- E. SESSION SUMMARY:

The target is currently at a terrorist training facility near the Lebanese-Syrian border. There is a Palestinian association with the camp and a PLO involvement somehow. The cadre is Palestinian and the camp is administered by Palestinians. The facilities per se, though, are not Palestinian (if this makes any sense). The term "Black \_\_\_\_\_" is associated with this place.

The target sometimes wears a green robe and has verbal confrontations with the guards. He has had enough of the waiting and feels like a caged animal. A number of people here are poorly dressed. The target is bored and is looking around, searching for something located within the camp. There are oblong, rectangularly shaped boxes which are collected and stacked together. There's the impression that these are associated with rocket launchers or missiles. The projectiles are 3"-4" in diameter and 36"-40" long. The front portion is colored blue and gold.

There is an individual who favors wearing boots with lots of laces. He is observing a test firing of "launches" activity within the camp.

Greece is the planned transfer part/location of the operation. The operation is related to ships: either the objective is a ship or the operation/attack will be from a ship. The target individual views this operation as "two cracks coming together".
