

Site is in a cleared area separated somehow (Fence?) from surrounding area. Area has a general feel of agriculture, dairy, forestry or something. One feels almost Nordic or alpine.

There is a large low structure at site. (see sketch) Top is reinforced and an attempt has been made to camouflage or disguise it. Under structure there is a central shaft going down. Shaft opens into a large cavernous opening. Air + lighting are artificial. Area is like a huge warehouse that is only about 15% full. There is a general feeling that they know I am

here. There is some odd shaped material here.

When place is busy there are a number of round circular objects (25 m+ in diameter maybe) and tubes hanging from ceiling. Light (changes?) to red. Looks like below deck of an aircraft carrier.

Very strong AOC of UFOs and ETs
