

02 OCT 1986

SESSION SUMMARIES

AFTERNOON

Site 1 Coastal village in Greenland

.....very limited site contact, if any..... especially with stage 1 information

Site 2 Grand Canyon

..... Difficult time with this site.... a reverse ideogram presented itself several times.... along with it there was a feeling of confusion.... again, stage 1 information seemed to be somewhat blocked..... stage 2's seemed to flow a little easier

OVERALL:

There was a definite lack of visuals with today's sessions. This is unusual..... colors and shapes, ^{usually} present themselves easily... having a most difficult time with sounds.... this may be due to ^{local} area background noise....
