

SESSION SUMMARY

SESSION: 20 NOV 87; 1320HRS-1437HRS

First impressions are of a tall, angular, vertical structure. Focusing on sometime in the past, the impression of a land/water interface becomes evident. There seems to be a large, open body of water and also a closed, or contained body of water. The land appears to rise, with a gentle incline, to a somewhat rolling, flat, open area (see sketch, page 7). The area here is windy, breezy and almost seems desert-like. There are people associated with this location and they seem lost, confused, dazed, in a state of shock. Survival is foremost on their mind. There is a feeling of a life-or-death situation, dehydration and starvation. There is a small group of individuals who have been trained to work together, like freedom fighters or partisans.

Focusing on a "past event" evokes colors of red and orange; something that is large, billowing, cloud-like, rapidly expanding, enveloping.

There is a strong wind associated with this event, and the feeling of dread, fear, confusion, then only darkness. There is also an object associated with this event. It is large, round, curving, hollow, tube-like and colors of yellow and orange can be found inside.

PIs - none
A.Vs - none
