land/water interface
 Island

Size of land surrounded by water is very clear
feel. Land has varying elevations & if a interfox
differs in diameter from one place to the next. At one
point it slopes to the water. At another it drops
sharply. Center of land is depressed in a ^{funnel} circle
manner, suggesting volcanic crater or even atoll.

↑ Structures are associated with the site. Some are
low + rectangular, but at least one is towering + imposing,
+ gives the pronounced impression of an ancient monumental
edifice. Structures seemed to be surrounded by heavy
vegetation. Climate appears to be very humid + damp, almost
"jungle like."

~~Area~~ Site is an island, or at least ^{island} ~~island~~, surrounded by water. Climate is humid, warm, perhaps even tropical. Much vegetation + colorful birds are present. People are barefoot, dark-skinned, undeveloped, + ^{sometimes} wear colorful native costumes adapted for warm weather. They live in ~~houses~~ ^{houses made of natural materials}, much like woven fronds, and are handy at crafts. Other structures are present, including one large, imposing edifice on a hill which ~~dominate~~ ^{dominate} area + gives the impression of a religious structure - perhaps a church - but with an ancient ^{+ ruined} feel. Tourists are attracted to the area. Urban areas seem to about non-urban areas, + traffic congestion exists including cars, bicycles + noise. ^{in the urban area} Area seems to evince a Pacific or Micronesia/SO. Pacific feel.

Site end

BANDAR SERI BEGAWAN

The capital of Brunei has many houses built on stilts over the Brunei River. The Great Mosque is behind them. Brunei is on the Northern coast of Borneo. Tropical marine climate, high temperatures and humidity is tempered by sea breezes. Rainfall is heavy along the coast and in this area.
