Feedback on JT4-085-90 (31 Jul 90)

SG1A

00B: (311057 JUL 90) I could not detect any drugs aboard the [REDACTED]. There does, however, appear to be a compartment for carrying drugs in a "smokestack" looking, vertical piece of equipment which is rounded, with two flattened sides, and open at the top, and has what appears to be a ladder up its side. The present position was detected at approximately 1550N / 6345W, w/ present destination of Miami.

00G 1000-1100 The vessel is currently located at 22 N - 71 W by the side of land near the Turks Islands. It is blocked from action and is not moving now. There are no drugs aboard. The activity involves illegally getting something precious to the ocean's bottom which is alive and dying out. A transfer will be made from vessel to vessel. Many scout this area now and the [REDACTED] will stay within the vicinity (location) that it is at.
