START:	0840	END:	0910
METHODOLOGY:	CRV	VIEWER ID:	095

1. (S/NF/SK) MISSION: To access and describe a target structure shown in overhead photo imagery.
2. (S/NF/SK) VIEWER TASKING: "Reaccess the target and locate and describe the cause of yesterday's strong AI, using whatever mental "protection" or "reassurances" are necessary to overcome it."
3. (S/NF/SK) COMMENTS:
  - a. Inclemencies: Chronic cough.
  - b. 095 stated that the AI had dissipated overnight, and had no apparent trouble with it in this session. The session was begun in stage 6, and the cause of the AI was defined as the covert part of the site's dual purpose. The "director" was reaccessed without difficulty, providing a sizeable amount of apparently good information.
  - c. Summary of Information enclosed.

Everything keeps returning to the concept of a duality: there is the duality of mission, ie. two chains of command and there is also a duality in that 'things are not always as they seem.' The AI I experienced yesterday was a product of this second duality. People are brought to the site and interrogated: this is not known to the majority of the people in the building. The interrogation is not as severe as it appears to be: it is conducted with a lot of posturing in order to create a fear to be manipulated. The people who are interrogated are neither prisoners nor criminals. The questions are on the order of information, security, correlation and gathering.

The front left corner offices are: first floor contains many gray cabinets and files. Second floor: shelves of books; third floor: a long room full of desks and workers; fourth floor: the director's office. Under the ground floor there is a dark, maze-like space with concrete block construction: there are no rooms down there.

The blonde man from the previous session is the 'director' though his title is more on the order of a head of an organization which is like a commission. His job involves committing himself to/voicing a position. In this he often finds himself trying to decide whether to tell his superiors what they want to hear or what he perceives as the truth. He is not in politics per se but he is in a very "political" position. He has a university degree and was raised in a city different from the one he is in now: this is not unusual for people of his position.

Everything keeps returning to the concept of  
duality - in the case of my AI its because  
things here are not always what they  
seem. People are brought here, and  
interrogated - this is not well known to  
the majority of the people in the building.  
The people are neither misers nor criminals.  
The interrogation is for security / information retrieval
