Site is a ship in a location other than St. Augustine. It is near land and stationary. Ideas associated with the ship are peaceful (quiet), rugged, empty, repetitive, cyclical, waiting and biding. There is a feeling of patient waiting and if this is not done (the waiting, that is) things won't work out. The ship is waiting for the time to be right to implement a new/next phase. The time for this must be chosen carefully. The ship is in a cupped shaped harbor where there are more small ships than big ships.

Related to the ship in St. Augustine (previous session) is the idea of back and forth travel to the east and back. Also related is the idea of a path from St. Augustine to Charleston, NC. This path is a smooth curved one across the ocean, away from the coast.

Related to the intelligence requirement is a spot in South Florida between Coral Gables and Hialeah (sic) but closer to Coral Gables. A boxy, white building is associated with this.
