PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8711	SESSION NUMBER: 1 & 2
DATE OF SESSION: 21 & 22 JULY 87	TARGET COUNTRY:
REFERENCE:	MISSION STATUS:
TECHNIQUE UTILIZED: CRV	SOURCE IDENTIFIER: 003

SG1A

(S/NF/SK) Monitor Tasking: Provide information on the location and

2. (S/NF/SK) Source Tasking:

Session #1: (no cue other than encrypted coordinates provided source)

Session #2: - This follow-up session began with the cue "Object number one"

3. (S/NF/SK) Summary:

Session #1: Nothing substantive to report.

Session #2: Source seems to describe what may be a "time bomb" (AOL-"SADM") in the hands of a faction.

4. (S/NF/SK) Comments: Source seems to be in the correct area on the globe. Although, the data supplied could certainly refer to those who control the missiles, due to the description of the "device", this monitor believes that the possibility of AOL drive is high.

~~SECRET~~/NOFORN-SKEET CHANNELS ONLY

CLASSIFIED BY: DIA-DT
DECLASSIFY : OADR

Site involves a structure located in an isolated area that seems to be barren and austere, perhaps a desert. Structure is squared, boxlike, dark in color, with windows in one part but none in other parts. It is fairly recently built but was not built all at once--as if one or more sections were completed and added according to need or schedule. Part of the structure stores things needed later. Other part houses activities such as planning, preparing, organizing, etc., and has a sense of informal "nerve center." People associated with structure are preparing to go somewhere, and are taking things. They are tense, expectant, worried, elated, excited, ecstatic, and feel like what they're doing is for more than just themselves, such as a cause, or something. One man involved with the structure is short and thin and dark complected "like" he's permanently sunburned, and has a beard. He's very smart, but views that not as something to boast of but to use as a tool. He seems quiet and unassuming but those around him accord him great respect as if he is the source of considerable power and determinism. Near this one structure is a large, flat, hard surface area "like" a road. Also nearby is a large structure/object which is rounded, oblong, elongated, wide, hollow, and seems to squat or "hunker down." Something about it suggests "turning". People go inside it, where there are things hanging from the ceiling, electronic equipment, and seating areas. Interior is functional, worn, but still serviceable. ADL of helicopter was present.

018
agrees

Certain objects were involved in the session. The first was large, silvery in color, resembled a carrying case for electronic equipment such as tech services people might carry, and was secured and isolated inside a room in a structure in a relatively dingy, dirty urban area. Object is valuable, technical, and hard to replace. Whoever is in control of it isn't necessarily supposed to have it. A second object was identified amongst other objects going somewhere inside some sort of conveyance. This object is smaller, more rounded, and boxlike. There is some sort of intensity about it that is unpleasant. Some kind of metal parts are involved.

018
agrees
I remember

Second session, 22 July 87

Object was perceived that is rounded, has some sharp edges, corners, angles, that is curved, hollow, but filled. Black is an associated color, and a "tick" sound is also associated. There is a silvery element about it, as well as metal and plastic parts. Something dense. Something moving and turning slowly. It is "linked" and "controlled". It is connected with an urban-located somehow-hidden organization that is vying in a competitive or confrontational sense with another, larger, more open organization. Having this object or "device," which is heavy, metal, but still moveable when necessary, lends power or influence to those who have control of it. This advantage is lost if it becomes known where either its controllers or the device itself is located. The device is not aesthetic, but functional, designed to perform and not to "fit the decor." It has something to do with a sequential time period. Like a clock

018
agrees

inside but that is adjusted as necessary. To make it function something must be turned to a set point in conjunction with some thing else at the same time. A person must do it. The end goal is not to use the device at all if possible, because once used the advantage of its possession is gone. Members in red are associated with it, in the sense of a "read-out". Electronic and mechanical systems interconnected are associated with this device. It is normally inside a carrying case except when removed to be placed in a ready or operational state. It is approximately thigh-high on an average sized man, and is taller than it is wide. In functioning, it goes along at a steady rate then quickly/suddenly culminates.

003
agrees

Strong ~~at~~ at this point of SADM or some other explosive device.

003

Device(c)

function
power
hidden
important

54/2 "high stakes" - Someone knows where it is; large group or organization want to find it so they can get control of it. Like a serious sort of cat and mouse game.

(group or organization)
smaller

ALL BE
suitcase
sagger

54/2 device is not aesthetic - functional - designed to perform + not to fit deer. "Lump"

54/2 device has something to do with time. Like schedule associated with it or sequential time period. Like clock inside but that is adjusted as necessary. Linear

SVI

power
influence
advantage

54 1/2 The small group having this device provides them leverage or advantage + power out of proportion to their normal stature. Their actual location + its actual location must remain undisclosed to maintain the advantage.

54 1/2 To make object function something must be done to set point in conjunction with some thing else at same time. Person must do it. On machine itself. "Like" end goal is not to use device at all if possible.
