S: 001

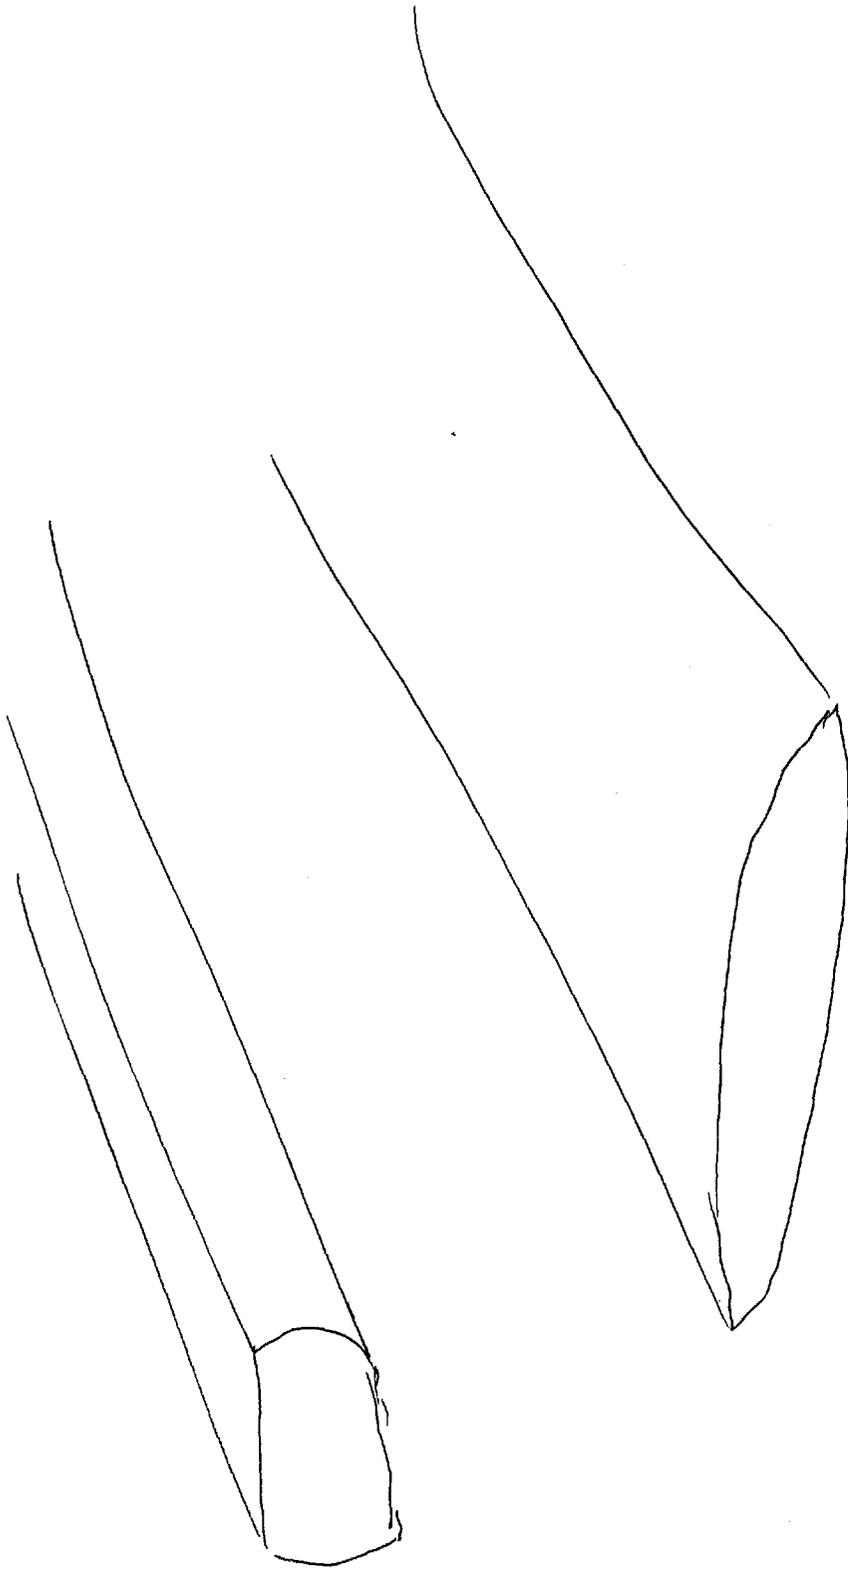

(W-16)

