REMOTE VIEWING (RV) SESSION D-99

1. (S/NOFORN) This report documents a remote viewing session conducted in compliance with a request for information on a target of interest to USI.

2. (S/NOFORN) The remote viewer's impressions of the target are provided as raw intelligence data, and, as such, have not been subjected to any intermediate analysis, evaluation or collation. Interpretation and use of the information provided is the responsibility of the requestor.

3. (S/NOFORN) The protocol used for this session is detailed in the document Grill Flame Protocol, AMSAA Applied Remote Viewing Protocol (S), undated.

4. (S/NOFORN) Following is the report for this session. At TAB A is a summary of the information provided by the remote viewer as extracted directly from the comments made by him during the session. At TAB B are the drawings which the remote viewer provided in conjunction with this session. At TAB C is the cuing information pertinent to this session.

5. (S/NOFORN) This session was conducted as a follow-on to Session D-78 done in conjuction with Session D-79; and Session D-76 done in conjunction with Session D-77.

SUMMARY

REMOTE VIEWING (RV) SESSION D-99

1. (S/NOFORN) The following is a summary of information provided during Session D-99, and pertains to [redacted] for period [redacted] [redacted] SG1A SG1A SG1A

a. (S/NOFORN) Source reported that subject arrived at a stone house type building in a small sedan. He entered the building by traversing a multiple terraced and shallow yard, passing through a section of bushes.

b. (S/NOFORN) Source described the interior as a small room, sort of a bedroom/study combination. He stated that it was a courtesy type of billeting arrangement. The room contained a bunkbed and desk, with a small closet off to one side. The room was connected to a narrow hallway, and has some sort of high scaffolding to one side with a stairwell exposed to the rear of the desk.

c. (S/NOFORN) Subject was described as holding a clipboard. The clipboard is described as having a marshmellow type object fastened to the upper left corner of the paper.

d. (S/NOFORN) Source described the top sheet of paper as having a small arc design in the upper left corner, surrounding the lower side of the marshmellow designed object (see drawing #1). At the top of the page was a backwards umbrella type design laying on its side with a line proceeding left to right and curving down the center of the lower page area (see drawing #2). Source stated there are symbols on the paper in conjunction with writing, which appear to be a part or portion of a diagram. This contained fractions, quantities, and equal signs, like a special formula. All of the above occupied approximately 6-8 lines. The paper also contained vertical lines and appeared to have been some form of a graph paper or ledger sheet layout. Source stated the paper on the clipboard was really unimportant and that there was more importance placed on additional papers removed from envelopes located on the desk.

e. (S/NOFORN) Source stated that subject removed a group of papers from some envelopes on his desk. These were read 2 or 3 times very carefully. They were glossy/long, rather blurred, and had an appearance of being an old type of photostatic copy. These papers were described as also being gray or tan in color, and had a graphic layout of a rib shaped object, segmented, tubular in design, which was displayed in steps. Subject appeared to be very elated while reviewing these documents. These papers were studied in detail using a kind of special occular glasses.

f. (S/NOFORN) Source stated that all papers (both clipboard and envelope) were stored in a hollow tube like stake. This was approximately 8 inches in length, half inch in diameter, and had a point at one end. Documents were stored in this stake by rolling them up from bottom to top.
