

WORKING PAPER

91008  
Project: ~~90104-G~~  
Date: 910130 ✓  
Time: 1405-1454  
Viewer: 018  
Session: 01  
Monitor: R

SUMMARY OF INFORMATION:

TASKING: "Describe target objects and their activities"

NOTE: To prevent the confusion which always comes from being tasked with multiple targets in multiple locations, I requested that the monitor change the tasking from "objects" (plural) to "object" (singular). Tasking a singular object does not prevent perception of multiple objects at one location, whereas tasking multiple targets and locations will always cause tremendous confusion of perceptions.

RESULTS:

1. There are more than one of the targeted objects, moving (apparently) west to east in a slow, evenly spaced procession during a time of darkness.
2. The individual objects are very massive, slow-moving, and self-propelled. Each appears to be about the size and weight of a large firetruck, and appears to be carrying something long and thin on its back (see Sketch 1). Both the large objects and the objects being carried are dark olive drab in color. They are very boxy, but have curved edges.
3. Although the objects move as a group, they stop and deploy individually, each taking over an hour to do so, and located seemingly without any sense of order. In order to be used, the large objects must be stationary, and the smaller objects they carry must be risen to a tilted angle (see Sketch 2).
4. Each fires in a single direction, but as a group, they fire in many directions, generally ranging from WSW to SE (see Sketch 3). Elevation of firing ranges between 15 and 40 degrees from the horizontal (see Sketch 4). Firing makes a very reedy, high-pitched sound, rather than a deep roar.

SKETCH 1

The individual objects are very massive, slow-moving, and self-propelled. Each appears to be about the size and weight of a large firetruck, and appears to be carrying something long and thin on its back. Both the large objects and the objects being carried are dark olive drab in color. They are very boxy, but have curved edges.

SKETCH 2

In order to be used, the large objects must be stationary, and the smaller objects they carry must be risen to a tilted angle.

*F502  
ALL MONTHS*

*(83-0001-2)*

SKETCH 3

Each object fires in a single direction, but as a group, they fire in many directions, generally ranging from WSW to SE.

*NOT THE SAME KIND AS FROM DARGOT OBJECTS (MONO PURPLE LIGHT) (LOWEST UPWARD)*

*( ALL ELEVATIONS BETWEEN ± 40° & 15°*

SKETCH 3

Elevation of firing ranges between 15 and 40 degrees from the horizontal. Firing makes a very reedy, high-pitched sound, rare.

90104 - C

TASK: Describe the use, if any, of chemical/biological-bearing munitions in readiness for use against allied and coalition forces in Saudi Arabia. Determine their current locations. If used, determine their targeted objectives.

*Question was asked this way:*

- 1. Confirm the existence of the objects described in the tasking*
- 2. Identify locations of objects*
- 3. Specify use of objects.*
