SUMMARY OF INFORMATION

The general site consists of buildings, land, and small water bodies. An old grayish white structure, with columns and windows is of interest. Within this building, there is a round dome object (globe) which has light underneath and a hole on top where light comes outward. This is a dear man-made energy resource which affects the earth. People who are working are around this area looking up. Space and gases are of concern. They are trying to capitalize (advance) this powerful energy resource through science exploration, technology and research (aeronautics and Aircraft). Utility and threat assessment are the emphasis. Something rises and is growing. Many things can be done with this resource. The function of the activity is to explore unknown areas of science by further utilizing the resource, and to go higher. Commission and the air force are involved. The individuals here are setting something up so it will go off.
