SUMMARY OF INFORMATION

Site is two structures on a narrow road in an isolated area. The road slopes downhill mildly. The air is cool, dry and dusty. The road has one lane in each direction but a painted center line is not visible. Predominant colors of the land are browns and beige and vegetation is low. There is a major highway very close nearby.

The first structure is red and white and appears old/ not well kept up. There are two gas pumps way to the front of the area in front of the structure, the main point of the structure is a store not a gas station (reminiscent of a Circle K). The shape of the gas pumps is unusual. At the beginning of the session there was a 6-8 year old pick-up truck parked in front. It is quiet with no activity.

The second structure (up slope from the first) is flat-roofed and has an extended covered area in front that runs perpendicular to the structure. This structure, too, is not in the best of repair. The support posts of the covered area are dark in color. The purpose of this structure was not obtainable.
