THOUGH NAMED for the Equator it straddles Colorado-size Ecuador contains most of earth's climates, including polar cold, within its 400-mile

breadth and four-mile height. Volcano-spired Andean highlands wall off low jungle and desert along the Pacific Ocean from steaming Amazon headwaters in the remote interior to the east.

Once the northern bastion of the Inca Empire, Ecuador has known three centuries of cloistered rule by Spain and 146 years of independence marked by tempestuous politics.

Much of the raw eastern jungle formerly claimed by Ecuador has been ceded to Colombia and Brazil; the nation currently disputes 70,000 square miles held by Peru. Ecuador's eerie Galapagos Islands shelter strange forms of life.

AREA: 104,506 square miles. **POPULATION:** 5,500,000; 40% Indian (mainly in highlands and jungle), 10% white (mostly Spanish), 10% Negro (concentrated in coastal cities), and 40% mestizo and mulatto. **LANGUAGE:** Spanish; Quechua and other Indian tongues. **RELIGION:** Roman Catholic. **ECONOMY:** 50% of people engaged in agriculture: bananas, coffee, cacao, rice, beef, balsa; some light industry, mining, oil. **CHIEF CITIES:** Guayaquil (population 650,000), seaport; Quito (450,000), capital; Cuenca (61,000), trade.

Children of the Equator
7,000-foot-high San Antonio de Pichincha, Ecuador's Equatorial Monument, which proclaims 0 degrees, 00 seconds. Only 30 miles east but 7,000 feet higher, snow falls a latitude on José Maria Supalo, Jr., and his dog as they guard the author's expedition to Cayambe, whose lofty slopes spawn a glacier to cross the Equator (pages 274-5).

CAYAMBE

Striding earth's belt in the Northern Hemisphere after in the Southern, Jack Cook crosses 18,996-foot Cayambe. Mist wrecks figures of other climbers on a roping as they circle toward the sun gleaming beyond the cleft at left. The river of ice lies only 40 miles from mountaineers traverse its fissures or explore this highest peak on the

Masked against zero cold against dazzling sunlight, Jack and Rómulo Pazmiño pause here at the 18,000-foot level on Coto. Later they ascended the remaining, making 16-year-old Cook the youngest climbers ever to conquer. Distant Cayambe, extreme left, and Antisana peak through clouds over the
