

SECRET/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8815 SESSION NUMBER: 3
DATE OF SESSION: 24 OCT 88 DATE OF REPORT: 28 OCT 88
START: 1026 END: 1122
METHODOLOGY: CRV VIEWER IDENTIFIER: 003

1. (S/NF/SK) MISSION: Identify, and describe the mission and origin of 'Object B.'
2. (S/NF/SK) VIEWER TASKING: Coordinates, and instructions to restart the session.
3. (S/NF/SK) COMMENTS: The session required a 'restart' because it seems that the viewer 'slipped off of' the target/site (probably to a drug-related target). However, even with rigid structure CRV control, the monitor was never comfortably 'oriented' and was at a loss to provide 'navigational' cues.
4. (S/NF/SK) EVALUATION: [] *D*

SECRET/NOFORN - SKEET CHANNELS ONLY

CLASSIFIED BY: DIA-DT
DECLASSIFY : OADR

24 Oct 88

003 Approved For Release 2000/08/08 : CIA-RDP96-00789R001800340001-5

The scope of this site is very large. It involves a structure that inspires size-related AIs, especially of verticality and massivity. The structural aspect of it involves levels and height. As one faces the structure at ground level, there is a sense of facing some sort of vault-like opening with reinforced sills; as one enters, it grows progressively darker. Inside is a large, open area with relatively low roof and "pillar" like formations spaced here and there as if holding up roof. There is a sense of a large volume of material overhead. An AOL is engendered of being in an underground parking garage of a very large skyscraper. There seem to be vehicle and machine sounds present. There is an AI of a slightly inimical feel here. There is a sense of construction here, "like" things are not yet completed, but it is being used even as construction continues. Surrounding terrain suggests a sense of numerous structures in the immediate vicinity, somewhat randomly scattered, with an air of impermanence about at least several of them--A/S of temporary structures supporting the construction. There seems to be a lot of terrain scarring due to excavation work. Color of the excavated areas are whitish, light brownish, light ocher with some deep oranges and browns. Area is slightly rolling, somewhat open, scrubby sort of vegetated area. Cool, even cold, with lots of wind. Possible extensive stands of pines in vicinity. AOL of eskimos. Reminds me of upper Great Plains--cool, windswept. In some sense feel like you could look down on the rest of the world from here. Latitude is fairly northerly, but not to an extreme. AOL/S of Soviet Union.

Approved For Release 2000/08/08 : CIA-RDP96-00789R001800340001-5

Interim summary

Site involves large man-made structures of same height & size. Looks down from edge/top structures curves/slopes upward down towards bottom. Activity same has involved.

for war. This is interim point between start & completion.

54 1/2 (cont) this portion of activity is least likely to be eventful - pattern where it's possible to relax a little + contemplate. Next portion comes near end where lots happen at once + 5, 7, 10, 15 becomes complicated by many variables + subactivities that must occur dependent on each other to work

key tangible (c)

heavy

54 1/2 Some of something small "parked into" a large group/wave of unrelated items/material. Some of dark, ventral colored mundane type materials surrounds and envelops a luminous white/light colored center a object positioned somewhat center-of-mass of conglomerated "other" stuff

54 1/2 Item seems to be softly rounded, enveloped; soft thick plastic feel exterior pliable containing white contents. Sometimes black associated.
