

PROJECT: OTHER #
 DATE: 17 Oct 86
 SESSION: 08
 SOURCE: 101

START: 0931
 SANCTUARY: 0940
 TARGET: 0942
 FINISH: 1050

COORDINATE: NONE REQUIRED (THE ROAD)

FRONTLOAD:

" TODAY WE will begin our continuing reporting of the activities along the road. I want you to recall that the period of interest is 7-22 Mar 1984, as of last session we had covered all the time between 7-16 Mar 84 so you can eliminate those periods from your timeline. Today we will begin at 0001, 17 Mar 84 (St Patrick's day). We are still looking for a special event which you will know when you find it, in any case we will be covering the entire period of time."

NOTE: Long period to sanctuary
 normally takes 6-8 minutes
 today it took 9 minutes

NOTES:

- ① NO INCONVENIENCES.
- ② High point on upcoming possibility of trip to Europe (PES).
- ③ NO INTERNAL/EXTERNAL distractions.

OPS: _____

17 March not much going on,
a submarine (MSF1) looking
vehicle move down the road
to the open spot where
other vehicles are.

AT SUNRISE 2^d
COLUMN MOVED OUT FROM
S. TO #1 AND REINFORCED
WIDE SPOT. AREA IS FREQ
IN AND MANY WIRE IS
LAID. LARGE CONEX LIKE
STRUCTURES ARE TAKEN OFF
TRUCK AND SET UP.

DURING NIGHT 2 SQUAD
SIZED PATROL MOVE INTO HILLS.
PATROL ALSO MOVE BETWEEN
ROAD AND HILLS. DURING
NIGHT HILL PEOPLE LOB
TWO OR THREE SMALL CALIBER

Motor Road in direction

(2)

OF VEHICLES BUT THEY
FALL SHORT, Hill people immediately
BREAK MOTAR DOWN AND
SKEDADDLE

18 MAN TRAFFIC IN
MUCH LIGHTER TODAY. A
FEW TRUCKS AND A
SOME JEEP LIKE VEHICLE
AROUND SITE #1 AND OUT
TOWARD WIDE SPOT.

ANIMAL TRAFFIC IN
VICINITY OF SITE #2

SESSION 08
101 17 OCT 86

(2)

→ IT IS NOW 17 OCT 86. Move back to 17 Mar 84, 0001 hours at night. Move to the road and report your perceptions

* Wide spot on the road, cool, group of vehicles, GUNS, big guns vehicle with three guns in parallel. Not real large however. Pointing up off the road. Soldiers close to road. Like a dry stream bed. Slopes up very quickly. Moving down the road towards site 2. Quiet dark. Some activity at site I. People awake, moving, some excitement. People in the hills moving. Group of soldiers in the hills. Hill people and soldiers mutually aware of each other and deliberately avoiding each other.

→ The vehicle with three guns

* There are a lot of them. Partially armored. I'm not sure if it's enclosed or not maybe partially enclosed. Guns pointing up the hill. ~~the~~ Vehicles stay close together but not like motorpark - theoretical security. This vehicle may be amphibious also - unusual chassis. Troops here with the vehicle. Vehicles set up with troops on outside forming partial perimeter (horseshoe shape)

→ Move on now

*
*
* 0100, site II quiet (wide spot on road with vehicle) is closer to site I than site II. Impression of very brightly lit portion of road like a flash bulb from camera but I can't see the cause of the light. I'll keep looking. --- 0200 --- Movement in the hills towards the road. Wide spot in road. Not sure. Maybe getting flares periodically. I see no fires or anything.
RAW DATA Vehicle coming up the road. Very large vehicle. Looks like submarine with a belt. A hula around its middle. Coming from site I. Oblong, looks like submarine. Superstructure around its middle. Maybe this is all AOC

→ Stay with this vehicle

★ Looks like a 747/submarine. Details. --- Halo type thing HAS colors of red and blue in it, no escort vehicles. 1ST Thing I've seen travelling this far on road at night. Blunt nose, hump behind that. Very big, like a small submarine,

→ Continue to stay with this vehicle

★ it moving very slowly. 5/10 mph tops. Has lights. Unusual since most vehicles at night don't use lights. Not head lights but lights.

→ not headlights

★ no. Front peaks down like a cowcatcher with lights pointing down directly in front of road. Maybe different colors like running lights on an airplane. The guide going around has chambers like pods. Its around 0300 now and I'm staying with the vehicle.

→ You can move ahead now to the vehicles ultimate destination.

