WORKING PAPER

Viewer: 018
Date : 23 MAY 89
Target: Beacon Exercise

SUMMARY OF INFORMATION:

1. (S/SK/NF) Beacon was in an open, flat area which sloped downward sharply at its edge. There was a warm and humid feel. The lighting was diffused and not very bright. The area appeared to be outdoors, but there was also a "covered" aspect to the site.
2. (S/SK/NF) There was at least one structure in the area. I got the impression that Beacon may have been inside/under and outside this structure at different times during the beacon session. The structure was old, dark colored (greys, blacks, browns), and appeared to be made of wood.
3. (S/SK/NF) An "object" at the site was shorter than the structure, conical in shape (or cylindrical with a conical end), and appeared to be smooth and yellowish-brown/greenish colored. Another "object" had a "back and forth" motion involved with it (ADL: like a swing set). Another "object" appeared to be a tree stump.
4. (S/SK/NF) There were repeated images of an American flag which was on a vertical surface (rather than flying free), like a picture or poster of a flag, rather than the flag, itself.
5. (S/SK/NF) Dowsing produced widely random results, but the greatest number of correlations between them all placed cross points at a point between the Post Chapel and Burba Lake.
6. (S/SK/NF) Beacon was perceived as having very little interaction with the site, except to look and observe. There was a definite lack of tactiles, EIs, AIs, etc. Really made for a boring site. Beacon was also perceived as feeling "antsy" and impatient at the site.
7. (S/SK/NF) There was a definite impression that the site may be drastically changed, or not there any more.
