REDACTED], was interviewed and he felt that this could possibly be a star, however, he couldn't explain the movement of the object which is incoherent with the movement of the stars.
5. Cranbrook Detachment was contacted and they in turn notified the Department of Transport who advised that no airplanes were reported in the sky at this time.
6. Kimberley Detachment advised this detachment that they could see the object, however, it was very faint and was never seen as clearly as at our point.
7. Upon interviewing [REDACTED], he advised that he had seen this same object at approximately 10:00 PM; 24-8-71 and at this time it was the closest and clearest he has ever seen it.

26-8-71

8. The object was viewed until 2:30 AM this date, however, it never moved course again and remained fixed at the previously described distant location.
9. Creston telex # 322 was dispatched to NRC Meteor Centre in accordance with Operational Manual CO-Air, paragraph # 6.
10. At approximately 10:00 PM this date, [REDACTED] contacted this office again advising that the object could be seen again. A patrol was made and the object was closer, however, still too far away to make out feature [REDACTED] was contacted again and he brought his telescope to the area of the sighting with the same results obtained as previously noted. The object once again appeared to be fixed. [REDACTED] advised me at this time that he had seen this object on past occasions and he strongly feels that it is a star and that the colour is caused by atmospheric conditions.
11. Statement was obtained from [REDACTED] and attached hereto.
12. No further action is being taken in this regard at this detachment. The suggestion of this object being a star is possible, however, the colours and movement of the object raises some doubt and this is the reason the report is being reported. This file will be re-opened if further pertinent information is received.

EXEMPTION/EXCEPTION 19(1)
ACCESS TO INFORMATION ACT/
LOI SUR L'ACCÈS À L'INFORMATION

This is the statement of [REDACTED] (B: [REDACTED]), Erickson, B.C. taken at his residence at 10:10 PM; 26-8-71.

On the 24th of August, 1971, I saw an object in the sky which I thought was an airplane as there were distinct green & red flashing lights. I got out of my car at my residence and shut off the engine. I couldn't hear an airplane and the object appeared to be fixed. This was at approximately 10:00 PM. I looked at it through my binoculars (8 x 40). The object was very close. It appeared to be oval shaped and revolving. The green seemed to be above the red. There also appeared to be an amber colour which would flash periodically. The red was the strongest colour and was also flashing. It was NNE at the time and moved slowly westward. The object also appeared to be revolving. It eventually stayed in a fixed spot. I quit looking about 11:00 PM.

On 25th August 1971, I spotted the object was much closer than the last time I saw it last night. The colours were the same in hue and brightness, however, the red flashing light seemed to flash at different spots on the object. I called the RCMP at this time and they attended. The object moved eastward, then down and up to the west. The RCMP left before it came to the west. When it appeared in the westward position it was clearer again and I called the RCMP. They arrived and viewed it with me again. Same observations were made at this time except a white beam of light like headlights was seen emitting from it southward. The object then rapidly moved away and stayed fixed in the sky. At 11:00 PM, I stopped viewing the object.

About 8:30 PM; 26-8-71, the object was seen again and was quite close again but not as close as the first night. The first night was the closest I've ever seen it. I once again called the RCMP and they attended. At 10:00 PM the object was very faint and far away.

RE
OBJET Mrs. [REDACTED] - Compl. of Unidentified Flying Object
Red Deer, Alberta - 15 Aug 71
CITY CASE

30 Aug 71

1. Inquiries at C.F.B. Penhold reveal that Alberta Hail Studies, during the past summer, employed some forty persons. Of these, approximately twenty are summer assistants and part time help. One [REDACTED] (B. [REDACTED]) of 8507-95 Ave. Edmonton, and [REDACTED] (B. [REDACTED]) Box 1544 Ponoka, Alberta, were involved. They, with several other part time assistants, dispatched the Unidentified Flying Objects as reported in this area on August 15th and 18th. Neither would give written statements, however volunteered that on the night of August 15th they released three pi-ball weather balloons tied together with a dangling yellow railway flare. This was sent up from a point approximately one mile east of #2 Highway on the Delburne Road at 11.00 P.M. On the 18 Aug these persons released three Radio-Sonde weather balloons with red flares attached. These particular balloons are approximately 6' in diameter and were released, one from two miles west of Red Deer, one south of Red Deer and the other east of Red Deer, between the hours of 11.30 PM and 1.00 AM. Both [REDACTED] and [REDACTED] were with [REDACTED], and some six or seven other persons whom they would not name, at the time these balloons were released. It is believed that [REDACTED] was the leader of the group.

RE
OBJET:

Mrs. [REDACTED] - Compl. of Unidentified Flying Object
Red Deer, Alberta

15 AUG 71

CITY CASE

HO-400-Q.5

15 AUG 71

1. At 11.15 PM date, Mrs. [REDACTED] of 3966 38A Ave., Red Deer, Alta. called this office and reported sighting a few minutes prior to her call, a bright orange sphere surmounted by a Christmas tree effect of lights, flying over the city in a North-westerly direction.

2. All local police cars were advised and Cst. R. DAVIES, Cpl. G. DRURY, and Cst. G. REAR, all of this Det. confirmed the sighting. Sgt. BRODIE, 43rd Radar Squadron, CFB Penhold, Alta. was contacted and he confirmed that he received three similar reports regarding this same object but nothing appeared on radar. Telex #RDC 432/12 was immediately dispatched to the NRC METEOR CENTRE (TELEX #013434) Info CANFORCED (Telex #013218) and the Commissioner.

18 AUG 71

3. At 12.00 MN date, Mr. and Mrs. [REDACTED] 5874 74 St., Red Deer, Alta. called this office and reported sighting two reddish sphere objects moving from west to east in the north sky over the city. The duration of the sighting was approx. 10 minutes and same was reported to CFB Penhold Radar Squadron. No further sightings were reported therefore no verification could be made of same.

4. Telex RDC 444/23 was dispatched immediately. It may be noted that there was no noise made by the objects in question and they seemingly disappeared in the direction of the wind.

28 AUG 71

5. Investigations to date revealed that a Mrs. [REDACTED] worked for the City Office, Red Deer, Alta. temporarily during the summer and upon discussing same with friends over coffee, related that they were just helium balloons with flares attached and that her husband often sent up same as a practical joke. Her husband, [REDACTED] was employed with the Hail Studies program at CFB Penhold for the summer and the impression was formed from the discussion that he and his local working cohorts may be responsible for the U.F.C.'s. Mr. and Mrs. [REDACTED] have both terminated their employment and are enroute to Montreal, Quebec to continue their studies of Meteorology at University that point, forwarding address unknown. It was also learned that Mr. [REDACTED] resorted to the same jokes last year while employed for the summer at Victoria, B.C.

6. In view of the foregoing, may investigations be conducted by our Red Deer S/D C.I.S. at CFB Penhold to determine the validity of the information at hand and any further investigative leads that may come to light.