★ its daylight. We're in the open. High hills above us, very rocky, rough. I'm not sure if this is the wide spot in the road. Maybe we are. Very windy. Very cool. On some of the vehicles they have used the vehicles to make tents attached to the vehicles. They are really blowing around. The wind is howling. The submarine is between the vehicles.

→ Before moving ahead quickly review the time between 0300 and the time you're now located. --

★ OK -- at 0400 at site I they are becoming more active - maybe convoy preparation. Its cold but its going to get colder. I see something like a big bug, like a ~~submarine~~ ~~submarine~~ ~~submarine~~

★ 0500 --- cruising the road, people in the hills have no real objectives -- just moving. --- The submarine looks like an SST but the nose is lower. 0500 --- the wind is getting harder and the air colder --- 0600 --- getting lighter now - some activity at site II, smoke -- cooking fires, wood fires - smell of fires on a cold morning --- 0600 --- still a lot of people in the hills. The wide spot in the road --- submarine has soldiers not sailors associated with it. They are wearing jack boots, riding boots, tall boots. Normal morning activity. They are ~~g~~ eating. 0700 --- more vehicle travelling from site I. Can't figure out why these vehicles would wait until daylight but the sub moved at night. Patrols coming back in. Hill people watching.

→ Continue your normal scanning

★ 0800 --- middle of the road. lot of activity. Improving the area. Vehicles on the road. 0900 --- more vehicles now - middle of the road. Things here, metallic, look like conex containers. Maybe troops preparing for longer stay. Activity back away from road. moving down the road. 1000 --- not a lot of traffic between site II and the wide spot. air vehicles. Big helicopters - 0458 - fairly low - quite a few of them. 1100 --- coming into site I. ... unusual things -- Hill people numbers have not decreased since last night but they still do not seem to be preparing for anything. Back up the road -- some civilian traffic - Dusty here, vehicles kick up dust. Wind still blowing but not as bad as before. 1200 --- looking for something out of ordinary³⁰⁰. Hill people are getting together to talk about something - in site I there is a dirt berm for something. 1400 --- 1500 ---

→ Describe the traffic density

★ Lighter now, some civilian traffic, decreasing now

5

★ 1600 seems to be a stand down time for the troops. Lull in activity, drinking tea, relaxing. some traffic continues to move. Not much traffic moving all the way between Site II and Site I 1700 ----- Traffic is pulling in the sites now. Traffic thinning, 1800 ----- people still in hills.

→ describe submarine activity.

★ sitting there, quiet. turned off. Some people coming and going.

→ continue your normal scanning

★ 1900 ----- "0" traffic on the roads. Patrols going back into the hills. could night and troops moving into hills to set up positions -- ambush type patrol. --

hill people -- much darker robes here, stationary observing, high up. alert. 2000 ----- 2100 ----- troops and equipment buttoned up. side of the road. lights again like last night -- no cause -- could be flares. They are away from the troops. some flares around the troops. people in hills very stationary. watching down the road. 2200 ----- 2300 ----- 2400

→ it is now 18 march 1984. continue your forward scanning.

★ 0000 - A little blurry. 0100 ----- Not sure ----- Think perhaps hill people are -- have a mortar, trying to lob rounds towards vehicles. Very rapid rate -- perhaps three rounds then break down and move out -- They are well short of target. They move quickly away from road. 0200 -- moving down road. not much going up ~~road~~ back 0300 ----- quiet now after mortar incident ----- 0400 ----- Periodic patrols between road and hills but they aren't going in the hills much on the flanks.

6

★ 0500 ----- site II starting to stir. 0600 ----- some cooking smoke. nicer morning than yesterday. 0700 ----- Traffic beginning. sounds of engines running like generators whining sound. 0800 ----- number of people in hills decreasing. maybe some sniping earlier but nothing serious. still some limited traffic. hill people thinning out now. 1000 ----- vehicles in center of road. not much serious. some digging going on. Impression of burying cable. Long narrow hole, couple of feet deep. fresh earth in middle. Traffic thinner now 1100 ----- animal traffic around site II. Wide spot in road. Choking it out now. 1200 ----- Traffic very light 1300 ----- mules, goats on road 1400 ----- wide spot, trucks 3/4 Jeep like vehicles, other vehicles like that

→ submarine

★ over beside the road. Blurry. Maybe sand, fog, smoke. Setting on ground. Small caliber automatic weapons associated with submarine

→ 1400 ----- continue your scan

★ 1500 ----- I moved, 11m in a European
