In Chihuahua we made plans to journey to Los Mochis near the Gulf of California. Even today the trip is impossible by car, for the great mountain spine known as the Sierra Madre Occidental and the Tarahumara Range, with its giant canyons (preceding pages), block access. The latter plunge deeper and four times longer than the Grand Canyon.

Until 1961, the only way across was by mule. Then the Chihuahua al Pacifico railroad, pushing track 420 miles through 89 tunnels and over 31 bridges, finished its line from the city of Chihuahua to the Gulf of California. It was the first road of any kind across Mexico's rugged Sierra Madre between the United States border and Durango, 674 miles to the south (map, page 148).
