Monitor Statements

(1) I'm going to leave it up to you. Do you need me to read you the coordinate no. OK when you're ready you can begin

---

(2) Let's move inside now

---

(3) "Just anywhere inside the building?" Yes, to begin with continue to get comfortable with the inside.

---

(4) Do you wish to continue? Yes. OK, now I want you to go to the area that interests me, the special area.

---

(5) You need to work through the "hospital ward drive"

---

(6) You seem to be in a powerful drive which keeps reinforcing itself to no apparent end. Back away from this concept now and consider the activity of the people. Go to "another special area" <sup>"take a break"</sup>

---

(7) We have established a large building, corridors and you have spent some time telling me about a hospital ward. I am not interested in the hospital ward. Go to the 5 floor 4th corridor. Here there is a special area that interests me.

---

(8) You still haven't told me about the configuration of the area. Before you move on to the people it might be better to first become comfortable with the area.

---

(9) We have some data on the people, let's examine the activity here

---

(10) You seem to have focused on one person, it would be more beneficial at this stage to identify the type of people in general who are here.

(2)

(11) We have a variety of people, officials, researchers and people who follow rules. What are they doing here.

---

(12) The Jambor told you of two special areas connected. He could not tell you about the common purpose here. That is going to be important since we have varying types of people.

---
