Mr. Olin did state some of his associates did think that an R&D effort was a more appropriate approach. Mr. Olin stated that while he could not do much in the current (FY83) problem, he would provide support for FY 84 and beyond. He considered the level of activity "appropriate" as it now existed and in the projections for FY83 and beyond. Mr. Olin offered his recommendation to LTC Jordan that in the current reclama to Congressional action, some senior Army personnel should get involved.
