SUMMARY OF INFORMATION

When seeing the overall perspective by looking in front of me, I could see that there was land and tall trees and in front of the land and trees there was water. In front of the water, there was a large circular area which was made of cement. In the large circular area there were men and women here and it was a greeting place. There was a large structure to the left of me and to the right there were three smaller structures. The smaller structures looked more like houses than the large structure.

Then I could see a semi-large circular object. Behind this large object men stood. This object reminded me of an micro-wave dish or a large antennae. It seems to me that information is sent into or to this large object.

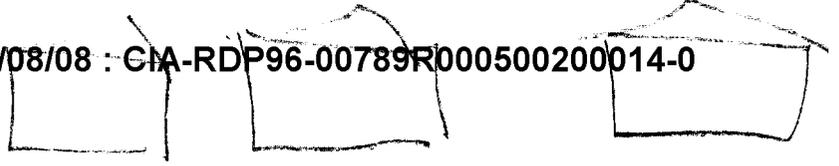

I then could see a long slender object that was pointed. This object hit something or caused an explosion because I could see a white cloud. This object also comes into meet the large circular object. Then I could see this object just sitting by itself.

I then felt that I was inside a main structure and I could see a computer screen monitoring information. It had the number 090 on the top of the screen. The screen was in color and it was monitoring land formations and movements and watching movements

of air vehicles flying across low land. At this point, I could see that the men working here were concerned with "watching safety."

The site was a military site.

I could see the words "DUC/DUC/ENC."
