# memorandum

DATE: 22 FEB 90

REPLY TO  
ATTN OF: DT-S

SUBJECT: SUN STREAK Project 9004-II (U)

TO: HQDA (ATTN: DAMI-PO)

1. (S/STD) Two sessions were conducted on 16 February 1990 and 21 February 1990 respectively, to describe the vessel and identify the location of the contraband aboard ship.
2. (S/STD) The target is a mid-sized vessel of a predominantly black color. It has a white superstructure along with one or two cranes positioned amidship and fore respectively. The vessel could readily be mistaken for a tanker. The contraband, believed to be in the form of cocaine, is wrapped in dark green/black plastic and stored in the forward part of the vessel, possibly in the first hold. See Tab A and TAB B. The drugs are stored as a first item below the normal cargo to preclude easy access to the contraband.
3. (S/STD) Remote Viewers 025 and 032 were utilized for this project. Results indicated a high degree of correlation in their findings.
