MAN MADE

B STRUCTURE

STRUCTURE/water
interface

L/W interface

Site is composed of water, land and structures. Two, probably three different types of water.

First type of water is part of water land interface. The land here is soft and has a fluidity feeling.

Second type of water is enclosed in a man made, probably circular, structure.

Third type of water may also be present. There are structures here. Two of these structures, (one having a down feeling and the other having an up feeling [NEI]) are interrelated, possibly physically.

STAGE TWO SUMMARY. Area is colorful. Blue and green are primary colors. There are also other blues and greens along with white, orange, tan, bronze, yellow, red, pink and olives. There is a salty feel and a sweet smell, that reminds me of not too unpleasant smelling fertilizer. Temperature is warm and sticky. Area feels open and wide, but bounded somehow (NEI)

GA

There ARE BUZZING SOUNDS AND
SLOSHING NOISES. THERE ARE LOW, LONG
NARROW STRUCTURES HERE. THERE IS ALSO
SOMETHING HERE THAT IS CONCAVE (NFI).

SUMMARY: S. F. R. LAND ON
Approved For Release 2000/08/08 : CIA-RDP96-00789R000100130007-0 D
LAND THERE ARE STRUCTURES. ONE STRUCTURE
IS LONG, WITH A CIRCULAR QUALITY. IN THE
MIDDLE OF THIS CIRCULAR STRUCTURE THERE
IS FIRST AN OPEN AIRY FEELING AND
BELOW THAT A FEELING OF ~~FRAY~~
MOVEMENT. THERE IS A SECOND STRUCTURE
WHICH IS LARGE, HIGH, HEAVY, ANGULAR
AND THICK. IT IS MULTI-LEVELLED AND
MAY HAVE A BELOW THE GALT
QUALITY. A THIRD STRUCTURE IS ALSO
PRESENT. THIS STRUCTURE HAS A VERY
STRONG UNDERGROUND QUALITY.
