(WORKING PAPER)

15 MAR 90

DIA (DT-S)

TO: DCSINT, ATTN: PO

SUBJECT: SUN STREAK Project 9008 (U)

SG1A

SG1A

1. (S/STD) On 14 and 15 March 1990, seven sessions were conducted to determine if a vessel identified as the [REDACTED] was carrying contraband in the form of illegal drugs. Efforts were made to determine the destination of the drugs, the current location of the target vessel. Further efforts were made to determine how the drugs were packaged and where they were stored aboard ship.
2. (S/STD) Viewer 079 pinpointed the vessel's location in a geographical area at 0 (the equator) 45W while Viewer 095 indicated a current location northeast of Brazil at geographical location 10N / 40W.
3. (S/STD) 079 believed the vessel will (could/would) be intercepted in the West Indies at a location described as being about 100 miles west of the island of Santa Lucia, at geographical coordinates 14N/ 62W. The name "Sayor/Saylor/Salor" phonetically surfaced to describe an individual involved in the interception of the target vessel.
4. (S/STD) Both viewers felt the vessel was transporting a small load of drugs. 095 saw the drugs as being hidden in an area measuring about one and one half feet by three feet. The drugs were hidden in an area located at the rear of the vessel, on the

port side, and below the water. Both viewers described the vessel as a somewhat small craft, over 45 feet in length, and resembling a sail boat.

5. (S/STD) Viewer 032 also perceived the drugs as being hidden at the stern on the port side of the vessel in a metal container. Viewer 032 perceived the numbers 67/267/2673 as related to the cargo container "identifier."
