SUMMARY ANALYSIS

REMOTE VIEWING (RV) SESSION CD-07

1. (S) This report documents a remote viewing session conducted in compliance with a request for information on a target of interest.
2. (S) The remote viewer was unable to fully attain his usual state of relaxed concentration. The ambient room noise was so bad that it took the viewer quite some time to acquire any information at all. He had a great deal of difficulty concentrating on the mission. During the debriefing the noise reached such levels that discussions between the viewer and debriefer could not be heard, even though they were in a closed room, sitting across from one another. Despite this totally adverse condition the remote viewer was able to acquire some imagery in which he had confidence.
3. (S) The protocol used for this session is detailed in the document GRILL FLAME Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.
4. (S) Following is a transcript of the viewer's impressions during the remote viewing session. At TAB A are drawings made by the viewer reference his impressions of the target site. At TAB B is target cuing information provided the remote viewer at the time of this session.
