SUBJECT: SESSION SUMMARY (C/SS)

TO: DT-5 (ATTN: [REDACTED]) SG1J

1. (S-SS) Statistics: Viewer:
Session date:
Mode of operation:

018
14 JAN 88~~SOLO~~CRV *my*

2. (S-SS) Tasking:

a. Describe the site.

3. (S-SS) Results:

a. Several perceptions were gained which centered around a cupped shaped "thing". Several partial drawings (see pages 1, 3 & 7) were perceived, but the most complete is on page 6. This sketch shows only the right side of the "thing", viewed from inside the cupped area, looking at a vertical "thing" in the middle of the cupped area.

b. The central "thing" seems to not be attached directly to the center of the cupped area, but somehow separated from it. There was the slight perception of "activity" or "energy" at this point.

c. The overall impression of the site was that there was a "sideways" sweep of energy across the area. This sweep of energy was perceived as developing swirls and eddies as it passed the site. This was not followed up, and nothing further was perceived concerning this.
