WORKING PAPER

Project: 5029
Date: 900827
Time: 1037-1056
Viewer: 018
Session: 01

SUMMARY OF INFORMATION:

1. The general area of the site is rough, dry ground with little vegetation. The weather is hot, dry, and bright sunny.
2. The site, itself is a complex of structures consisting of
 - a. a main one which is large and round with irregular noises coming from it.
 - b. some which are vertically oriented, narrow and pointed.
 - c. some which are leaning at sharp angles.
 - d. normal "buildings" which appear low and flat.
 - e. a mobile structure which appears to be a tank.
2. The complex has a feeling of being a factory or military/industrial complex of some type. There were impressions of water and chemicals being important to this place, somehow being used in its activities.
3. There is a person at the site who feels unpleasant because of the heat and the idleness. He has a protective feeling about the place, though, as though he were a guard. I think this person is somehow related to the structure I perceived as a tank.
