The water surprised  
me!!!

Adl Bk - Fee I want  
to say this is  
man made land.

Site is made up of similar lands (land forms) with a border component.

The border component comes down & is curvy & rounding. It is hard soft smooth flowing & lig.

the border is blue and deep.

~~the~~ the border component ~~is~~ is a very fast & salty & watery & it is cold.

the LANDS <sup>land forms</sup> coming down straight angle and go across. ~~they~~ the lands are hard & smooth.

the lands are brown green & yellow. the lands are soft & mushy & wide

there are flicking & hattering & natural ponds here. The ~~pronds~~ pronds surprise me.

Overall, the whole gestalt is big & spacious & airy.

Parting of the site smell clean & fresh while other part smell dirty & unclean.

I'm most impressed that this is a big place & the sounds are ~~strong~~
