PROJECT SUN STREAK

25 July 1988

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: S1 TRNG	SESSION NUMBER: 1
DATE OF SESSION: 880721	DATE OF REPORT: 880721
START: 0825	END: 0835
METHODOLOGY: CRV	VIEWER IDENTIFIER: 032

1. (S/NF/SK) MISSION: Access and describe in a stage one sense training target # 4, Mount Olympus, Washington.
2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates 4745/5612.
3. (S/NF/SK) COMMENTS: Good first session. 032 experienced spontaneous ideograms. 032 exhibited good adherence to structure and rarely needed prompting during the I/A/B sequence. Prompting on breaks etc. was necessary. Viewer accessed the glacier near Mt Olympus, rather than the mountain itself-- a problem which has repeatedly occurred with this training site. Site was called after viewer identified several of the feelings associated with the glacier : soft, water, etc., because the proper decoding of a glacier is not possible at this point in training. The feeling of moving snow/ice with a layer of water on top is too subtle for proper decoding at this level of experience, hence the next gestalt (mountain) would not have appeared.
4. EVALUATION: 3.

HANDLE VIA SKEET CHANNELS ONLY
SPECIAL ACCESS REQUIRED
