

PROJECT: OTHER A START: 1320

DATE: 21 OCT 86

SANCTUARY: 1330

SESSION: 09

TARGET: 1332

SOURCE: 101

FINISH: 1443

COORDINATE: NONE REQUIRED (ROAD)

17-22 March.

## FRONTLOAD:

"WE will be returning to the road that we have visited so many times in the past. on the last trip we covered the time up to 1500 hours, 18 March 1984. Due to the ~~length~~ <sup>length</sup> of the session there was some confusion at the end of the session so today we will backtrack a short period on 18 March 1984 and review the time beginning around noon, 18 March 1984. Since you will be moving back in time to a period between 17-22 Mar 84, I want you to know that it is now 21 Oct 1986 so you we need to move back to that period specifically 18 Mar 84, around noon 18 Mar 1984. ~~Use~~ use your Sanctuary to work out your painful back muscles to make the session more comfortable."

## NOTES:

- ① Some back distress Reported by Source
- ② Just before session Source had to leave to accept call from spouse. Inconsequential but it did interrupt session sequence.

SESSION 09  
21 OCT 86 OTHER II

→ ~~IT IS NOW NOON~~, IT IS NOW 21 OCT 86. Move to Noon, 18 Mar 84. Describe the Activities on the road.

★ SITE I, Activity around site normal, vehicles, people wide ~~spot~~ spot, improving the position

→ How are they improving

★ Shovelings, field fortifications (not extensive), people do it, wood, sand, making a berm, half semi-circle facing the highland on other side of road. Don't see any machines helping, people ~~power~~ but no real intensive construction. moving on down the road to site II - farm animals around road. 1300 - - - - wide spot, people saw working. Interlocking wood ties, putting dirt around them. Looks like one - - - - -  
- - - - 1400 - - - - moving back towards wide spot, in wide spot, small outdoor like market, like booths on side of road. Wide spot, no real sense of urgency, lot of relaxation. Not working on deadline.  
site I: 1500 - - - - image of a man, dark skin, brown, mustache, maybe 40, looks longer, robe, talking at site II. No beard just a mustache.  
moving back up. 1500 - - - - wide spot, quite a few soldiers both side of road. No big security. Quite relaxed atmosphere. 1600 - - - - Some traffic out front of site I starting to come back in - fog / haze or a mist. 1700 - - - - movement getting less. People moving back to built up area

→ tell me about hill people

★ low key, low profile. Biding time. Dark robes. observation points. Two man points.

page (3)

→ Back to the road 1700 - - - -

★ Market area on road is closed down now people returning to built up areas. 1800 - - - - site I, vehicles here. Not much going on inside. activity outside as vehicles move in. Wide spot, back by the site. Some camp fires, not many, just a few. 1900 - - - - lights now at site II. Wide spot, people are in groups, relaxing. 2000 - - - - SITE II, almost like OPS across the road. one on each side. SITE I feels very secure. 2100 - - - - ~~wide spot~~, dark, site I, only a few guards. lights inside. Not much activity. Coming down towards wide spot. 2200 - - - - SITE II. Periodic movements across road to relieve OPS. Between road and hills. People here are alert. During day they are relaxed but at night they become more alert. Hill people are out but not as many as before. Smell of wet wood, wood fires (none ~~there~~ now) just the after-smell

→ Wide Spot. Do you see the submarine? Describe it now

★ Resting on something. Long, spherical, almost a pointed nose, bulky, long, tail at back more like fin. The girder is not a girder it is a clamp holding this thing to a flatbed. off the road. Well clamped on. Just one of them. Dark blue color. moving back up the road. Between wide spot site I, hill people (lighter colored robes), are down on both sides of road. Not many. Less than 20. Not sure of activity. They look prone, crawling. Maybe digging on side of road. ~~ITS 2300 - - - -~~

→ ITS 2300 hours now

★ OK. moving to site I. ITS more brightly lit. light drizzle maybe. You have to look to see the lights. Very still. Guards inside very brightly lit compound. 2300 - - - - moving back up the road. Hill people still there. fewer numbers. Some ~~Appr~~ ~~Approved~~ ~~For~~ ~~Release~~ ~~2000/08/08~~ ~~CIA-RDP96-00789R001900020005-5~~ site I

page (4)

They are not concentrating much in wide spot. At the wide spot, I think they are running small patrols on both sides of road. Periodic patrols. No set pattern. They are trying to control the area. No vehicles. Just foot patrols. Submarine is back towards left hand side. Continuing to move down road - between site II and wide spot, large group of hill people, ~~striped~~ robes, they are down on the flat area. Maybe 50 or more men, bearded. ~~40~~<sup>15</sup> plus some young men. Gray in the beards. at site II, dark quiet. Animal sounds. No vehicle activity. like its black out that's (AOL) 2400 --- moving back up the road. Land around here is very rocky. Large rocks. Hill people moving around that area. They are carrying something very heavy. Man packed.

