PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER:	0188 (Tng)	SESSION NUMBER:	1
DATE OF SESSION:	13 FEB 90	DATE OF REPORT:	13 FEB 90
START:	0839	END:	0918
METHODOLOGY:	CRV	VIEWER IDENTIFIER:	052

1. (S/NF/SK) MISSION: To describe the target site (Hiroshima, Ground Zero - present time) in Stage 2 terminology.
2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates only.
3. (S/NF/SK) COMMENTS: No Physical Inclemencies. 052 quickly got the descriptors for the site as it is in present time, so I called "site", and then offered "learning something new" as a reward. 052 is always eager to learn more, so I gave a "movement command" in time, to the date of "the new target - an event" (the actual date was not given). 052 quickly described the atomic blast, itself, in proper Stage 2 descriptors and afterwards expressed appreciation for being allowed to. Post session discussion centered around theory and use of "movement commands" (which is not taught in the regular theory instruction).
4. (S/NF/SK) EVALUATION: 3
5. (S/NF/SK) SEARCH EVALUATION: N/A

MONITOR: 018

HANDLE VIA SKEET CHANNELS ONLY

CPYRGHT

skeletal dome, foreground, marks the point over which an atomic bomb exploded on August 6, 1945. It took 100,000 lives, including those of the husband and three daughters of Mrs. Yuki Sakamura (right). She herself was less than a mile from the hypocenter. Yet she has put away anguish, and can say of her life today, "Laughter brings some happiness."
