PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8717 SESSION NUMBER: 3
DATE OF SESSION: 04 JAN 87⁸⁸ DATE OF REPORT: 05 JAN 87⁸⁸
START: 1319 END: 1426
METHODOLOGY: SOLO VIEWER IDENTIFIER: 018

1. (S/NF/SK) MISSION: See original tasking data sheet, attached.
2. (S/NF/SK) VIEWER TASKING: See Solo tasking sheet, attached.
3. (S/NF/SK) COMMENTS: 018 still needs to address the nature/function/purpose of the completed target structure(s). [Subsequent debriefing, 05 Jan 87: 018 states that intangible ideas were probed for but, other than the AOL/SIGNAL idea of "space shuttle", none were forthcoming].

memorandum

DATE: 5 January, 1988

REPLY TO
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

SG1J

TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics: Viewer: O18
 Session date: 5 JAN 88
 Mode of operation: CRV

2. (S-SS) Tasking:

a. Produce a Stage 6 rendering of the site; place structural elements in perspective, paying particular attention to "something on the flat roof". ✓

b. Part of this site is under construction. Use Stage 6 tools/cues to investigate the site's use upon completion; explore the key structure's interior for tangibles and their associate ideas.

3. (S-SS) Results:

a. Stage 6 rendering of site resulted in the cleaned-up version, located on page 9 of the transcript.

b. The "something on the roof" was perceived to have a conical shaped object centered inside a bowl-shaped object, with what appeared to be a slanted surface (ADL: reflector) situated above it. The drive to say this was a microwave dish & reflector was too strong, so the attempt was abandoned.

Missed

c. The activity and noises which have been perceived in both earlier sessions in the building (previously labeled) X-1 has previously been perceived as "assembly" of some type. It clarified itself this time as being the "assembly" (construction) interior of the building, itself. The interior is still seen as being close at the entrance, then opening up into a larger area (see drawing, p. 1 of transcript).

d. A Stage 6 time-line was used to investigate the site's use upon completion. This time line (on page 3A) indicated 7 key points throughout the year of 1988. These key points are listed on pages 3 & 4 of the transcript. These points resulted in the following summary:

1) Construction continues approx 1/5 of the way through 1988.

2) Shortly thereafter, there is a sharp feel which seems to indicate entry of people and things into the structure.

3) Shortly thereafter is the arrival of something or someone "big" (see transcript, bottom of p. 3).

4) A little past mid year there is a feeling of a "snag", followed by strong resistance.

5) The later part of the year has an "easy, downhill" feeling.

6) Near the very last of the year, there is a sudden upcurve in this "downhill" feeling, and strong resistance all but stalls the forward motion feel.

7) Throughout the period after item 2), above, there is the feeling of people in the structure, with a definite feeling that some of them are female.

SOURCE #018 SOLO MISSION 04 JAN 88

FOLLOW-UP TASKING ON TARGET COORDINATES 589281/856562

INSTRUCTIONS: Review 09 Dec 87 SOLO session.

- Produce a Stage 6 rendering of the site; place structural elements in perspective, paying particular attention to "something on the flat roof".

- Part of this site is under construction. Use Stage 6 tools/cues to investigate the site's use upon completion; explore the key structure's interior for tangibles and their associate ideas.

5 Oct '87

~~SECRET~~/NOFORN

1. PROJECT: 8717
2. COORDINATES: 589281/856562
3. BACKGROUND: There are new structures under new or recent construction at the Target Site at 589281/856562. These new structures are of high interest to a US intelligence community customer.
4. ESSENTIAL ELEMENTS OF INFORMATION (EEI): Access the Target Site at 589281/856562 and identify/describe the new structures of high intelligence interest. Address and respond to the following EEI:
 - a. Provide an overview of the Target Site and identify the structure(s) of specific intelligence interest.
 - b. Describe the purpose and actual or intended use of the new/recent construction activities at the target Site.
 - c. Provide conceptual drawings in support of your findings.

(NOTE: IF THE NUMBER OF STRUCTURES AT THE TARGET SITE BECOME TOO VOLUMINOUS AND THE CAUSE OF VIEWER CONFUSION, LIMIT THE INITIAL COLLECTION EFFORT TO THE STRUCTURE OF HIGHEST INTELLIGENCE INTEREST. ADDITIONAL SITES WILL BE REVISITED FOLLOWING CUSTOMER ASSESSMENTS OF THE INFORMATION PROVIDED BY INITIAL INTERIM REPORTS.)