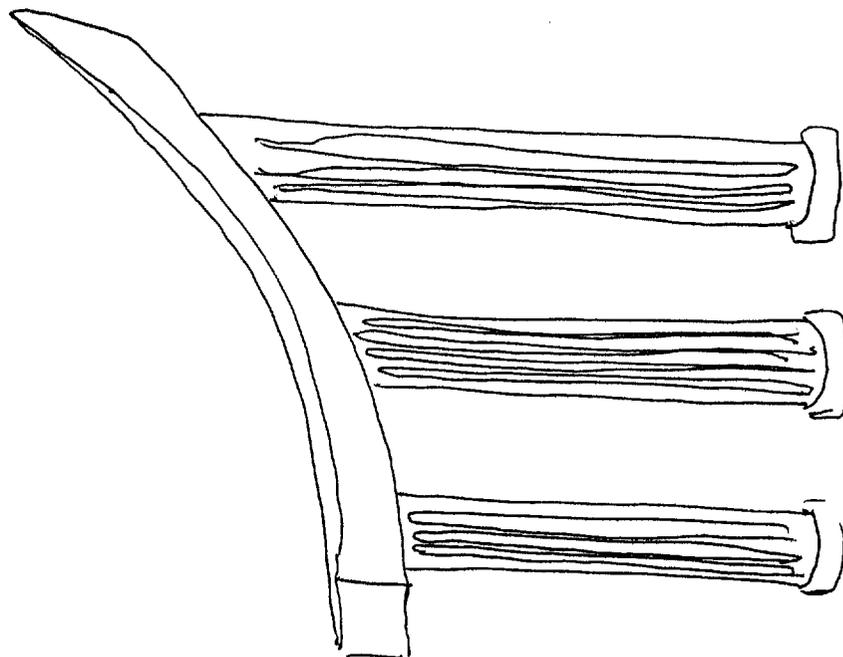

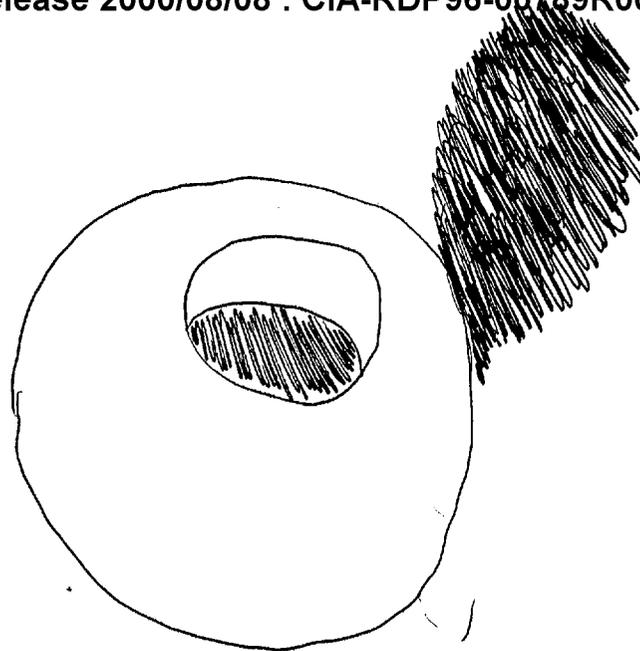

SUMMARY OF INFORMATION

The target is a system or structure of open steel beams. There are very long heavy beams positioned in numerous displays; angled against each other, supporting each other. In some instances there are steel erections accenting molded stone or rough surfaced objects. Some of the objects are rounded and set alone while others stack and lean against each others.

The principal activity at the site is that of watching, looking, reviewing and listening. The site has an art-like aspect to it -- like a park or museum. -
