

Project #035  
Session DC-  
RVcr =  
Iber = #66

Mensurated Geo. Coord in sealed envelope,  
Time Coord 1400 hrs, 19 Dec 1980

Guy in dark heavy clothing, waved @  
Someone in a big truck  
frosty crusty windshield

truck entering some complex  
tied down canvas

steep roofs

# # +06

Get a wider perspective on the  
area, there.

Structures become denser to R (NE)  
open, desolate to L. (W)

Truck coming thru city fence  
Domestic scene

Have him center himself over the  
target and look down - I've  
got to have a general descrip-  
tion before I can go for detail

valley  
Broad valley w/ plateau to SW  
rough terrain

\*+14 Have him move closer in to the target, observing as he goes.

Sig X on a crossroads  
Looks like a runway with  
all this criss-cross  
looked like a cross roads, but  
just stopped

\*+17 Have him hold himself over the target coordinates, have him search for activity of intelligence interest.

Trucks (or tracks) here before  
me

Return him to return to the equipment, and have him observe it thru time, then we'll move on

Lattice work tower

→ +26 Fred moves him into the tower  
Activity of intel interest  
Smoke or vapor trail like erratic  
signal flare to NW.  
Big billowing clouds to R,  
darkening to the right or white

some kinda signal because  
~~slow~~ small compared to other

red hot steel bent (explosion  
type)

Thought maybe rocket launch

\*\* +30 Keep him in tower and move  
him to first week increment

highly illuminated bldgs like  
big strobe light

\*\* +35 Have him look for tracks;  
equipment - determine if they're  
still there.

Only in memory

31 Dec 1980 from tower

Not much of anything, then cut away  
model of big passenger A/C
