DATE: 25 October, 1988

REPLY TO
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

TO: DT-S (ATTN: 099)

1. (S-SS) STATISTICS:

Viewer:	018
Session date:	24 OCT 88
Start time:	1344
End time:	1432
Mode of operation:	CRV
PI:	None
AV:	Drugs

2. (S-SS) CUING: Encrypted coordinates 110698/259179.

3. (S-SS) RESULTS:

a. The general location of the site is in a mountainous area. There is a long ridge of sharp peaks nearby.

b. A specific site was located which was an isolated group of similar structures. There was a temporary feeling about these structures (see pages 4 & 5). There was a lot of panic-type activity at the site by people (percieved as males) in grey uniforms.

c. A movement forward in time indicated that something which was already at the site "exploded". Many of the people on the outskirts ran, but those near the epicenter of the explosion appear to have been killed. The "explosion" did not carry with it the impressions of heat/fire/etc., but appeared to be simply a sudden appearance of a white "cloud" which spread instantly outward in all directions (see page 10).
