1. (S-SS) Statistics: Viewer: 018
Session date: 9 OCT 87

2. (S-SS) Except for two drawings (see transcript, page 2) of the object and its container, the perceptions of this session were basically repeats of the previous sessions.

a. The object appeared to be long and cylindrical, with (new perception) a separate piece on one end which had small circles (AOL: bolts?) around its circumference.

b. Again, the container seemed to contain a layer of padding.

c. Tasked with following this particular object to its end point and finding its final usage:

1) I was once again located in a clear area surrounded by very large trees, growing very thickly.

2) There was, once again, a perception of the man wearing an old undershirt outside, on a sunny day.

3) The end usage of the object again brought the perception of a gigantic wall of fire.
