2. (S/NF/SK) The target was the US Air Force complex at MacDill Air Force base. This facility is a primary advanced fighter aircraft training installation with a Joint Service Headquarters (USCENTCOM) located on the installation. MacDill is adjacent to the Gulf of Mexico, near Tampa, Florida and boasts some of the finest on-post fishing, boating and swimming facilities as any US military installation. The 1.6 miles runway (with several shorter connected runways) is capable of landing and taking off any conventional known military or civilian aircraft.

3. (S/NF/SK) In the opinion of the Interviewer, the Source did not acquire the proper site for reasons which cannot be determined. The data provided by Source during the official session could not be adequately correlated to any known components of the site.

I felt that I was in a large, massive, open area with pointed trees or pointed hills or pointed mountains. I felt the area was green or brown.

I felt that I saw a monument of a man. I then saw a light coming off the ground sprinkling into a circular area. Now this was not ~~was~~ water but was make-believe water. I then sensed that this monument was mythical. It was ancient/old but also represented the future. I felt I was looking at the past & the future at the same time. I then felt there was the presence of a structure. It got part of a religious feeling. Now this area was large but it was also massive but I felt that people only walk to this area. Inside the structure, I sensed people got quiet. They look at things such as jewels, clothing with jewels, a crown. I sensed a culture of the past but a sophisticated culture. I also sensed dark people in nature, I sensed dark passages, hidden women. Outside the area, where people lived, they were rural people who farmed and unsophisticated. I sensed animals.
