I OBJECTIVE (U)

 The objective of the Remote Viewing (RV)* Reliability, Enhancement, and Evaluation Task is to develop remote viewing techniques,  to enhance the potential for  applications. 

* (U) RV (remote viewing) is the acquisition and description, by mental means, of information blocked from ordinary perception by distance or shielding.

[REDACTED]

II INTRODUCTION (U)

[REDACTED] SRI International is tasked with assessing the potential of RV [REDACTED]. In this task, as defined for fiscal years (FY) 1981 through 1983, special emphasis is placed on the possibility that enhancement techniques can be developed that will significantly increase levels of accuracy and reliability.

[REDACTED] The three-year effort focuses on (1) the development of techniques to enhance the accuracy and reliability of RV, (2) the application of RV [REDACTED] (3) the evaluation of such techniques and applications, and (4) the integration of RV [REDACTED]. The apportionment of these efforts over the three-year period is shown in Figure 1.

[REDACTED] Investigation of the RV phenomenon at SRI International over the past decade has ranged from basic research, where proof of the existence of the phenomenon was at issue, to [REDACTED] applications, in which the existence of the phenomenon is assumed. The present study emphasizes applicability--proof of the phenomenon is not explicitly pursued here. Some pragmatic measure of demonstration of existence is provided, however, by assessment of the quality of results obtained in [REDACTED] tests carried out under the double-blind conditions.

[REDACTED] In this report we discuss the effort for FY 1982. This effort consisted of:

- (1) Continued development of a six-stage RV training procedure, hypothesized to lead to improved RV performance. Special emphasis was placed on developing tools that were useful in differentiating and identifying technological facilities.

V SUMMARY OF THE FY 82 RV ENHANCEMENT TASK (U)

Progress in the FY 82 RV Enhancement Task can be summarized as follows:

- RV enhancement procedure further developed.
 - Special emphasis on procedures applicable to identification of technological facilities.
 - 75 RV research/training practice trials with I. Swann.
- Procedure transfer begun to five novice SRI staff members and consultants.
 - Orientation and practice through various levels of Stage II.
- Procedure transfer begun to two novice personnel.
 - One RVer mid-Stage II; 53 RV training trials.
 - One RVer nearly complete on Stage II; 77 RV training trials.
- Data obtained on Sites J.S. #23 through J.S. #34.
- RV evaluation protocols developed.*
- Computerized RV data-base management system developed to completion (LSI 11/23 stand-alone microcomputer).

* (U) E. C. May, "RV Evaluation Protocol (U)," Final Report, SRI Project 4028-5, SRI International, Menlo Park, CA (December 1982),
