SUMMARY OF INFORMATION

The circular metal object has a foundation with several extensions. This is a craft with windows in the center which are similar to speaker vents in design (see sketches on pages 1 and 2). People are inside looking at colored monitor screens. There is a black slanted control panel (encompasses monitoring signals) with communication devices and white lights underneath which shine upward (see sketch on page 3). An exhaust system (white mist) and streaming bright lights go outward in a shower head fashion. The men are watching the monitors which show different places. They are looking at the core. Ultraviolet and infra-red lighting is utilized. This object is concerned with natural resources and the transformation of energy systems. A portion of the surface of a red planet is being viewed. This planet has craters. There is also visions of the stars and other planetary space items present (sketches are on pages 4 and 5). The object slowly revolves to the right. The object involves large scale testing procedures of combined research including territorial expansion interests and network perception. Powerful mechanisms and activities regarding space is the focus. The objective is to go higher, beyond what has already been accomplished in terms of new ventures, models, and insight. This is a special project of exploration.
