PROJECT SUN STREAK

WARNING NOTICE: SENSITIVE INTELLIGENCE SOURCES AND METHODS
INVOLVED

---

| | |
|---|---|
| PROJECT NUMBER: 8801 | SESSION NUMBER: 2 |
| DATE OF SESSION: 25 Mar 88 | DATE OF REPORT: 28 Mar 88 |
| START: 0847 | END: 0945 |
| METHODOLOGY: CRV | VIEWER IDENTIFIER: 095 |

---

1. (S/NF/SK) MISSION: Describe the prototype object located
within the building at encrypted coordinate 113096/532189.

2. (S/NF/SK) VIEWER TASKING: Same as above

3. (S/NF/SK) COMMENTS: The viewer describes a small, compact
device that is full of intricate wiring. This device is a
component for something else, and is intricate and electronic,
it's speed is an important attribute. It is multi dimensional
and it's application is varied. The viewer experienced repeated
AOLs of "optical computing."

```
                        SESSION SUMMARY
                          VIEWER 095
                         25 MARCH 1988
                     START: 0847 END: 0945
```

        The item that is produced in the "assembly area"  has
intricate wiring and is small/compact.  The item does not stand
alone but rather is a component of something else.  The component
represents something new/novel/ a breakthrough.  The component is
intricate and electronic, it's speed is an important attribute.
The component is multidimensional.  Associated with
"multidimensional" is the concept of simultaneity.  The component
does not have one ultimate application but rather can be used in
many different ways.  It facilitates or improves and is an
upgrade.  The assembly area where it is made is supposed to be
clean but isn't.  The room is filled with machinery and has
unpleasant chemical smell.

Viewer's note:  During the session I experienced repeated AOLs of
optical computing, "chip" manufacture and computing.  This AOL
was extremely difficult to work through.
