

30 SEP 86

SESSION SUMMARIES

MORNING

SITE 1.....FACTORY

..... still having problems identifying man-made structures/
complexes..... all elements of site were identified during the session
but viewers' ^{ANALYSIS} interpretation of the site was ^{OVERLAPED} blocked by AOL..... Especially
stage I gestalt a.... Stage II's were much better... crackling sound...
..... burning small... warm, hot... sandy, gritty... angles.....
AOL of volcano.... if this were a steel mill the AOL would be very
apropo..... A. I. - do not want to taste... hot, burning
sensation..
