SG1A ~~PP~~

Two vessels are aware of each other and are working together

Summary

On 23 July 90, There were two SG1A
vessels in [REDACTED] that were carrying drugs. They are both still there, ^{they} but one is ~~planning~~ ^{about to} get underway ~~today~~ now.

One of The vessels has a dark red hull and a white superstructure. The superstructure has two ~~levels~~ ^{levels}. One is long and rectangular and the other is a shorter square shape next to the rectangular one.

This vessel is currently loading wooden containers and is still in port. Possible name "could be" "Dominique" or "Romineque"
see sketch page 12A.

The other vessel has a black hull and a yellow superstructure. There is a yellow, rectangular shape that could be one smokestack. This shape has two small, narrow, ~~two~~ light blue lines around the top of it. See sketch page 12A

This vessel has a hidden compartment inside it. It looks like an ^{black} grate that hangs from the ceiling.

Two people are currently carrying a black box or container.

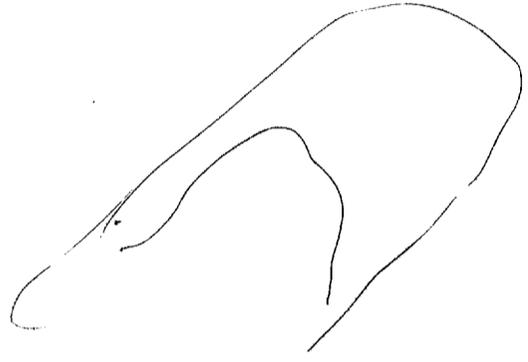

This vessel is ~~starting~~ preparing to get underway.
