

SECRET/NOFORN

PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8804

SESSION NUMBER: 1

DATE OF SESSION: 15 AUG 88

DATE OF REPORT:

START: 1259

END: 1412

METHODOLOGY: SOLD

VIEWER IDENTIFIER: 018

SG1A

1. (S/NF/SK) MISSION: ACCESS AND DESCRIBE THE TARGET, WHICH IS LOCATED AT COORDS 557803/870630.

SG1A

2. (S/NF/SK) VIEWER TASKING:

3. (S/NF/SK) COMMENTS:

VIEWER OBJECTIFIED AN A.V. OF "PLANE" (SEE REPORT, 17 AUG 88, VIEWER 099), AND DECLARED A P.I. OF BACK PAIN.

4. (S/NF/SK) EVALUATION: UNABLE TO EVALUATE WITHOUT FURTHER DATA.

HANDLE VIA SKEET CHANNELS ONLY

SECRET/NOFORN

CLASSIFIED BY: DIA (DT)  
DECLASSIFY: OADR

## memorandum

DATE: 18 August, 1988

REPLY TO  
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

SG1J

TO: DT-S (ATTN: )

1. (S-SS) Statistics: Viewer: 018  
 Session date: 15 AUG 88  
 Start time: 1259  
 End time: 1412  
 Mode of operation: SOLO  
 PI: Back pain  
 AV: SG1A Airplane

2. (S-SS) Cuing: Target is identified  located at encrypted coordinates 557803/870630.

3. (S-SS) Tasking: Access and describe:

SG1A

4. (S-SS) Results:

- a. The target is surrounded by a very large area which it shares with other "things" (see sketches, pages 13B and 13C). The entire area is enclosed. There was a perception that this enclosure is only wire fencing. There was an added perception that the area directly around the target contains a "bean-shaped" field of "an unidentified pressure" (see sketch, page 14A).
- b. There appear to be two (otherwise unidentified) lines associated with the target. These lines have a "barely covered", or "just beneath the surface" feeling (see sketch, page 13C, bottom). There is also a repeated perception that a portion of the target site is physically "cantilevered and elevated" (see sketches, pages 5, 6, 13B, and 15A).

- c. There were two types of perceptions of activities associated with the site:
  - 1) A "back & forth" energy which seemed to be associated with the site's functioning (see sketches, page 7).
  - 2) A perception of people working at the site, in front of large, tall, dark colored "wall panels" with dots/spots/points/lights/etc. on them (see sketch, bottom, page 12).
  
- d. There were several perceptions dealing with the functioning/purpose of the site:
  - 1) The functioning appears to be continuous.
  - 2) Some portion of the site is "level sensitive", in that it will begin to work properly up to a certain degree off the horizontal, but will not at a steeper angle. There was the co-perception that this portion of the site was not "level sensitive" once it began to operate.
  - 3) The operation of the site deals in some way with great distances, and appears to be in totally straight lines as it covers these distances.
  - 4) There was a strong perception of very active and strong "back & forth" energy associated with the site's actual functioning.

Viewer 018

- Describe concepts related to sketch on page 6, session 1
- How is energy associated with production of movement. See page 7, session 1. Run session 2 needed to answer this query
- Describe meaning of sketches on p 5 & 6, session 2.
- Describe the motor on page 8, session 2.

Session 2

- Describe sketch on page 5 & 6. What does it mean to V viewer 18

Describe the motor on page 8, session 2.

Session 1

- Describe S-3 sketch on page 6

- How is energy associated with production of movement? See p. 7
