Interim Summary

Site is a land/water interface, perhaps land/water/structure interface, with a group of buildings of varying heights, distances + shops, associated with vegetation, perhaps a "park or garden-like" or landscaped area. People are present, both ~~at~~ strolling + working; site seems to be oriented ~~at~~ along something.

kitchen stands

Area is a place of interest with a structure of primary interest which is tall, of larger diameter at top than at the bottom (similar to space needle). Top is accessed by elevators + has 2-3 levels, one of which is open w/ panoramic view, carpeted, quiet furnished; other is open, probably on roof, with the source of an observation platform --- Place seems to be a center of interest, preserved, perhaps his arrival.

Not Brook Botanical gardens.
