types of weapons  
utilization & targets

Main person is wearing civilian clothing.  
Briefing person is wearing military uniform and using an indicator to point to indicate location, etc. of weapon systems. Others in room are mixture of military & civilian (military outnumbering).  
The person has more oval features than incidental.

I'm getting the impression that some of the <sup>weapon systems</sup> have been previously undetected and if discovered will create inter-national repercussions.

Building is located in a populated Cold War city.  
 It is of newer construction than those around  
 it, but not outstanding in appearance. It  
 contains communication rooms, operations rooms  
 with a lot of people, a closed (vault-type door)  
 monitoring room and a room very much like  
 a war room, which is being used for  
 briefing. 10 men, mostly military are in  
 this room. The main or most important  
 person is wearing civilian clothing. He  
 is being briefed by a man in a military  
 uniform, who is using maps and <sup>33mm.</sup> slide  
 projections to show location (geographical-  
 Eastern Europe & Middle East) of weapon systems.

The room is circular. If one were in  
 a round chair (which is being used

by the main man, he can do a 360° survey of  
 the room. The room is dark + windowless.

~~Also essentially~~ The brief is showing where  
 the weapon systems are located, utilization and  
 possible targets/efforts. There is great concern  
 about previously undetected locations becoming  
 known, which could have inter-national  
 repercussions. There are SDI-type weapons.

4 locations E. Europe  
 were concerned about the  
 crisis in the Middle East.  
 No known connection  
 of support.

End 1415