→ Describe these things

★ one -- raw Data --- strapped to a person (maybe an animal) .. very heavy, starting at the end, circular, tapers back, cylindrical, then gets wide again and forms a circle at the other end with two projections at each side. maybe 5/6 feet. at the wide spot, people becoming more alert. The activity of the patrols are continuing. campfires inside the berm. people walking around inside. back up the road to the other group of robed men. They are very quiet. looking both ways on the road. 0100 ---

→ ITS 0100 Hours, 19 March 1984

★ Gray robes, beside the road, sitting. at wide point, moving up to hills. Being very careful (AOL) between wide spot and gray robed men there are people coming out of hills on the other side and the carrying party there are people coming out of the hills. moving to carrying party.

page ⑤

The long thing is ~~seen~~ on some sort of animal (mule goat). Rough territory out here. 0300 - - - -  
 Carrying party. About 50 people still. Maybe wrong earlier about climbing down. They appear to be higher now so maybe they are climbing up the hills into the large rocks. People coming ~~from~~ now to join the carrying party. They are wearing dark robes. Wide spot guarded but no more patrols. Between wide spot and gray robes another group of robed men have just come out of hills. Impression of moving towards wide spot. Concentration divided (robed men) between site I and wide spot. 0400 - - - -  
 HBLE, ok, ok, Activity at site I. Excitement. ~~off~~ off the ~~the~~ road either side, gray robed men facing site I. I'm being very careful. Two groups on either side of site I, and closing in the site. I have a lot of light here = I am assuming flares - - - I

→ Smell the air

★ Yes, I can smell cordite, burning aluminum.

→ Probably flares.

★ I'm sure of it. Lights on now at site I. Well lit. Two groups now closing from the sides. Fires, funk, funk, chop, chop, chop, clink clink (I don't recognize it), more thunks, dark and confused here. All's quiet around submarine. I'm looking for the carrying party. They have another long tubular object. Maybe first one coming in clearer. I can't be sure but I think they should be providing covering fire. I not sure if that's ~~that~~ what I think they should be doing or they are actually doing it. Moving back to ~~the~~ wide spot. Gasoline, smells, smoke

→ are you at the wide spot.

page 6.

?? something happened between ~~0400~~ 0400-0500. Gray  
 ?? robed men are gone. There are at least two  
 ?? vehicles gutted where the gray robes were located.  
 ?? at wide spot soldiers moving. Vehicles parked  
 ?? between berm and road. Light armored vehicles,  
 ?? Holes, Submarine is -- not appeared damages. area is  
 ?? lit up again. Not flares. People moving back and  
 ?? forth. Checking things out.

→ Focus between 0400 - 0500. Tell me what happened.

★ Rough terrain like a2, approaching from the rear now. Back of hill where vehicles are parked. People-hill, people (hill) crawling in the hills. Swing around. Flares going off towards hills but no one is coming from that direction. The carrying party seems to be firing towards center AOI. Other coming up the hill. Steady Thunk, Thunk, Thunk, explosion within berm. Raw Data. Very hot, ~~black~~ black, red showing through. Wind blowing smoke. Something toppling, maybe an antennae. From the air there is an awful lot of smoke and dirt in the hills, mainly high in the hills. Strangely, it's dark but I'm having no problem seeing.

→ & there return fire

★ yes!! a lot from both sides. I don't know ~~what~~ why it's looking up so high unless they can't locate the hill people. Both sides have crew served weapons. The whole thing only last about 10/15 minutes. Assuming POL storage area got hit. In this area there was a lot of tarp overhangs (vehicles) they are all torn up.

Page (7)

→ or we can move on now 0500 - - - - -

★ Some vehicles, light armor from site I. moving ahead now 0600 - - - - - a lot of helicopters including a very large one like we saw earlier. There's a different uniform now. I haven't seen it before

→ Where is this uniform.

★ There are several of them. Blue uniforms 6 or seven. some helicopters on the ground. (wide spot). They are between the Berm and the road. other helicopters along the road (flying). moving on now to 0700 - - - - -  
site II nothing going on. Site I, have trucks and vans, some escort vehicles leaving site I. 0800 - - - - -  
There appears to be some sort of salvage work going on now

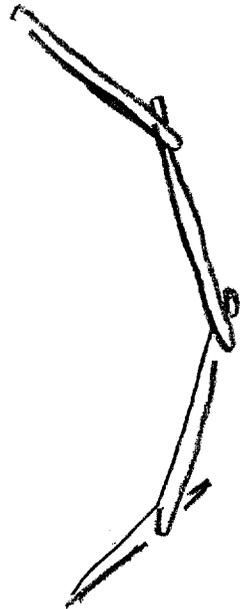

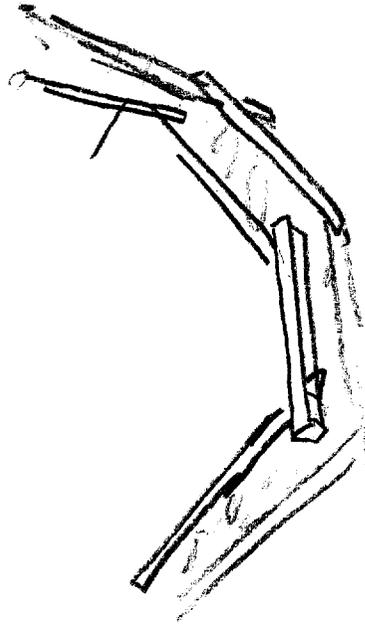

→ The hell people have left

★ yes

→ ★ is it daylight
